Narratives

Executive Summary:

Louisiana has unique value as a priceless commercial hub and a vital buoy of America's national security interests. The source of this value, our working coast, contains 40 percent of our nation's wetlands, sources 25 percent of its petrochemicals, provides 26 percent of its seafood supply, and handles 20 percent of its waterborne commerce, with 500 million tons of cargo passing through Louisiana's deep-draft ports and navigation channels annually. In addition, our coast is, in itself, a protective barrier. Louisiana has been on the frontlines of an environmental battle for multiple generations. Louisiana's vulnerabilities – land loss, subsidence, and sea level rise – are conditions that will impact all coastal areas in the United States. We need a plan to address the impacts of these vulnerabilities on coastal communities in a systematic way and on a large scale.

Louisiana intends to remain on the cutting edge in developing the next generation of resilient solutions. We have developed the nation's first comprehensive Coastal Master Plan (CMP) specifically tasked with rebuilding and preserving our coast. The CMP is updated every five years. Unfortunately, we know that a "resilience gap" still exists. Even if all the work in the CMP were to be completed, the human piece of the equation is still not being given the attention that is necessary to appropriately reduce risk and vulnerability. That is the problem we set out to solve.

LA SAFE FUND

To that end, we have developed a resilience policy framework called Louisiana's Strategic Adaptations for Future Environments (LA SAFE). Through this resilience policy framework, we have come to accept hard truths: Our coast is disappearing. Land loss is going to get worse before it gets better – as will our exposure to risk. The LA SAFE Fund is our mechanism to work with local communities, exchange best available information, and develop project-based solutions in accordance with the Resettle, Retrofit and Reshape typologies. We believe this is an opportunity to pivot from our long-term recovery efforts of the last decade toward a more resilient future, both for Louisiana and the nation as a whole.

ISLE DE JEAN CHARLES RESETTLEMENT

The Isle de Jean Charles Band of Biloxi-Chitimacha-Choctaw located in coastal Terrebonne Parish, a region that leads the world in land loss, is ideally positioned to develop and test resettlement adaptive methodologies because their need to resettle has become urgent. With the loss of more than 98 percent of the land, however, relocation is inevitable; only 320 acres remain of what was a 22,400-acre Island in 1955.

A new settlement will provide tribal members an opportunity to relocate to disaster resilient and energy efficient housing, while offering the tribe a space to build cultural resilience. A new settlement offers an opportunity for the tribe to rebuild their homes and secure their culture on safe ground.

MID-URN Areas:

Each of the six target areas (Jefferson Parish, Plaquemines Parish, St. John the Baptist Parish, St. Tammany Parish, Coastal Lafourche Parish, Coastal Terrebonne Parish) are located in parishes covered by Hurricane Isaac's Presidential major disaster declaration in 2012. Jefferson, Plaquemines, St. John the Baptist, St. Tammany Parishes
HUD has previously determined these parishes to be "Most Impacted" locations as a result of 2012's Hurricane Isaac.

Coastal Lafourche Parish

Census Tracts 209, 210, 211, 212, 213: These tracts all respectively sustained damage to more than 100 homes, and are therefore eligible as “Most Impacted” areas.

Coastal Terrebonne Parish

Census Tracts 11, 13, 14: These tracts respectively sustained damage to more than 100 homes, and are therefore eligible as “Most Impacted” areas.

Census Tract 12.02: This tract includes the community of Chauvin. It is eligible as a Most Impacted area based on environmental degradation characteristics. Census Tract 12.02 experienced damage to wetlands and barrier islands from Hurricane Isaac, reducing protection from future hurricanes and placing local economies and households in surrounding areas at greater risk.

