## Disasters:

### Declaration Number

FEMA-1792-DR-LA

## Narratives

### Disaster Damage:

Hurricane Gustav caused major wind and flood damage throughout the state, from the southern coastal parishes through central and north Louisiana. Two weeks later Hurricane Ike hit sending tidal surges across the States southern coastal communities. Ike exceeded storm surge caused by hurricanes Rita and Katrina. More than 1.9 million Louisiana residents were forced to evacuate for hurricanes Gustav and Ike. Many of these residents were unable to return to their homes and jobs for a number of days and a large number of residents whose homes remain unlivable continue to need short-term shelter and longer-term transitional housing. The State was forced to evacuate 30,000 critical transportation-need residents, including 10,400 medical evacuations, which is the largest medical evacuation in U.S. history. The State was also left with 1.5 million cubic yards of debris from Hurricane Gustav along federal and state highways. Approximately 150,000 to 300,000 homes experienced some level of damage in the storm; more than 12,000 homes were flooded. Preliminary estimates show that approximately \$2 to 7 billion in residential property loss was incurred. Even homes built to the Federal Emergency Management Agencies Advisory Base Flood Elevations flooded as a result of this storm. The state also estimates more than \$1 billion in public infrastructure damage. The state has spent more than \$400 million in emergency response and immediate recovery activities. Fifty-three of the States 64 parishes were included in the Presidents disaster declaration for individual assistance; all 64 were declared for public assistance. The two storms caused tremendous damage, which, in turn, left most communities without electricity for days, and many for weeks. More than 120,000 homes received some damage.

### Recovery Needs:

A large percentage of the States educational facilities received damage from the storm. Preliminary estimates indicate that there was at least \$100 to \$150 million in damages to the primary (including pre-K) and secondary education facilities. While most of these repairs will be covered through FEMAs public assistance program, certain repairs or necessary rebuilds may be deemed ineligible through FEMAs program. Hurricanes Gustav and Ike impacted many of the States port facilities resulting in large economic losses to the State and exposing the nation to large and significant economic impacts if long term disruptions were to occur from hurricane impacts as much of the Nations oil and gas, commodity and cargo traffic flows through south Louisiana facilities. While oil and gas enter the Nation through facilities in south Louisiana, many more commodities that are vital to the upper Midwest, and north and central Louisiana flow down the Mississippi River and are maintained at specific temperatures at port warehouse facilities along the Mississippi River before becoming exports. These raw products in turn employ thousands of Louisianans and create millions of dollars in economic value.

While the majority of public infrastructure repairs will be covered by FEMA programs, it is known from experience with the 2005 storms that there are certain costs of repair including improvements or rebuilding will be deemed ineligible for FEMA funding. Preliminary cost estimates

for the repair of Federal Highway Administration (FHWA) eligible roads and bridges sustained as a result of Hurricane Gustav total \$127 million. Federal-aid highway damage estimates are about \$119 million. While funding to address these damages is authorized under current law, the backlog associated with these needs may prevent the restoration or threaten the integrity of this critical law, the backlog associated with these needs may prevent the restoration or threaten the integrity of this critical infrastructure. To repair this critical infrastructure, \$119 million would be needed for Louisiana (Gustav - \$53 million; Ike - \$66 million) through the Federal Highway Administrations Emergency Relief program.

Preliminary estimates indicate approximately \$1.7 billion in uninsured housing losses, with over half of that amount likely being homeowners. Hurricanes Katrina and Rita have taught us that repair costs generally outstrip insurance proceeds. Initial damage models based on flood and wind damage vary widely, but have a midpoint between \$3 and 4 billion dollars. Half of this damage may be uninsured losses due to uninsured and underinsured properties.

With losses of housing stock concentrated in certain communities, Louisiana could have up to \$1.5 billion in uncompensated housing losses. Of this, the State will need to design programs in concert with local communities to rebuild and make up this loss. The State will develop the programs in concert with local communities to rebuild and make up this loss.

Based of the 2007 Summary of Agriculture and Natural Resources by the LSU Agriculture Center and NMFS Revenue Data, the seafood industries experienced nearly \$250 million in revenue loss as a result of the two storms. Even prior to hurricanes Gustav and Ike, Louisianas fisheries were struggling to recover from more than \$528 million in losses resulting from hurricanes Katrina and Rita in 2005. Hurricanes Gustav and Ike moved across the central Gulf of Mexico through some of the Nations most valuable and productive fishing grounds at the start of the States most valuable shrimp season.

## Overall Progress Narrative:

In Quarter 2, both state and parish run programs and projects for The Office of Community Development/Disaster Recovery Unit (OCD/DRU) continue to increase spending rates as projects get fully underway. Deadlines for submission of draw requests, plans and specs, environmental reviews and close out packets have continued to improve the expenditure rate and move projects closer to completion. Technical assistance to the grantees continues to be a focus for the outreach team and the project analysts. The efforts of the department to move projects along resulted in total expenditures surpassing the 55% mark and parish expenditures reaching nearly 60%.

### State Programs

Over \$20 million was expended in the state-run programs this quarter. State-run programs continue to expend funds at a steady rate. A number of programs exceeded \$1 million in expenditures this quarter, including the \$50 million Affordable Rental Housing Program, the \$14.5 million Public Housing Program, the \$24 million Parish Affordable Rental Program, the \$35 million Municipalities Infrastructure Program (MIP), the \$80 million Economic Development Growth and Infrastructure Program, the \$7.9 million Sustainable Coastal Communities Program and the \$53.6 million Economic Revitalization Program.

Several other programs have maintained a steady level of activity and spending, including the \$25 million Piggyback Program, the \$10 million Innovation Loan and Grant Program and the \$13.3 million Comprehensive Resiliency Pilot Program.

State program managers continue to steadily increase the number of projects being moved into the close out phase. As projects and programs are closed out, management will continue to assess needs and reallocate remaining funds to existing programs or new initiatives.

### Parish, Municipal and Non-Profit Assistance

With parish amendments resulting in alternate projects being moved up to priority status due to under-expenditures or acquiring other funding sources, there are now 406 active parish infrastructure projects, with 401 or 99% having been approved, representing \$590,733,108 with \$249,901,748 expended. Applications which are yet to be approved have either been submitted and under review or the grantees recently submitted proposal amendments creating new projects with unexpended funds or are working through confirmation of HMGP & DOTD funding as well as putting sub-recipient agreements in place between all parties before submitting the application.

OCD-DRU continues to focus on receiving outstanding environmental reports and plans & specifications based on extensions requested as well as close-out reports. Of forty-eight ERR's that were still outstanding in the first quarter, primarily due to the nature of the projects — i.e. drainage, sewerage, road elevation, levee improvements and bridge repair, 37 are still outstanding. Of an original count of 140 plans & specifications due, only 33 remain outstanding. These plans and specifications, for the most part, cannot be completed until all permits, especially from the U.S. Corps of Engineers, have been received. Several projects must also complete some form of mitigation before the permit(s) will be issued. In addition, the projects cut across privately owned land requiring the grantees to negotiate right-of-way permits that may involve contacting many family members for each parcel involved. For those requiring extensions beyond the end of the first quarter 2014, monthly status reports to OCD-DRU are required.

With OCD-DRU focusing on close-out reports, particular those with projects that have been complete over 120 days, grantees are submitting accordingly. A webinar jointly hosted by OCD-DRU and the Louisiana Municipal Association, was held June 12 with 236 participants and all grantees represented. The session was conducted by the OCD-DRU Monitoring and Compliance Unit with an extensive question and answer session. The webinar will remain posted on LMA's website for reference. Close-out reports are now regularly being submitted. Particular emphasis has been on projects that have been complete for over 120 days. Several parishes with more than one close-out to submit have submitted one as a sample so that the others could be submitted with certainty of meeting all requirements. Of eighty-seven that were originally considered due, less than twenty are outstanding.

OCD-DRU continues to monitor submittal of invoices to ensure requests for payments are current and consistent with the implementation status of the project. An E-Blast sent out in May 2014 provided instruction on submitting all invoices due by June 11 to facilitate payment and close-out during the state's FY 13 fiscal year.

“Pre-monitoring visits have been added to OCD-DRU outreach efforts as a formal initiative to reduce concerns, findings and potential liabilities at the local level. These visits will mirror what will take place during a formal monitoring trip conducted by OCD-DRU’s Monitoring and Compliance team. In a March 2014 E-Blast to all grantees, fourteen non-compliance issues were listed in the areas of record management, procurement and finance as being consistently noted during formal monitoring visits conducted over the past 18 months..

To offset these findings of non-compliance, the Outreach Team will now formally conduct systematized pre-monitoring visits that will result in a written report for distribution within OCD-DRU and to the grantee. Pre-Monitoring team members will include the grantee’s Outreach Representative, a member of the management team from the Monitoring and Compliance department and/or the program analyst or manager.

The monitoring checklists in the Gustav/Ike CDBG Administrative Manual, Section 12 under Exhibits, will be used as the basis of discussion for the pre-monitoring visit. However, a records review of project(s) and core (general administrative files) documents will also be conducted. While on site, the team will actually assist the grantee in correcting the files to conform to CDBG requirements and the monitoring check list, as well as identify documentation that will be needed. The team will also make note of follow-up actions the grantee will need to take in order to be in compliance, so that the grantee can make those corrections prior to the formal monitoring trip. Over twenty parishes or projects have been identified for either pre-monitoring or technical assistance visits which will occur during the third quarter.

