Agency Information Security Committee

Policy:
An Information Security Committee shall be established and will meet as determined by the state’s Chief Information Security Officer, to discuss and make recommendations on information security initiatives and policies as they relate to state government. Agencies shall designate an Information Security Officer (ISO) who will represent the agency on the statewide Information Security Committee.

Scope:
This policy is applicable to all entities under the authority of the Office of Information Technology, pursuant to the provisions of R.S. 39:15.1, et seq. The ideal candidate for this committee will have agency senior-level responsibilities in either information security or network security. However, this policy does not suggest or imply that additional T.O. is required for compliance. Larger agencies may have dedicated ISO’s, and smaller agencies could have ISO’s that also perform other duties. Regardless of size, it is prudent that each agency select someone to perform duties relative to information security.

Responsibilities:
The agency I.T. Director shall submit the name of the ISO designee to the OIT Chief Information Security Officer.

Owner:
OIT Security Office

Effective Date:
July 27, 2009