Key Agencies, Partners, Positions, Personnel:

Key Personnel

- Pat Forbes – Executive Director
- Adrienne Celestine – Director of Recovery Programs
- Mathew Sanders – Resilience Policy and Program Administrator
- Dakota Fisher – Resilience Program Analyst
- Candace Watkins – Disaster Recovery Specialist
- Jessica Simms – Policy Analyst

Key Partners

Pan American Engineers (PAE) – PAE brings to the team many years of experience as project and administrative management consultants. The team at PAE works as the lead manager for the LA SAFE and Resettlement Projects under the supervision of the Resilience Policy and Program Administrator.

Chicago Bridge & Iron (CB&I) – CB&I works as one of three parish captains on the LA SAFE project. The role of the parish captain is to oversee two of the six parishes eligible for the LA SAFE program. CB&I is responsible for Plaquemines Parish and Lafourche Parish.

GCR – GCR works as one of three parish captains on the LA SAFE program. The role of the parish captain is to oversee two of the six parishes eligible for the LA SAFE program. GCR is responsible for St. Tammany Parish and Jefferson Parish.

Center for Planning Excellence (CPEX) - CPEX works as one of three parish captains on the LA SAFE program. The role of the parish captain is to oversee two of the six parishes eligible for the LA SAFE program. CPEX is responsible for St. John the Baptist Parish and Terrebonne Parish.

Waggoner & Ball Architects – Waggoner & Ball Architects works as the in-shop design lead for the LA SAFE program. Most, although not all, graphics used for community meetings, workshops, and documents will be designed by the team at Waggoner & Ball.

Concordia, LLC – Concordia is working as the community and outreach engagement lead. The tasks provided are mostly focused on the organization and creation of material used to engage stakeholders during community meetings and workshops. The team at Concordia are well known for their ability to engage residents in an innovative fashion that produces results.

University of New Orleans Center for Hazards Assessment, Response, and Technology (UNO-CHART) – The applied social sciences hazards center housed at the University of New Orleans is providing research, review, and analysis of the project. Specifically, the role of UNO-CHART during this project is to provide valuable input as to how the project can be scaled and replicated in the future.

Lowlander Center – Resettlement of Isle de Jean Charles cultural liaison.

Coastal Protection and Restoration Authority (CPRA) – The CPRA is a valuable partner for the State of Louisiana’s NDR program due to the agency’s ability to provide the best available data that outlines Louisiana’s current and future risk.

Foundation for Louisiana (FFL) – The State’s OCD-DRU has entered into a partnership with the FFL because each identified that concurrent work could be performed that would allow for leveraged work, funding and resources. The foundation has extensive partnerships with non-governmental organizations (NGOs) and community leaders across Louisiana’s coastal zone of which can be used to perform community engagement that reaches more people. This partnership does not involve any exchange

Key Agencies, Partners, Positions, Personnel:

angling of funds between OCD and FFL.

Jefferson Parish – The Parish of Jefferson is a partner with the State of Louisiana due to its unmet needs identified as a result of Hurricane Isaac. Jefferson Parish applied separately during the National Disaster Resilience Competition (NDRC) and failed to receive funding; however, the parish and the state entered into a partnership soon after due to the fact that the LA SAFE program is best served as a regional program that is inclusive of as many parishes as possible.

Most Impacted and Distressed Threshold (Projected)	\$0.00	\$0.00

Overall Progress Narrative:

Overall Progress Narrative – Q1 2018:

In Quarter 1, OCD-DRU continued progress in the development and planning of its CDBG-NDR grant activities. Specifically, on the Resettlement of Isle de Jean Charles, OCD-DRU sought input from Island residents and members of the broader community to engage a Steering Committee. The Committee, comprised of a majority Island residents and other members of the broader community, met first in January 2018 and agreed to meet on 4-6 week intervals thereafter, holding a second meeting in February. The Committee's broad objective is to drive the planning and design processes throughout the Master Planning phase of the project. Additionally, OCD-DRU entered into an Option Purchase Agreement with the owners of the 515-acre "Evergreen" property for a purchase price of \$11.7M. The state hopes to conclude this real estate purchase in Q4 2018. The State intends to use the Louisiana Land Trust (LLT) as a vehicle to acquire, hold and develop the selected property until which time a permanent ownership structure is developed.