## Project Summary

**Activity Description:**

The National Incident Management Systems and Advanced Technologies (NIMSAT) Institute at the University of Louisiana at Lafayette seeks to develop a web-based information sharing platform that facilitates collaboration and coordination between the public and private sector during emergencies, and within the private sector between big businesses and small businesses to facilitate emergency management mentorship for small businesses to improve their overall disaster resilience.

**Location Description:**

Statewide

**Activity Progress Narrative:**

Through March and April, outreach efforts promoting the public-private partnership information sharing platforms from the NIMSAT Institute to improve emergency business continuity in parishes affected by Gustav and Ike continued with the collaboration of several organizations and agencies. Activation of the LA BEOC for a state exercise demonstrated its value to emergency managers and a subsequent FEMA exercise brought in NIMSAT personnel to brief our federal partners on strategies that have been successful with efforts to engage the private sector as well as challenges. Seven businesses registered on the portal, two mentorships were identified and two more companies verbally expressed their interest to assist this initiative as mentors.

**Activity Description:**

The Village of Reeves intends to use its Police Station as an emergency personnel housing and staging point in the case of an emergency. The Police Station currently contains amenities, such as an ice machine, water heater, and refrigerator/freezer that require emergency power. The Police Station will receive a 40 kW natural gas generator sized specifically to run all necessary appliances and ancillary loads to keep the emergency personnel comfortable and nourished so that they can effectively perform their jobs.

**Location Description:**

18284 Hwy.190, Reeves, LA, 70658

**Activity Progress Narrative:**

Consulting services for the period of September 1, 2013 through February 23, 2014 consisting of preparing the application, ERR, and preparing new authorized signature form. This also includes engineering services for professional services rendered through February 21, 2014 including Basic Services: Design (100% complete).

**Activity Description:**

The Waterworks Improvement project, intended to increase water system storage capacity, has two phases: installation of additional million gallon tank, and installation of a new MGD filter systems including underdrains, media and controls as well as the removal and replacement of interior block, media and controls, and interior valves and piping.

Phase One is the purchase and installation of a second groundwater storage tank, to be located adjacent to the Waterworks plant with the capacity to hold an additional one million gallons for a total of 3 MGD; the current storage capacity is 2 MGD. The additional tank will give the parish an ample supply of water, capable of sustaining the entire populace and area industries in the event of any future weather events that affect the potability of water from Bayou Lafourche. These improvements will improve the health and welfare of the community while supporting community resiliency by assuring that clean water is always available.

Phase Two includes the installation of a new clarifier system on the old storage tank to increase its filtering water capacity to 7 MGD, as part of the influent system. Due to the age of the filter systems, some of its capacity to treat the influent efficiently has declined. Currently the system treats 5.5 to 6 million gallons per day. The replacement of the filters will increase the capacity back to 7 million gallons per day as was the original design.

**Location Description:**

Assumption Parish, LA

**Activity Description:**

During Hurricane Gustav, Assumption Parish’s community sewage systems were inoperable as a result of the downed power lines, and subsequent loss of electric service. As a result many community systems experienced an overflow of backed up sewage.

Additionally, the residents of the Peterville and Tyler Lane neighborhood are currently experiencing public health issues related to the improper treatment of wastewater. The Peterville area is in violation of State Public Health Codes as a result of raw sewage emptying into open ditches.

The inadequate disbursement and flow of individual septic systems has resulted in raw sewage flowing into residences and infiltrating local drainage outlets, exasperating an on-going public nuisance. The proposed project includes the emptying of all existing private septic tanks, backfilling and complete abandonment of individual septic systems as homes are tied into a community package plant. Improvements will include an installation of 3,800 linear feet of 8 inch gravity sewer lines, 12 pre-cast manholes, one lift station with pump, and one 30,000 GPD package extended aeration treatment plant. Houses will be connected to the proposed sewer main by 2,000 linear feet of 4 inch service laterals as required.

**Location Description:**

Peterville, Assumption Parish, LA

**Activity Progress Narrative:**

Act of sale for the location of the Sewer Plant on Peterville Rd. Project will be going to bid now that the property has been

procured and finalized.

**Activity Description:**

The parish is allocating CDBG-DR funding to construct a new public community center that will provide greater opportunity for the general public, particularly those with low to moderate incomes, to participate in civic activities and community events. The Gustav/Ike disaster highlighted the need for such a facility. During the Hurricane this isolated community was cut off from rescue attempts, as most of the essential personnel were hunkered down in Napoleonville. Following the storm there was no central location to distribute food or water. With electrical service out of commission, there was no ability to conduct a needs assessment for the residents who remained in their homes. In addition, without electricity to run emergency generators, Parish and community officials were unable to provide limited basic services to the residents needing recovery assistance. When essential personnel were able to initiate recovery efforts with the residents, there was no facility of adequate size to host assistance programs, or to distribute food, water, ice and medicine. Without a centralized, gathering location available to host informational public meetings, this hindered the Parish’s ability to communicate recovery operations and directives. Bayou L’Ourse is the most remote and isolated portion of Assumption Parish, surrounded by water, swamps and sugar cane fields. This small community drew survivors seeking assistance and information from other isolated parishes, which were equally cut off from larger population centers, As is the nature of rural communities with extended families, the Bayou L’Ourse community was willing to offer its support to other Louisianans needing help.

This is an urgent need project in accordance with criteria for national CDBG objectives in Section 570.483 of Title 24, regarding area benefit activities that are designed to meet community development needs having a particular urgency: the activity is designed to alleviate conditions that pose a serious and immediate threat to the health or welfare of the community, that are of recent origin or recently became urgent; and the unit of local government is unable to finance this activity on its own. The number of beneficiaries is 2,788, the average number of persons per household is 2.73, and the LMI ratio is 38.2%.

The proposed project will enhance and support the parish’s recovery, resiliency and revitalization goals by improving the

existing recovery efforts. Assumption Parish officials embrace the goal of recovery from the immediate effects of a major storm by returning to normal operations as soon as possible, and thereby, having in place the resources and infrastructure to facilitate the residents' return home. In turn, residents are able to direct their own efforts and energy to returning home and resuming their daily lives confident in knowing that their homes, community and jobs are intact. The overall goal is to minimize the adverse effects of a natural disaster while enabling residents and businesses to return home and resume their activities with little downtime. Since the parish currently lacks the adequate facilities to provide cultural and recreational programs for the public, the community center provides a central location for educational, governmental and cultural activities supporting the sustainable components necessary for a healthy community.

**Activity Description:**

Generators will be installed at the Parish School Board headquarters, and at 5 Fire Districts, to support emergency recovery and resiliency efforts.

The Critical Infrastructure generator project will not only improve the existing recovery efforts, but it will put the Parish in a much better position in advance of future major storms. The project will enhance and support the Parish's recovery, resiliency and revitalization goals by upgrading its public facilities, improving the health of the neighborhoods and the quality of life for its residents, and advancing economic development. These generators will support and enhance the critical needs of the Fire Departments and Assumption Parish School Board by expediting their emergency services operations and school board operations to resume operations immediately after major disaster events. As a result, the parish's economy can rebound quickly, without an interruption of productivity. Another added benefit is that parish resources will be used to address immediate impacts to specific areas without having to address the public safety and school board operations. The target area will become cleaner and healthier to current and future residents ensuring neighborhood stability.

**Location Description:**

4801 Hwy 308 (various locations) Napoleonville, LA 70390

**Activity Description:**

This project consists of drainage improvements to Turner Canal, beginning at its intersection with La. Hwy. 115, thence extending a distance of approximately 2.8 miles in a southerly direction. The project also includes drainage improvements to an un-named tributary of Turner Canal, beginning at its intersection with Turner Canal, thence extending a distance of approximately 2,600' in an easterly direction to the corporate limits of the City of Bunkie. This project will increase the hydraulic capacity of the Canal. The probability of flooding in the area will be significantly reduced.

**Location Description:**

Bunkie, La. - Avoyelles Parish

**Activity Description:**

The Public Works department also took temporary measures such as taping the windows, using plywood and plastic coverings to aide in prevention of damage to the facility during Hurricane Ike. The water plant received minor wind damage from the storm. However, because the damage was minor, the insurance deductible was not met and the necessary repairs were made by Town crews. Although the damage was minor, the Town realized that hardening the facility would provide better protection of the water plant during future storm events. If the plant is rendered inoperable due to a storm, the residents of Vinton would be without a source of potable water. The construction of a new equipment shed at the water plant will provide protection to the water pump. The new galvanized steel framed shed will accommodate eight trucks/tractors providing protection from the wind and rain produced by future storms.

**Description of Construction Involved:**

Construction involves the installation of 8 mil thick tinted, polyester window film that will resist winds and heat loads on the larger windows at the Town Hall and at the west front entry of the Police Station. The existing glass will be removed; film adhered and then reinstalled in the existing aluminum frames.

Improvements at the water plant will include an upgrade to the building with partial replacement of the existing wood frame, replacement of exterior metal siding with new prefinished metal siding, new gutters and downspouts, removal of exterior metal louvers, replacement of all windows and doors with aluminum storm resistant windows and galvanized hollow metal doors and frames, pour concrete topping over the existing concrete slab for leveling purposes, replacement of existing wood cabinets with plastic clad cabinets, provide cement board interior wall finish, and open exposed framing in attic to be partially replaced to facilitate structural requirements. The roofing will be removed and then reused.

**Activity Description:**

The roads within the Parish proposed for improvements are in a deteriorated state and have been identified to be improved as either rehabilitation (patch and overlay) or new construction (road base construction and overlay). Parish roads that have been identified as rehabilitation are roads that have deteriorated riding qualities where cracking and previous patch jobs have degraded the pavement enough for traffic to substantiate reducing speeds. Certain areas of these roads require high levels of maintenance. These roads are proposed to have selected areas of patching and/or leveling and complete overlay.

