ISIS Memorandum 05-001

To: Employee Administrators
Human Resource Managers

Subject: OrgPublisher Site License

In April, the Division of Administration distributed a single license and CD for OrgPublisher, a software product used to create and publish organization charts from data stored in ISIS HR. At that time, we stated each department would be responsible for purchasing additional licenses as needed. Since then, DOA negotiated with TimeVision to obtain a site license for all of state government. You no longer need to contact TimeVision to purchase additional licenses since you may load the software on as many PCs as necessary at no additional cost.

You may copy the CD provided in April or distribute the software in whatever manner you choose. If your department did not receive one of the copies in April, please contact us at 342-2677, option 1, 3.

DOA does not provide support or training for OrgPublisher. Both are available from TimeVision. Information on free and fee-based training courses is provided at <http://www.timevision.com/support/training/Default.asp?bhcp=1>.

Our license cost is based on the number of positions available to be included in organization charts statewide. With this in mind, please monitor your unfunded positions and ensure that only those necessary remain in ISIS HR.

If you have any questions, please contact the ISIS Help Desk at 342-2677, option 1, 3.
