ISIS Memorandum 09-004

To: Business Objects Users
ISIS Agency Liaisons
ISIS Training Coordinators
Fiscal Officers
Purchasing & Contract Management Personnel

Subject: Business Objects Enterprise XI Implementation Deadline

Business Objects Enterprise XI (BOXI) is now the standard reporting tool offered by the Division of Administration for ad hoc reporting. Due to the additional work required of our Business Objects users this time of year and concerns over the initial September 1, 2008 deadline, Business Objects 6.5.4 will remain available until **January 5, 2009**. At that time **BO 6.5.4 WebI and ZABO will no longer be accessible**.

Since migration work was completed June 12, 2008, please remember that **changes made to BO 6.5.4 reports after that date will not be reflected in BOXI**. At this time, BO 6.5.4 should only be used for report comparisons and emergencies.

The [Welcome to Business Objects XI](#) web page has been updated with new User Guides, FAQs, and Resource documents to assist you with this transition. BOXI training is being delivered through online training only. Refer to the [Business Objects Learning Resources](#) page for information.

OIS will continue to offer transition workshops for a limited time. These workshops are intended to provide a brief introduction to BOXI navigation, and assist with problems and questions related to report conversions to BOXI. To request assistance, email your contact information to the [OIS Lagniappe Team](#) and you will be contacted.

If you have any questions, please contact the ISIS Business Objects Help Desk at (225) 342-2677, option 4.