**Location Description:**

Various Parish Roads, Cameron Parish, LA

**Activity Progress Narrative:**

Phase II Road Improvements - Full application dated 9/12/2012; Application approved 9/19/2012; ERR Exemption Certificate dated 9/24/2012; ERR approved/Release of Funds 12/21/12; Lonnie G. Harper & Associates procured as engineer, plans and specifications approved 2/26/2013; bids received 4/5/2013; construction is 95% complete. \$605,537.82 expended in quarter. Difference of \$129.00 is correction of data entry error from Q1 2013.

**Activity Description:**

Fifty-seven (57) bridges in East Baton Rouge Parish are currently rated four (out of 9) or below, a marginally poor to critical condition warranting major rehabilitation to replacement, or closure. Nineteen (19) of these fifty-seven are load rated to 15 tons or below for safety reasons and are not considered adequate for heavy trucks, traffic associated with heavy vehicles utilized by first responders (fire trucks, debris movers&hellip), garbage trucks, or school buses. These bridges are mostly structurally supported by timber. Woodland Ridge at Jones Creek, Cayhanga Parkway at Jones Creek, Claycut Road at Ward Creek, Port Hudson-Pride Road at Little Sandy Creek and Mollylea at Jones Creek are some of the aforementioned bridges. These bridges are considered structurally inadequate to withstand the forces associated with surge waters and riverine flooding from storms such as hurricanes. The possibility of a failure occurring on one or more of these bridges during a future storm event such as a hurricane, would create an unnecessary and dangerous burden on those trying to evacuate or service the area. New bridges will be all concrete and surge resistant and structurally superior to what exist today with new approaches to handle any type of vehicle that may be subject to crossing during an evacuation or emergency situation.

It was also noticed bridges with a timber substructure pile configuration tended to "hang-up" more debris increasing the likelihood of upstream flooding. These bridges have notable hydraulic grade jumps (increase in flood water surface elevation) at the upstream side caused by constrictions in the stream channel at the bridge locations. During intense rainfall events associated with hurricanes, upstream flooding is a real potential threat in these immediate watersheds. Hydraulic capacity of each of these bridges is considered to be inadequate. The bridges are not adequately sized to handle the large amounts of water associated with stream flooding and extreme rainfall. The accumulation of excess water at these undersized structures, immediately after Hurricane Gustav, caused water to back up resulting in significant flooding upstream and downstream of the bridges and along the roadside ditches. The installation of an adequately sized bridge would prevent this problem from occurring in the event of future floods or hurricanes.

For these structures, it will be necessary to conduct a complete topographic survey, create a comprehensive design study, and prepare plans and specifications to construct a new and functional bridge. These proposed bridge improvements will not only increase the load capacity and safety of each bridge but will also aid the parish in the economic recovery of Hurricane Gustav. Increasing the bridge spans will increase their hydraulic capacity and reduce the upstream impoundment of storm water by allowing it to flow more freely and recede at a much quicker rate during future events of storm and riverine flooding.

**Location Description:**

9647 Cuyhanga Parkway, Baton Rouge, LA 70815

**Activity Progress Narrative:**

This is for the Port Hudson Pride Road Bridge. This project is ongoing and the consist of Preliminary Plans and Wetland Permitting. Also for Engineering Services for the Mollylea Drive Bridge under the Urgent Needs group.

**Activity Description:**

Fifty-seven (57) bridges in East Baton Rouge Parish are currently rated four (out of 9) or below, a marginally poor to critical condition warranting major rehabilitation to replacement, or closure. Nineteen (19) of these fifty-seven are load rated to 15 tons or below for safety reasons and are not considered adequate for heavy trucks, traffic associated with heavy vehicles utilized by first responders (fire trucks, debris movers&hellip), garbage trucks, or school buses. These bridges are mostly structurally supported by timber. Claycut at Dawson Creek, Greenwell Street at Roberts Canal and Milldale at Beaver Bayou are some of the aforementioned bridges. These bridges are considered structurally inadequate to withstand the forces associated with surge waters and riverine flooding from storms such as hurricanes. The possibility of a failure occurring on one or more of these bridges during a future storm event such as a hurricane, would create an unnecessary and dangerous burden on those trying to evacuate or service the area. New bridges will be all concrete and surge resistant and structurally superior to what exist today with new approaches to handle any type of vehicle that may be subject to crossing during an evacuation or emergency situation.

It was also noticed bridges with a timber substructure pile configuration tended to "hang-up" more debris increasing the likelihood of upstream flooding. These bridges have notable hydraulic grade jumps (increase in flood water surface elevation) at the upstream side caused by constrictions in the stream channel at the bridge locations. During intense rainfall events associated with hurricanes, upstream flooding is a real potential threat in these immediate watersheds. Hydraulic capacity of each of these bridges is considered to be inadequate. The bridges are not adequately sized to handle the large amounts of water associated with stream flooding and extreme rainfall. The accumulation of excess water at these undersized structures, immediately after Hurricane Gustav, caused water to back up resulting in significant flooding upstream and downstream of the bridges and along the roadside ditches. The installation of an adequately sized bridge would prevent this problem from occurring in the event of future floods or hurricanes. Majority of the areas drained through the channels that pass beneath these bridges are low to moderate income areas (LMI).

For these structures, it will be necessary to conduct a complete topographic survey, create a comprehensive design study, and prepare plans and specifications to construct a new and functional bridge. These proposed bridge improvements will not only increase the load capacity and safety of each bridge but will also aid the parish in the economic recovery of Hurricane Gustav. Increasing the bridge spans will increase their hydraulic capacity and reduce the upstream impoundment of storm water by allowing it to flow more freely and recede at a much quicker rate during future events of storm and riverine flooding.

The target structures for this project, shown in the attached Project Map, include the geographical areas of these bridges. No acquisitions are expected to be required for these projects. All improvements will be completely within the existing right-of-ways of East Baton Rouge Parish; however temporary construction servitude may be required. East Baton Rouge Parish will retain ownership of the replaced bridges and approach spans and be responsible for the future inspection and maintenance of the proposed replacements. The replacement of this bridge is expected to reduce the cost of maintenance; therefore, no additional funds will be necessary for maintenance following these improvements.

### Location Description:

8232 Greenwell Street, Baton Rouge, LA 70812

### Activity Progress Narrative:

Engineering services for the Greenwell Street Bridge. Also for Engineerings Services on the Claycut Bridge under the LMI Group 3 category. This project is ongoing and consist of design and topographic surveys.

**Activity Description:**

The East Baton Rouge Parish Small Business Recovery Loan Program is being created to provide disaster recovery and assistance to small businesses and to catalyze economic development in neighborhoods directly impacted by Hurricane Gustav. The assistance may be in the form of loans for working capital, capital improvements, and equipment financing, and the provision of pre-financing and post-financing technical assistance to applicants. The program is designed to provide assistance to small businesses that are currently located in or will open in an area suffering from the long-term effects of hurricane Gustav and will consider requests for financial assistance from business owners that were either directly impacted by Hurricane Gustav or that established businesses post-Hurricane Gustav in designated recovery districts. Included in priority loans would be business owners who believe their businesses can be reopened or expanded and have been unable to secure financing from conventional sources.

**Location Description:**

Across East Baton Rouge Parish, LA

**Activity Progress Narrative:**

The Small Business Recovery Loan program continues to provide technical assistance and take applications for loans from small businesses affected by hurricane Gustav. Eleven loans closed with the technical assistance provided by LSBDC. The LSBDC has assisted a total of 52 businesses while creating 5 permanent jobs in this quarter. Trufund currently has approximately 11 loan inquiries totaling over 1.4 million in requested loans.

**Activity Description:**

The proposed Urgent Need Generator Project consists of the installation of natural gas powered generators at several locations throughout Evangeline Parish.

Location #1- Pine Prairie Lift Station- permanently installed 60 kW generator at the only sewer lift station located at 305 Holly Street in Pine Prairie to provide backup power in order to pump sewage into the holding pond where it can stay until power is restored. The target area for this project is made up of 866 persons, of which, 434 or 50.1% are of low to moderate income.

Location #2- Turkey Creek Well #1- Permanently installed 60 kW generator at the largest well on the Turkey Creek water system located at 7482 Hwy. 167 North in Turkey Creek to allow water to continue flowing through the system following a power outage. The target area for this project is made up of 354 persons, of which, 151 or 42.7% are of low to moderate income.

Location #3- Ward 1 Industrial park Water Well- Permanently installed 30 kW generator to allow water to continue flowing at the largest well on the system in the Parish Industrial Park located at 1074 ½ Industrial Road in Ville Platte. The target area for this project is made up of the seven (7) industries located within the Industrial Park and the employees who work at these industries.

**Location Description:**

Throughout Evangeline, LA

**Activity Progress Narrative:**

In QPR due to data correction to the activity within the DRGR Action Plan. No expenditures during the quarter.

**Activity Description:**

The Crooked Creek Pavilion project will include the construction of a building approximately 2,000 sq.ft. adjacent to the existing pavilion at the Crooked Creek Recreational Facility, as well as, make improvements to the existing pavilion to harden and stabilize the structure that was weakened by the excessive winds from Hurricane Gustav. The project will involve adding amenities such as handicap accessible restrooms and meeting area. The objective of the project is to improve the pavilion at the Crooked Creek Recreational Facility in order to be used year-round for regional group meetings and as a staging area during disasters.

