

## VIEW Reports in Tabbed Browser Windows

You can view several reports at once by setting your General View Preferences.

1. Click on the <b>Preferences</b> icon in the upper right of the InfoView window.	 <p>The screenshot shows the top right corner of the InfoView window. It features a 'Welcome: P00175757' message and a row of icons: a document with a checkmark, a lock, and a question mark. An arrow points from the text 'Preferences' to the document icon.</p>
2. Click on the <b>General</b> tab.	 <p>The screenshot shows the 'Preferences' dialog box with two tabs: 'General' and 'Web Intelligence Document'. The 'General' tab is currently selected.</p>
3. Scroll down until you reach the section titled: <b>View my documents</b> 4. Select the option: <b>in multiple fullscreen browser windows, one window for each document.</b>	 <p>The screenshot shows the 'View my documents ...' section of the Preferences dialog. It contains three radio button options: <input type="radio"/> in the InfoView portal <input type="radio"/> in a single fullscreen browser window, one document at a time <input checked="" type="radio"/> in multiple fullscreen browser windows, one window for each document</p>
5. Click on Apply in the bottom right of the window.	 <p>The screenshot shows a single 'Apply' button with a blue gradient and a shadow effect.</p>
6. With this selection, you can now view several reports in InfoView, and switch between the tabs.
