ISIS Memorandum 07-030

To: ISIS Technical Coordinators

Subject: New SAP GUI Patch Level

A new version of updates for SAP GUI is now available to [download](#) and install. This version will update the GUI to Version 6.20, Patch Level 66. This will correct the problem experienced by some agencies when exporting ISIS HR reports to a Word document.

If you have already installed the version released in ISIS Memorandum 07-022 (Version 6.20, Patch Level 64), there is no need to install this version unless a user experiences a problem when exporting to Word.

Please remember that all existing SAP GUI installations must be upgraded by **March 12, 2007**.

Please note that this version is **not** compatible with Vista or Office 2007. We expect to provide a solution which is compatible with those products before the end of this calendar year. If your agency decides to implement Vista before that solution is announced, please contact the ISIS Help Desk. We will assist you at that time by providing information concerning any known problems, workarounds, etc.

If you have questions, please contact the ISIS Help Desk at 225-342-2677.