**Activity Description:**

Create housing program in Iberville Parish (Unincorporate), LA to assist low/mod residents with house assistance, varying from simple home repairs, homeowner rehabilitation, and possibly replacement housing. The assistance will have the objective to return individuals to decent, safe and sanitary conditions.

Iberville Parish is the third most impacted parish in the state, enduring considerable flooding to homes. Pending details on the specific applicants and uses of the program funds, OCD-DRU has estimated the percentage that will be spent on mitigation activities. OCD-DRU utilized data from Katrina and Rita and assumed that the ratio of mitigation activities to total costs would be similar. To date LA has expended over \$8.5 billion for the Road Home program; additionally \$850 million dedicated to mitigation activities (\$750 through HMGP and \$100M through CDBG) for a total of approximately \$9.4 billion. The dollars that have (or will) go towards mitigation activities include the aforementioned \$850 million plus \$879 million that have gone to Road Home elevations plus \$880 million that have gone towards relocating Road Home applicants (this does NOT include the cost of demolition and transference of those properties to local governments) for a total of \$2.6 billion. This amounts to a total of 28% of the total homeowner program costs that have or will go towards mitigation activities. To be conservative, OCD-DRU rounded to 25% for Gustav/Ike programs.

**Location Description:**

Iberville Parish (Unincorporated), LA

**Activity Progress Narrative:**

Funds expended during the 2nd quarter of 2014 were for project delivery costs and direct costs.

**Activity Description:**

Create housing program in White Castle, Iberville Parish, LA to assist low/mod residents with house assistance, varying from simple home repairs, homeowner rehabilitation, and possibly replacement housing. The assistance will have the objective to return individuals to decent, safe and sanitary conditions.

At this time we do not have detailed information on the parish housing programs, so to estimate the percentage that will be spent on mitigation activities we utilized data from Katrina and Rita and assumed that the ratio of mitigation activities to total costs would be similar. To date we have expended over \$8.512 billion for the Road Home program; additionally we will spend an additional \$850 million on mitigation activities (\$750 through HMGP and \$100M through CDBG) for a total of approximately \$9.362 billion. The dollars that have (or will) go towards mitigation activities include the aforementioned \$850 million plus \$879 million that have gone to Road Home elevations plus \$880 million that have gone towards relocating Road Home applicants (this does NOT include the cost of demolition and transference of those properties to local governments) for a total of \$2.609 billion. This amounts to a total of 28% of the total homeowner program costs that have or will go towards mitigation activities. We rounded 28% down to an even 25% just to be conservative.

**Location Description:**

White Castle, Iberville Parish, LA

**Activity Progress Narrative:**

Funds expended during the 2nd quarter of 2014 were for project delivery costs and direct costs.

**Activity Description:**

Create housing program in Maringuion, Iberville Parish, LA to assist low/mod residents with house assistance, varying from simple home repairs, homeowner rehabilitation, and possibly replacement housing. The assistance will have the objective to return individuals to decent, safe and sanitary conditions.

'Pending details on the specific applicants and uses of the program funds, OCD-DRU has estimated the percentage that will be spent on mitigation activities. OCD-DRU utilized data from Katrina and Rita and assumed that the ratio of mitigation activities to total costs would be similar. To date LA has expended over \$8.5 billion for the Road Home program; additionally \$850 million dedicated to mitigation activities (\$750 through HMGP and \$100M through CDBG) for a total of approximately \$9.4 billion. The dollars that have (or will) go towards mitigation activities include the aforementioned \$850 million plus \$879 million that have gone to Road Home elevations plus \$880 million that have gone towards relocating Road Home applicants (this does NOT include the cost of demolition and transference of those properties to local governments) for a total of \$2.6 billion. This amounts to a total of 28% of the total homeowner program costs that have or will go towards mitigation activities. To be conservative, OCD-DRU rounded to 25% for Gustav/Ike programs.

**Location Description:**

Maringouin, Iberville Parish, LA

**Activity Progress Narrative:**

Funds expended during the 2nd quarter of 2014 were for project direct costs.

**Activity Description:**

During Hurricanes Gustav and Ike, the Sunshine WWTP became nonoperational, however the plant continued to receive wastewater from those drainage basins that still had electrical service for pump stations or had direct gravity flow connection to the treatment plant. As flow reached the plant on the front end, it continued to be routed through the treatment plant, although much of the equipment was inoperative and still discharged out the backend of the plant into Bayou Paul. The effluent was being discharged into the coulee that was at that time suffering from backwater flooding. The circumstances of continued discharge of sewage combined with backwater flooding resulted in sewage effluent being spread over the flooded topography. The situation did not improve until the swamps drained down thereby allowing Bayou Paul to also drain. The construction of a new pump station and force main to discharge directly into the Mississippi River will provide a solution to the unsanitary situation that existed when flooding of the Bayou Paul basin occurs, by rerouting sewage effluent to the Mississippi River.

**Location Description:**

**Activity Description:**

Nature of this Project:

The purpose of this project is to provide standby emergency power for critical services in the Town of White Castle. The critical services covered here will be a Fire Station, Police Station, and a Community Center for the Town.

Description of Problem:

During time of inclement weather conditions, the Town of White Castle loses power throughout the Town. When this happens, the residents of the Town may require more services such as shelter and rescue as normal. This normally happens when hurricanes, tornadoes, or severe thunderstorms hit the area causing downed power lines and loss of power. Because the Town is limited in generator capacity, keeping critical services up during power outages allows for better resource management.

**Location Description:**

White Castle, Iberville Parish, LA

**Activity Progress Narrative:**

This is for Forte & Tablada, Chustz Electric, LLC, and Pan American Engineers for project delivery services. Construction in progress.

**Activity Description:**

The scope of this project consists of purchasing and installing one (1) 60kW natural gas generator and one (1) 150kW natural gas generator. Each generator will have its own automatic transfer switch to start the generator in the event of a power outage.

The water tower will require a 60kW generator. Currently there are three separate loads at this location. There are (1) Water Tower, (2) Fire Department, and (3) Maintenance Building. Each of these three loads has its own separate meter. This project would combine all three loads and reduce the meter count to one. This will allow the Town a cost savings in monthly fees. The project will see a cost savings due to the reduction of three separate automatic transfer switches for this one site to just one. This generator will service all three loads (1) Water Tower, (2) Fire Department, and the (3) Maintenance Building.

The second generator will be 150kW and will provide service to the Sewer Treatment Facility. This facility is currently fed from one main point of normal power.

All sites will require concrete slabs for generators and stands for the automatic transfer switches and any distribution panels.

**Location Description:**

Maringouin, Iberville Parish, LA

**Activity Progress Narrative:**

This is for Central Electric of Monroe, West Monroe, La., Inc, Forte and Tablada, and Pan American for project delivery

services. Construction complete.

**Activity Description:**

**Nature of Project:**

The purpose of this project is to provide standby emergency power for critical services in the Village of Grosse Tete. The critical services covered here will be one critical sewer lift station for the Town and the Town Hall.

**Description of Problem:**

During time of inclement weather conditions, the Village of Grosse Tete loses power throughout the Town. When this happens, the residents of the Town are unable to dispose of human waste after an extended period of time. They are also unable to have potable water. This normally happens when hurricanes, tornadoes, or severe thunderstorms hit the area causing downed power lines and loss of power. Because the Town is limited in generator capacity, keeping critical services up during power outages is difficult, causing the local sewer system to get backed up.

**Location Description:**

Grosse Tete - Iberville Parish, LA

**Activity Progress Narrative:**

In QPR due to data correction to the activity within the DRGR Action Plan. No expenditures during the quarter.

**Activity Description:**

The scope of the project proposed at the existing White Castle Community Center will involve the addition of a new Porte-Cochère (covered vehicle drop-off) and vestibule. The exterior of the existing will also be refurbished. Exterior lighting will be replaced where necessary, and new lighting will be added as required. Existing doors and windows will be replaced as needed. Paving at the existing building will be replaced as part of the scope of this project. The flooring in the existing building will be replaced. Gymnasium seating will be replaced. Existing restrooms will be refurbished, and new restrooms with showers will be added. A new kitchen will be installed. A new mechanical system will be installed. Electrical and lighting systems will be replaced as needed. New electrical and lighting systems will be provided in areas requiring such service.

**Location Description:**

White Castle, Iberville Parish, LA

**Activity Progress Narrative:**

This is for Charles Carter Construction Co., Inc. and Pan American Engineers. Construction in progress.

**Activity Description:**

This Church Street Drainage Canal is an existing open channel, earthen, storm water drainage waterway located in the southwest region of the Town of Maringouin. The channel drains approximately two (2) square miles within the southwest region of the Town of Maringouin and in a portion of Iberville Parish outside the Town's corporate limits. The drainage area includes approximately sixty (60) residential structures and two (2) commercial buildings. The canal discharges directly into the Maringouin Bayou which ultimately drains to the Atchafalaya Basin Floodway.

During Hurricane Gustav (2008) and Hurricane Ike (2008), backwater from Bayou Maringouin inundated the Church Street Canal causing the drainage canal to overflow its banks. The large water surge in the canal caused saturation and weakening of the earthen slope bank resulting in erosion and in some locations complete collapse of the channel's bank. Fallen trees and bushes along the channel bank weakened by the erosion and other debris in canal as a result of runoff from nearby neighborhoods restricted the flow in the Church Street Drainage Canal. The result being up to 2 (two) feet of standing water in the neighboring residential areas during these rain events. Even after the Maringouin Bayou subsided, the water level in the Church Street Drainage Canal remained high. Residents in the area were forced to wait up to three (3) days for the water level in the streets to recede.

