

Duplicate Reports in InfoView

I see / have duplicate reports in Infoview.

When reports were migrated from BO 6.5.4 to BOXI, ZABO reports were migrated over as Desktop Intelligence Reports (Deski).

The blue icon reports are Deski, which previously were ZABO reports. These ZABO, now Deski reports, can be run and refreshed in InfoView XI, but they cannot be modified.

The Deski reports were converted to Webi XI reports, with the red icon.

Hence the duplication of reports, one Deski and one Webi.

<input type="checkbox"/>		Title ^	Last Run	Type
<input type="checkbox"/>		1099 Payments to Non 1099 Vendors Schedule History Properties Modify	Never run	Desktop Intelligence
<input type="checkbox"/>		1099 Payments to Non 1099 Vendors History Schedule Modify Properties	Never run	Web Intelligence Document

To conserve space on the Business Objects servers, we strongly recommend that you refresh both of these reports in InfoView and verify that the Webi report data results are accurate and valid.

Once your Webi XI data results are determined to be valid, you can **delete the Deski report** by checking the box next to the report title and clicking on the **Delete button**.
