ISIS Memorandum 05-031

To: Business Objects Users
Subject: Business Objects Server Maintenance

Several changes to Business Objects security were implemented this past weekend. As a result of those changes, all users' passwords have been changed to a temporary password which is the same as their User ID. After logging in using the temporary password, users will be prompted to change the password.

Also this weekend, all User IDs beginning with an "N" were changed to "P" to follow the standard for state employee personnel numbers. For example, user N00349854 will now log in as P00349854.

If you have any questions about this maintenance or the User ID and password changes, please contact the Business Objects help desk at (225) 342-2677, option 2, 5, 3.