The proposed improvement to the canal involves clearing and excavating (shaping) the channel and lining with articulated precast concrete block mats to stabilize the bank and prevent further erosion. Lining the channel with the concrete mats will increase the overall flow capacity of the waterway as well as reduce the frequency of maintenance for Town of Maringouin personnel. The lining of the canal will minimize flooding in the area similar to what occurred during Hurricane Gustav and Hurricane Ike in 2008.

**Location Description:**

Maringouin, Iberville Parish, LA

Lafourche Parish Council	\$33,630.55	\$61,130.55
<b>Match Contributed</b>	\$0.00	\$0.00

**Activity Description:**

The Lafourche Parish Government, in collaboration with the Town of Golden Meadow, is requesting \$580,000.00 in CDBG Disaster Recovery funding to cover the design and construction costs to expand emergency vehicle parking and enhance municipal emergency operations at the Golden Meadow Multi-Purpose Town Hall and Community Center. The proposed project will consist of:

Construction of an expanded concrete parking area with emergency outdoor lighting for mobilizing multi-agency and first responder vehicles, and

Construction of an approximately 50' x 80' s. f. building to consolidate on-site storage of emergency operating equipment and disaster recovery supplies including operating equipment, portable pumps, generators, and sand bags.

Prior to Hurricanes Gustav and Ike, the Town of Golden Meadow operated its municipal services from a single 1,200 s. f. building, which was damaged during the storms resulting in a failure to function by local officials to immediately mobilize emergency response operations within the community. In November 2010, a new 6,000 S.F. Town Hall including an "Emergency Operations Center" was completed utilizing \$1.8 million in grant and loan assistance from the U. S. Department of Agriculture. The newly constructed Multi-Purpose Center and Town Hall houses most of the city's offices and serves as a critical link for emergency coordination and communication between the Town of Golden Meadow and both parish and state Offices of Emergency Preparedness and Homeland Security during emergency disaster declarations.

>The Multi-Purpose Center currently lacks a concrete parking area capable of accommodating parking for emergency vehicles as well as a centralized facility where emergency operating equipment and supplies can be safely stored in preparation and response to future disaster events.

The design and construction of the improvements will be built in conformity with the Louisiana Uniform Construction Codes,

ADA handicapped accessibility, and local ordinances and building codes. Upon completion of the project, the improvements will be owned and operated by the Town of Golden Meadow.

**Location Description:**

**Activity Description:**

The project/activity is to construct a communications tower for Livingston Parish that will include Parish operations, the sheriff, 12 fire parish operations, 7 municipal governments, 911 and room for the Governor's Office of Homeland Security. Lower tower space between 200 and 350 feet would be available to lease to private interests, such as cell phone companies. The proposed communications tower is expected to be at elevation of 800 feet to 1,000 feet depending on the design and specified area of coverage. It will be constructed on land already owned by the parish adjacent to the sheriff's training facility.

**Location Description:**

Livingston Parish, Louisiana

**Activity Progress Narrative:**

This is for project delivery costs including general tasks, A/E selection and application; environmental review records; and procurement.

**Activity Description:**

To construct and upgrade the parish-wide communication system. The current 800MHz system will provide for the addition of two repeaters, one in the north, in Innis, Louisiana and one in Livonia, Louisiana. The repeaters would be placed in the suitable locations and mounted on one preexisting tower and one newly constructed tower. The addition of these two repeaters will provide the coverage and redundancy needed to ensure effective operations of vital infrastructure.

The project will provide the parish with upgraded consoles at the Pointe Coupee Parish Sheriff’s office (PCPSO) allowing them to also operate on the 700MHz system installed by the Louisiana State Police. The improvements will also include upgrades to current software and hardware allowing the PCPSO to provide dispatch capabilities on both the 700 MHz and 800 MHz systems. The two frequencies and multiple tower repeaters will provide the Parish with increase capabilities to maintain radio communications during a catastrophic event.

**Location Description:**

Across Pointe Coupee Parish, LA

**Activity Progress Narrative:**

Activities for Project Delivery Services completed through the Implementation Phase (100%) and Closeout Phase (25%).

**Activity Description:**

This project will include the installation of a secondary electrical power source for the William H. Scott Memorial Civic Center located in the City of New Roads and the Innis Community Health Center located in Innis. These facilities play a vital part in Pointe Coupee Parish during emergencies and natural disasters such as occurred with Hurricanes Gustav and Ike in September 2008.

**Location Description:**

New Roads and Innis, Pointe Coupee Parish, LA

**Activity Progress Narrative:**

Project Delivery Services rendered for the Closeout Phase (100%) of the Pointe Coupee Parish Generators for Innis Health Facility and New Roads Scott Civic Center. Parish returned \$4,350.12 due to overpayment on this project that occurred on draw request #8. These funds were wired back to HUD and recorded in a collection voucher.

**Activity Description:**

St. Bernard Parish Government has revised their Long Term Recovery Plan to include the completion of a Comprehensive Master Land Use and Zoning Plan for the entirety of St. Bernard Parish. The Plan will address land use with the direct goal of successfully re-developing the Parish with an emphasis on economic development and supports sustainability.

The Comprehensive Master Land Use and Zoning Plan will contain a Fair Housing component that will not only guide housing development but will also assist and guide government and the community as to fair housing opportunities throughout St. Bernard Parish. The Comprehensive Master Land Use and Zoning Plan will also embrace floodplain and wetlands management in St. Bernard Parish, as well. The Comprehensive Master Land Use and Zoning Plan will serve as a policy framework for a wide variety of decisions concerning land use, infrastructure, commercial/industrial, institutional development and fair housing opportunities, design, capital outlay priorities, environmental issues, and growing commerce.

The Comprehensive Land Use Plan will incorporate strategies to implement the land use patterns promoted through the recovery planning process and depicted in the work developed by Duany-Plater-Zyberg (DPZ) and Waggoner and Ball Architects. These plans have created Post-Katrina land use issues for the Parish. Combining these visionary elements into modern comprehensive plans and zoning regulations conforming to the promotion of fair housing is crucial step.

**Location Description:**

8201 W. Judge Perez Drive, Chalmette, LA 70043

St. James Parish	\$7,423.00	\$113,858.91
<b>Match Contributed</b>	\$0.00	\$0.00

**Activity Description:**

The Parish is applying for disaster recovery funds to provide connecting streets that will improve the vehicle circulation during evacuations; accordingly, providing residents an alternate route to pass if the street becomes blocked by trees and debris. The urgent need for a solution to this existing condition became ever more apparent during Hurricanes Gustav and Ike. While this matter has always been a concern for area residents, the Parish is unable to finance the activity on its own and there are no other funds available.

The identified streets are Barras Farm Road, Franklin Farm Road, Kilmer Farm Road, Luther King Farm Road and Zenon Farm Road. All five streets in the project are of similar construction. All streets will be 22' wide with 4' wide aggregate shoulders and open ditch drainage. The roadway section will consist of a 95% compacted subgrade with 6" thick compacted aggregate base course, 2" thick asphaltic concrete binder course and 1 ½" thick asphaltic concrete wearing course. The roadside ditches will be graded to drain and have a 2 horizontal to 1 vertical side slopes. Bituminous coated corrugated steel culverts will be installed at all cross ditches as required. Temporary signs and barricades will be provided and installed by the contractor during the entire duration of construction. The total length of all streets within the project is approximately 6,590 linear feet.

**Location Description:**

5800 LA Hwy 44, Convent, LA 70723

### Activity Progress Narrative:

This is for SCP&DC for administrative services for the completion of the environmental review records for the evacuation streets project. Also for work completed by Providence/GSE, LLC for basic engineering services and final plans and specifications.

**Activity Description:**

Officials from Gramercy identified three phases of work in order to prevent flooding of homes within the town. Phase One will consist of opening, diverting, and improving segments of each canal as needed to improve the overall drainage capabilities of these canals. Phase Two would require installing the proper sized culverts on David Canal to eliminate restrictions of flows at the existing undersized culverts. Phase Three will involve the installation of flood gates at the outfall of one or more of these canals to prevent back flooding.

**Location Description:**

Gramercy, La. - St. James

**Activity Progress Narrative:**

This is for Environmental Engineering Services, Inc. (EES) for completion of the design phase and 75% completion of the construction and project representation phases. Also for HCI Construction Group, Inc. for the construction of the Gramercy Drainage Improvements. Additionally, this is also from Entergy for the installation and removal of a downguy and anchor on an existing powerline in the project area. The project's construction is approximately 60% complete.

**Activity Description:**

This program is designed for the purpose of providing incentive and resources for individual homeowners to repair or rebuild their damaged properties for the purpose of retaining community value and avoiding blight. The program includes elevation and mitigation incentives to assist homeowners rebuild safer, smarter, and stronger. The program includes incentives for green building and energy efficiency. Eligible home repairs could include installation of storm windows, storm doors, storm shutters, etc. It is expected that these home improvements will keep homeowners' properties up to the minimum levels of health and safety during the hurricane season. Through the use of 100% of these funds, the properties assisted will be able to fare better in future storm related disasters. All the properties served by this activity are residential.

**Location Description:**

**Activity Description:**

The Parish is proposing to replace the existing pier with a longer walking pier that extends over the current rock jetty. No structure presently exists over the jetty; therefore work would consist of installing support pilings, railings and deck boards over the entire length of the rock jetty. The existing channel must be cleared to remove any silt and the final task is to install appropriate channel marking lights for safer boat launch area ingress and egress.

**Location Description:**

LaPlace, Cambridge Community and Edgard (West Bank) - St. John the Baptist

**Activity Description:**

Create housing program in Opelousas, St. Landry Parish, LA to assist low/mod residents with house assistance, varying from simple home repairs, homeowner rehabilitation, and possibly replacement housing. The assistance will have the objective to return individuals to decent, safe and sanitary conditions.

'Pending details on the specific applicants and uses of the program funds, OCD-DRU has estimated the percentage that will be spent on mitigation activities. OCD-DRU utilized data from Katrina and Rita and assumed that the ratio of mitigation activities to total costs would be similar. To date LA has expended over \$8.5 billion for the Road Home program; additionally \$850 million dedicated to mitigation activities (\$750 through HMGP and \$100M through CDBG) for a total of approximately \$9.4 billion. The dollars that have (or will) go towards mitigation activities include the aforementioned \$850 million plus \$879 million that have gone to Road Home elevations plus \$880 million that have gone towards relocating Road Home applicants (this does NOT include the cost of demolition and transference of those properties to local governments) for a total of \$2.6 billion. This amounts to a total of 28% of the total homeowner program costs that have or will go towards mitigation activities. To be conservative, OCD-DRU rounded to 25% for Gustav/Ike programs.

**Location Description:**

Opelousas, St. Landry Parish, LA

**Activity Progress Narrative:**

Funds expended during the 2nd quarter of 2014 were for project delivery costs and direct costs.

**Activity Description:**

During Hurricanes Gustav and Ike Disasters, the operations and capabilities of the Mayor, City Clerk, City Administrative Staff, Police, Fire and Utility Departments were severely hampered due to the lack of adequate alternate power as a result of extended electrical power outages experienced in Opelousas. The City's major operations are housed in the Municipal Plaza Building to provide coordination of emergency services and other disaster related assistance to the local community. These efforts include assisting citizens, distribution of bottled water and supplies and other governmental activities to those in need. Without an adequate source of power at the City's Municipal Plaza Building during periods of power outages, the City will be unable to provide these services in an efficient manner.

To mitigate the problems experienced with the power outages in Opelousas, the installation of a standby generator capable of providing power to the Municipal Plaza Building is proposed. The generator will be sized (one 250 KW diesel generator) to be capable of providing the necessary power to operate the Municipal Plaza and the generator will be installed at the rear of the Municipal Plaza Building on the west side, adjacent to the existing electrical services. The necessary wiring from the generator to the existing services will be installed below ground in the conduit in accordance with current codes and regulations. There are two electrical service entrances to the building (from the power company) and thus two (2) automatic transfer switches will also be

provided (which is more economical than redoing the services to the building) which will automatically start the generator and provide backup power to the building in the case of the loss of power from the utility company.

### Location Description:

105 N. Main Street Opelousas, LA 70570

**Activity Description:**

Flooding and high wind related problems(i.e. power outages, downed trees, damaged roofs, broken windows, etc.) existed throughout the Parish. These problems identified numerous failures and the St. Landry Parish Government has been awarded \$1,037,566.00 of federal financial assistance under the FEMA Hazard Mitigation Grant Program (HMGP) to retrofit twenty-six (26) critical facilities in the Parish. The HMGP Program requires a local financial match of twenty-five percent and St. Landry Parish Government desires to utilize CDBG funds under this PIRP Program for this match.

**Activity Description:**

This project will improve drainage in two aspects for the Town. The first improvement shall consist of replacing an existing cross drain (2 - 36" x 40' Reinforced Concrete Pipes) on Corso Street. The existing drainage structure is inadequately sized for major storm events, causing backups and flooding upstream. Large storm events, including Hurricane Gustav, have also caused the roadway's subbase to severely erode over this cross drain, and the failure of the roadway base and surfacing is imminent. The existing drainage structure will be removed, and a larger replacement drainage structure (2 - 48" x 50' Plastic Culvert Pipes) is proposed for this site to provide increased drainage capacity. Flexible revetment placed on each end of the replacement structure is also proposed, in order to prevent future erosion. The second improvement shall consist of installing subsurface drainage (180' of 48" plastic storm drain pipes and 3 concrete catch basins) in an existing open channel which is severely eroded. The channel is located behind a Town park on Prescott Street. Large storm events, including Hurricane Gustav, have caused large volumes of water with extremely high velocities to severely erode this drainage canal. The only method to prevent further erosion is to pave the existing channel with concrete or install storm drain pipes. The proposed subsurface drainage would begin at a cross drain on Hill Street and extend to a cross drain on Prescott Street.

**Location Description:**

Corso Street & Prescott Street Washington, LA 70589

**Activity Description:**

The project entails asphalt patching and overlay, concrete sidewalk, sub-surface drainage, traffic striping, signage, etc. to mitigate future scour damage due to flood water. The project will resolve the concerns by providing a thicker, stronger roadway that will accommodate heavy traffic in future emergency events. This reconstruction also addresses the needs outlined in the Town and Parish’s mitigation plans for adequate evacuation routes during future floods or hurricanes.

**Location Description:**

Labau, Jolivette, 9th and 10th Streets, Baldwin, LA 70514

**Activity Progress Narrative:**

Environmental Review is complete and was submitted to the State DRU Office on August 9, 2013. Plans and Specifications were submitted for review and granted. Bids were received on project October 3, 2013. Contract has been awarded and construction has begun and is approximately 95% complete.

**Activity Description:**

The project entails the removal of existing control panels and related electrical infrastructure and replacing with new control panels, double throw switches, generator receptacles and new wiring to the pumps. The lift station improvements would allow for generator connections above the 100-year flood level. Generator connections are needed at each lift station to ensure operation until electricity is restored following a storm event.

**Location Description:**

500 Main Street, Franklin, LA 70538

### Activity Progress Narrative:

Project application has been submitted and approved. Engineer's Study and Report Phase, Preliminary Design Phase and Final Design Phase are complete. Plans were submitted for review and approved. Environmental review is complete and was submitted to the State DRU Office March 6, 2013. Project has been advertised for bid and bids were received in October. Project is currently under construction is approximately 75% complete.

**Activity Description:**

The project entails installing approximately 680 linear feet of new 8-inch gravity sewer lines, the replacement of sewer services under roadway and associated items of work and the replacement of concrete roadway pavement. This line is central to a larger area. Improvements to the gravity sewer line would allow for proper function of the system.

**Location Description:**

Martin Luther King Street, Patterson, LA 70392

**Activity Progress Narrative:**

Environmental Review is complete and was submitted to the State DRU Office on October 17, 2013. Engineer has conducted Topographic Surveys and final design is complete. Plans and Specifications have been approved. Project has been bid and awarded. Pre-construction conference was held last week. Materials are on order and construction is expected to begin within the next 30 days.

**Activity Description:**

It includes funds to address levee enlargement and construction will consist of compacted earthen embankment, aggregate access roadway, seeding, fertilizing, etc. Also included in this project are improvements to Pump Station #8. The work to be performed at pump station #8 will be required because the levee crosses the pump station discharge piping and separates the suction basin from the discharge basin. When the levee is enlarged/widened it will be required to stabilize the levee slopes on each side to prevent sloughing into the suction and discharge basins. Stabilization will be accomplished by using stone/rip-rap, sheet piling and/or lengthening the discharge pipes. The pump station access walkway also ties into the existing levee so it may require relocation to accommodate the levee enlargement.

**Location Description:**

Hwy 90 E, Morgan City, LA 70380

**Activity Progress Narrative:**

Environmental Review is complete and was submitted to the State DRU Office on October 11, 2013. Topographic Surveys are being conducted. Permitting and mitigation are in progress.

**Activity Description:**

The 450 foot communications tower will be constructed of hot-dipped galvanized solid steel rods to eliminate internal corrosion. Any evidence of corrosion can be easily identified and corrected during routine inspections, without the use of specialized metallurgy equipment. The radio tower is designed to support a minimum of four 8-ft microwave antennas, to be located between the levels of 300 and 350 feet. Three microwave antennas, repeaters and supporting equipment are needed at this time to support the 14 fire protection districts, Sheriff's Offices, 7 municipal Police Departments, 2 EMS (ambulance services) and STPG Office of Homeland Security and Emergency Preparedness. The planned space allocation of one more microwave antenna will support long-term network expansion. The tower will incorporate state-of-the-art lightning surge and electrical grounding protection systems designed to protect sensitive communications equipment from transient damage.

**Location Description:**

31078 Hwy 36, Lacombe, LA 70445

**Activity Progress Narrative:**

This is for geotechnical, ERR and related costs associated with the Communications Tower project from 1/2012 through 12/2013.

**Activity Description:**

Provides for drainage and flood protection for residents and their homes of Theriot in Terrebonne Parish

The specific purpose of each of this project is to reduce the risk of flooding in the newly protected areas. This will be accomplished either through raising levee elevations, improving pumping capacity, or some combination of the two. Raising levee elevations improves the protection of the areas against storm surge and tidal inundation. Improved pumping capacity reduces the risk of flooding from rainfall within the levees.

>Through analysis of the beneficiary area; parcels, addresses and aerial imagery were loaded into a map document.

Addresses were selected using the study areas and were queried for property types &ndash public, commercial, and residential. The parcel layer for this study was queried to locate adjudicated properties and aerial imagery was used to examine the adjudicated properties for the presence of a structure.

>The results of the study showed that 98% of the structures within the benefitting area are residential.

**Location Description:**

Terrebonne Parish, LA

**Activity Progress Narrative:**

Environ Invoices for environmental assessments, and Providence/GSE engineering invoices for Basic and Additional Services, including application/preliminary design, final design, Topographic and Boundary Survey, Geotechnical Investigation and Analysis, etc. Also invoice from LA. Department of Natural Resources for Permit.

**Activity Description:**

Foundation Repair Program- 100% of the funds of this activity will go towards providing assistance for elevation of residential properties in Vermilion Parish. Vermilion Parish is located on the coast of Louisiana and many parts are especially prone to storm surge and flooding when a storm related disaster hits on or near the state's coast. Elevation provides a means to mitigate future flooding potential of residential properties. Under the "Disaster Recovery Enhancement Fund Activity Eligibility Guidance" provided by HUD and dated June 22, 2010, elevation costs are specifically listed as an eligible activity for DREF consideration as this activity is considered an Individual Mitigation Measure.

**Location Description:**

Across Vermilion Parish, LA

**Activity Progress Narrative:**

Funds expended during the 2nd quarter of 2014 were for project delivery costs and elevation activities. Eleven elevation projects were completed during this quarter.

Vermilion Parish School Board	\$51,881.21	\$0.00
<b>Match Contributed</b>	\$0.00	\$0.00

**Activity Description:**

Provides up to \$60,000 to eligible applicants in order to assist with unmet needs resulting from damages caused by Hurricanes Gustav and/or Ike as an incentive to remain residents of the Parish. Funding recipients will be required to sign a covenant agreeing to occupy the home and maintain proper insurance for 3 years. The award is calculated as the total cost of elevation/mitigation project less funds received from other sources (intended to compensate individuals for their out of pocket expenses). The program is limited to individuals that elevated their homes or constructed floodwalls around their homes following Gustav/Ike with priority given to LMI households.

**Location Description:**

Across Vermilion Parish, LA

**Activity Progress Narrative:**

Funds expended during the 2nd quarter of 2014 were for project delivery costs. Actual expenditures in Q2 were \$1,700.00. The parish returned \$24,583.20 in funds which were wired back to HUD and reported in a collection voucher. Additionally, \$51,881.21 was corrected for past data entry error with a responsible organization.

**Activity Description:**

The Parish and the Towns of Port Allen, Brusly, and Addis propose to install approximately thirty-six (36) generators of varying sizes throughout the Parish. Approximately twenty-nine (29) Parish generators will provide back-up power to sewage lift stations that failed to function as designed after losing power during the storm. Port Allen will install approximately three (3) emergency generators that will prevent equipment failures at the City's main water well, sewage lift station, and wastewater treatment plant. The Town of Brusly will install three (3) emergency generators with which to power sewage treatment facilities during future storm events, and the Town of Addis will install approximately one (1) emergency generator with which to provide power to its treatment plant during future storm events.

**Location Description:**

880 N. Alexander Avenue, Port Allen, LA 70767

**Activity Progress Narrative:**

Volkert, Inc. for professional engineering services rendered during the implementation/ construction phase of the project and Tullier Services for construction services rendered.

**Activity Description:**

To build a diversion canal. The Parish is experiencing flooding along the upper reaches of the Port Allen Canal. This drainage system appears to drain to all of the area along La Hwy 415 and the Commercial Drive Business Park. It is the desire of the West Baton Rouge Council to improve this drainage system by diverting the majority of its flow more directly into the Intracoastal Canal. The Port Allen Canal drains into Bayou Choctaw and ultimately into the Intracoastal Canal. However, the confluence of the Port Allen Canal and Bayou Choctaw is approximately 5 miles further east from where the diversion planned in this project is designed to occur. This will allow the flow from the Port Allen Canal to reach the Intracoastal Canal faster and ultimately allow this system to drain better. This will provide relief for the homeowner's and businesses located throughout this area.

**Location Description:**

West Baton Rouge Parish, LA

**Activity Description:**

The proposed activity is designed as a mitigation plan, with a proper power source being available at both Collin’s Camp site and the Bryan Kelley Road well site.

The West Winn Water System, located in Winn Parish, provides potable water to 560 households and 27 businesses. The system serves residences along US Highway 84, US Highway 71, the Saline Lake area, and the St. Maurice area. During and following Hurricane Gustav, the system was out of service for three (3) days due to the significant power outages. The West Winn Water System does not currently maintain sufficient equipment and infrastructure at a single site. Therefore, emergency power systems are proposed at two (2) of the systems high capacity stations.

**Location Description:**

Winn Parish, LA

**Activity Progress Narrative:**

Grant consulting services performed during the period of February 24, 2014 through March 2, 2014 consisting of preparing closeout documents for this project.

**Activity Description:**

The state is required to spend at least 10.6 percent (\$46,520,525 of the first allocation) of the entire allocation on affordable rental housing activities. Fifty percent of this dedicated portion shall be allocated to the five most damaged parishes, in proportion to their damages, for eligible programs to be administered by the parish. The remaining 50 percent will be administered by the state for implementation of affordable rental housing projects. The top 5 impacted parishes will have the option of establishing their own affordable rental housing programs or using their portion of the affordable rental housing allocation to participate in the state-implemented program.

**Location Description:**

Lafourche Arc  
 109 Westover Drive  
 Thibodaux, La

**Activity Progress Narrative:**

15 properties selected for 32 houses to be constructed. Loan closed first of September. 20 of the 32 homes are at various stages of completion. July marks the beginning of occupancy on 25% of the total units. Anticipated completion date is on target for August 2014.

**Activity Description:**

The state is required to spend at least 10.6 percent (\$46,520,525 of the first allocation) of the entire allocation on affordable rental housing activities. Fifty percent of this dedicated portion shall be allocated to the five most damaged parishes, in proportion to their damages, for eligible programs to be administered by the parish. The remaining 50 percent will be administered by the state for implementation of affordable rental housing projects. The top 5 impacted parishes will have the option of establishing their own affordable rental housing programs or using their portion of the affordable rental housing allocation to participate in the state-implemented program.

**Location Description:**

Windsor Court  
6594 La. Hwy 74  
St. Gabriel, LA

**Activity Progress Narrative:**

Will result in 120 units, 118 are affordable. Construction is ongoing, with completion of about 35%

**Activity Description:**

The Infill Housing Program in Terrebonne Parish is to revitalize communities damaged by Hurricanes Gustav/Ike, eliminate the blight of vacant properties, and increase the availability of affordable rental housing for low to moderate income persons. This will be accomplished by partnering with the non-profits to construct new housing units on vacant parcels or rehab vacant housing units on scattered sites.

**Location Description:**

2 Completed To Date:  
262 T. Leigh Drive, Houma, LA  
303 A Merrill Dr, Houma, LA

**Activity Progress Narrative:**

15 properties are approved by council. 10 are complete and rented. 4 are underway. 2 new applications are pending approval from council. Funds disbursed were for construction costs.

**Activity Description:**

The state is required to spend at least 10.6 percent (\$46,520,525 of the first allocation) of the entire allocation on affordable rental housing activities. Fifty percent of this dedicated portion shall be allocated to the five most damaged parishes, in proportion to their damages, for eligible programs to be administered by the parish. The remaining 50 percent will be administered by the state for implementation of affordable rental housing projects. The top 5 impacted parishes will have the option of establishing their own affordable rental housing programs or using their portion of the affordable rental housing allocation to participate in the state-implemented program.

**Location Description:**

Terrebonne Parish

**Activity Progress Narrative:**

The project has broke ground and construction is underway.

**Activity Description:**

This program, which will be available in all of Louisiana’s declared parishes, will use flexible low interest loans to provide capital financial assistance to agri-businesses that meet the program guidelines and criteria as defined by the Authority. With a limited amount of funds available for this program, agribusinesses must be able to demonstrate how they contribute to the local and regional economy in the area where they apply for the program. Agri-businesses must provide jobs not only to their own business, but support, retain and create jobs locally; and, it must be determined to have a viable business operation in a post-storm economy meeting the guidelines shown below. The program will provide loan requests of up to \$250,000 per entity with flexible repayment terms of up to ten years.

**Location Description:**

Producers in Louisiana that suffered 2008 farm losses due to either Hurricane Gustav or Ike and whose losses have not been fully remediated by other USDA insurance, or other disaster programs.

**Activity Progress Narrative:**

In QPR due to deobligation of remaining funds. Balance was transferred to Economic Revitalization (project 3087) per approval of Action Plan Amendment 22.

**Activity Description:**

This program will use flexible low interest loans to provide capital financial assistance to agri-businesses that meet the program guidelines and criteria as defined by the Louisiana Office of Community Development, Disaster Recovery Unit and Louisiana Recovery Authority. Agri-businesses must be able to demonstrate how they contribute to the local and regional economy in the area where they apply for the program. Agri-businesses must provide jobs not only to their own business, but support, retain and create jobs locally; and it must be determined to have a viable business operation in a post-storm economy. The program will provide loan requests of up to \$250,000 per entity with flexible repayment terms of up to ten years. Parishes will be grouped into eight geographical regions with \$10 million made available to the regions based on each region's proportional share of agriculture losses. Agri-businesses, some of which include aerial applicators, licensed commercial crop storage facilities and elevators, cotton gins, ground chemical applicators, custom harvesters, farm supplies merchant wholesalers, agriculture management consultants, rice dryers, Restricted Use Pesticide dealers, and veterinarians engaged in large animal or farm related veterinary activities, are defined as individuals or organizations that provide support activities, products, or services directly to agriculture producers.

**Location Description:**

Agri-businesses in all Louisiana Parishes.

**Activity Description:**

Plaquemines Parish proposes to use its Gustav/Ike Sustainable Fisheries Grant Allocation of \$900,000 to mitigate the Buras Boat Harbor Site in order to provide permanent site improvements that will create capacity for current and future fisheries programs. Site improvements will consist of the following:

- Four hundred (400) linear feet of bulkhead and concrete dock
- Access to electricity and water will be set up on the dock so any vessels or equipment needing these services can have access quickly and be used to its highest efficiency
- Grading will be performed on the property to level the ground
- Limestone will be added to create a better road and working surface
- An eight foot (8) tall, two hundred and sixty two (262) linear feet, chain-linked fence will be erected to make sure security measures are in place.

**Location Description:**

Buras Boat Harbor Road, Buras, LA 70041

**Activity Description:**

The Yscloskey Ice House project would consist of redevelopment and construction of the existing site to meet current standards and requirements of federal flood insurance policies. In order to restore the facility to good working order, the following scope of work is proposed.

First, the existing reinforced concrete structure will be completely renovated and all existing mechanical and electrical equipment within would be replaced. The existing reinforced concrete structure will be retrofitted to comply with current wind and flood loading requirements (v-zone standards) and constructed to comply with "wet flood-proofing" standards. The ice-making mechanical and electrical equipment will be elevated above the flood elevation on an interior "mezzanine" level or on the existing roof top.

**Location Description:**

St. Bernard Parish

**Activity Progress Narrative:**

In QPR due to data correction to the activity within the DRGR Action Plan. No expenditures during the quarter.

**Activity Description:**

The VMS project has a procured contractor installing and monitoring Vessel Monitoring Systems on fishermen boats. The VMS units track the when and where catches are made on the public oyster grounds. The data collected will be used to develop a plan on how to better manage Louisiana's public oyster resource.

**Location Description:**

Throughout Louisiana

**Activity Progress Narrative:**

We expect activity to pick up in Q3 as we prepare for the opening of the public seed ground season. LDWF has been working with Polestar to develop an audit process that will provide contractor provided incentives for the industry to participate and send in information. We are working with our IT staff to provide a secure method of data transfer for the VMS data.

### Activity Description:

This project involves the construction of a new bulkhead to replace the existing dilapidated bulkhead along the shore of Lake Pontchartrain at the mouth of the Tchefuncte River. The bulkhead's purpose is to protect an existing public recreational area which serves the Town of Madisonville residents, as well as, those from surrounding towns and parishes. The recreational area includes a road, parking lot, two boat launches and fishing docks. Due to the collapse of the existing bulkhead these facilities are threatened by wave action and land loss from storms, hurricanes and simply a strong southeast wind which pushes the lake waters in. These recreational facilities have been damaged or washed out by a number of hurricanes over the years, including Katrina, Gustav and Ike. After such an event the site can remain unusable for quite some time. Construction of the new bulkhead would provide protection now, and in future years, and assure continued access to Lake Pontchartrain and the Tchefuncte River for recreational purposes.

### Location Description:

Madisonville, St. Tammany Parish, Louisiana

### Activity Progress Narrative:

As of December 2013, construction was proceeding on schedule.

**Activity Description:**

The goal of the project is to redirect effluent from the City’s sewage treatment plant (principally the Sunshine WWTP) from discharge into a slow draining and often times stagnant local coulee, instead pumping the discharge over the levee into the Mississippi River. This redirection of WWTP effluent to a major water body, from the much smaller local coulee or drain, will eliminate the problem that occurred during Hurricanes Gustav and Ike where sewage effluent was being discharged into flooded drainage ways. The effluent was dispersed wherever floodwaters flowed.

The local drain where effluent is currently discharged is a slow draining channel on the best of days. When wet weather season occurs or during major storm events such as Hurricanes Gustav and Ike, the drainage system often stops flowing downstream and actually flows backwards as a result of backwater flooding, in that the lower swamps begin to fill and the upstream drainage basin has nowhere to drain.

The effluent flow from the existing WWTP currently discharges into Bayou Paul, which is located adjacent to the existing plant site. This leg of Bayou Paul is very small and does not receive substantial flows from the surrounding areas to provide a steady flow. The Bayou also suffers from backwater flooding which results in the treated sewage effluent overflows ditch banks after heavy rain events occur, such as during Hurricanes Gustav and Ike. The rerouting of sewage treatment effluent to the Mississippi River will eliminate the problem of discharge into this local drain. The proposed routing for the new effluent force main will discharge directly to the Mississippi River, which will not only eliminate the potential health hazards of the nearby residential areas from overtopping of the Bayou, but will also reduce the effluent treatment requirements of the WWTP (i.e. discharge to large flow of Mississippi River).

## Location Description:

1697 Besson Lane, St. Gabriel, LA

## Activity Progress Narrative:

The funding for this St. Tammany WQ Plan consist of the remaining CDBG funds originally approved for the S. Slidell project. The previous grant did not move forward under the CCRP program due to potential CDBG compliance issues uncovered during the project development phase. The decision was made by CPRA and St.Tammany Parish to implement an alternative project and the associated funds were transferred upon formal cancellation of the S. Slidell grant. As of December 2013 the project was proceeding according to schedule and Providence was providing detailed updates on the planning process. Data collection is complete and the model selection is under review.

**Activity Description:**

The Franklin Canal floods with every surge event. The hurricane related storm surge travels up the Franklin Canal and floods approximately 300 homes and U.S. Highway 90, a major evacuation route. The Franklin Floodgate Sinkable Barge and Pump Station will not only block the surge from traveling up the Franklin Canal, but the pump station will also prevent storm water from inundating the closed system. The proposed improvements are installing a sinkable barge as a floodgate, additional levees, and a pump station. The drainage area affected is approximately 600 acres. The proposed levee would tie into the USACE Franklin and vicinity levee. The proposed pump station and sinkable barge are both new construction.

**Location Description:**

Franklin, St. Mary Parish, Louisiana

**Activity Progress Narrative:**

Landrights issues related to the Barge and Levee were being addressed; final plans and specs were under review by office of state purchasing; E&D NTP for the Pump Station was nearly complete.

>As of June 2011 the project was in preliminary design and environmental review for Phase I was underway.

**Activity Description:**

Construction of approximately 85,000 linear feet of terraces within the open water south of Front Ridge that will be designed to reduce wave fetch, reestablish the emergent marsh and prevent further deterioration to the ridge.

**Location Description:**

Kaplan, LA

**Activity Progress Narrative:**

As of June 2013, the environmental review for the project was under final review, and E&D was 60% complete. Issues with pipeline owners and required cover caused delays with land rights agreements but had been resolved in early July. \$1,331.98 was incorrectly overdrawn from the DRGR. The state has wired these funds back to HUD and will be reflected in the Q3 2014 QPR.

**Activity Description:**

Our program to provide assistance to early-stage social entrepreneurs is called the New Ventures Accelerator. Social entrepreneurs at their critical early stages need support, mentorship, and strong networks in order to be successful.

- We begin with a strong selection model for high-potential entrepreneurs and ideas.
- We work with the social entrepreneur in a 10-month engagement to test and implement their promising new approach to solving a problem.
- We begin with an organizational assessment, which includes a financial, operational, and programmatic review.
- Together, we set and reach short- and long-term goals through our Milestone Activity Plan (MAP) for deep social impact and financial sustainability.
- We assemble a team made up of an Executive Consultant, Executive Mentor, and pro-bono technical assistance experts (legal, marketing, financial, etc.)
- Support occurs in areas such as building financial models, validating the market, strategic planning, business planning, setting up accounting systems, marketing, and fund development.

**Location Description:**

Orleans Parish

**Activity Progress Narrative:**

Continue to provide Technical Assistance to businesses in hurricane affected parishes. Services provided include Marketing, Organizational Assessment & Work Plan Development, Business Plan/Product Development, Individualized TA, Executive

Mentoring and Fund and Sustainability.

**Activity Description:**

The ability of a business to reopen after a disaster does not ensure long-term survival. Research shows that of the businesses that do reopen following a disaster, many fail within two to five years after recovery resources are exhausted. Small- and medium-sized businesses are especially vulnerable to disasters, as they often lack the resources required to meet the challenges and seize the opportunities created in the wake of the event. Those businesses operating in today's post-hurricane and oil spill-impacted economy will require an extra measure of focused assistance to support their ongoing recovery. With this assistance the expected outcomes for business are higher survival and growth rates that will also result in expected outcomes of higher job retention and creation in our impact area.

**Location Description:**

Cameron, Calcasieu, and Jefferson Davis Parishes

**Activity Progress Narrative:**

Continue to provide Technical Assistance to businesses in hurricane affected parishes. Services provided include General Workshops, One-on-One Business Counseling, Entrepreneur 10-week Training Program, Export Training and Nonprofit Workshops.

**Activity Description:**

The City of Pineville's zoning ordinance was written and developed in the 1960s and does not fit into the City's current development needs and goals. The City of Pineville plans on rewriting the current Zoning Ordinance into a Comprehensive Unified Development Ordinance. The new ordinance will include an expanded zoning and Subdivision Development Ordinance and a user-friendly Zoning map. The new code will incorporate FEMA Flood Hazard Maps, U.S. Corps of Engineer Wetland areas, environmental quality permit restrictions on steam discharges from packaged wastewater treatment plants, storm water runoff control, MS4 silt and erosion control measures, environmental concerns such as light and noise pollution, conservation resource areas to protect local streams and wooded areas, and historic preservation efforts.

**Location Description:**

Pineville, Rapides Parish, LA

**Activity Progress Narrative:**

Worked on development of zoning code and modernization of zoning map.