Also in Q1, work continued on the NDR grant's second project, LA SAFE. Pursuant to that project's plan development activities spanning across the beginning of 2018, meetings and workshops have been held internally to finalize the project. Data collected from the events that took place during the 2017 calendar year are being used to create the final project portfolio and the final plans. At the end of 2017, the project team had a slate of 36 potential program and project ideas – 6 for each parish – that were presented to the public. The preferences provided by the public were one of six criteria that drove project selection. The project portfolio and plans will be finalized and announced during Q2 of 2018.

The Resettlement of Isle de Jean Charles:

- **Site Selection:** On March 6, OCD-DRU executed an Option Agreement with the owners of the 515-acre “Evergreen” property for a purchase price of \$11.7M. This agreement triggers an initial period during which OCD will obtain environmental clearances before acquiring the property. The initial option period is 210 calendar days, for a cost of \$150,000. If regulatory clearances are not completed within 210 days, OCD may choose to extend the option period another 90 days, for a sum of \$25,000. Should a second extension be required, OCD may extend the agreement for a second 90-day period for an additional sum of \$25,000, however this is not anticipated.
- **Ongoing Outreach and Engagement:** On January 29 and February 26, OCD-DRU held Steering Committee meetings in Pointe-Aux-Chenes. OCD-DRU sought to provide detailed, concrete, and transparent information on the project’s progress and be available to answer community queries. The Committee supports the Resettlement process by guiding and informing the master planning process, reviewing materials and recommendations before they are released to the public, and providing local, cultural insight to the process. Members also serve as liaisons between the planning team and various members of the broader IDJC community. OCD-DRU held four community stakeholder conference calls to keep interested parties informed of the Program’s progress as well as providing an open forum for input and discussion relative to the project’s development. OCD-DRU and members of the master planning team conducted fifteen household interviews with members of the Isle de Jean Charles community who have entered into the Optional Relocation Assistance Program. The purpose of these interviews was to gather input on design scenarios on the new site, and gauge whether participants are considering moving to the new community. Finally, OCD-DRU personnel conducted weekly on-Island visits to engage with households to ensure all needs are documented and, where possible, met. Additionally, the first meeting of the Academic Advisory took place in February. The Academic Advisory Committee will meet on a quarterly basis throughout the project to: 1. develop knowledge transfer of resettlement information to academia to educate community resettlement students and practitioners; 2. produce white papers, journal articles and other published works to document and analyze the resettlement process; 3. develop methodology to archive and highlight best resettlement practices developed through this Program and; 4. advise the team on relevant worldwide best practices in community resettlement.
- **Optional Relocation Assistance:** Intake for this program continues. At the end of Q1, fifteen households had entered the Optional Relocation Assistance Program and are today housed in upland areas of Terrebonne Parish.
- **Master Planning:** In Q1, OCD-DRU executed a contract with its procured Master Planning vendor, CSRS. Planning efforts are ongoing, with a design workshop schedule in Q2 in which Island residents and former residents will review design plans, and offer input and feedback on their preferences for site and housing design on the new site.

LA SAFE:

Planning work continued throughout Q1, including small internal meetings within the project team that drove towards the completion of LA SAFE. In total, ~2,385 people across 71 public engagement events joined the project team in 2017, providing their ideas, creativity and preferences pertaining to their future vision of their communities. With the extensive data gathered during that time, the project team has taken all of Q1 of 2018 to turn that data around into final projects and plans. Since Q4, a selection committee has gathered three times to score proposed projects and programs that have come out of the LA SAFE process. The project team also began finalizing the six parish and one regional adaptation strategies. The project portfolio and plans will be finalized and announced during Q2 of 2018.

Activity Description:

The acquisition of a site for relocation is the first major phase in providing a safe, healthy community for those currently residing on Isle de Jean Charles. Sites are being evaluated for their suitability for raising families, rebuilding community, and for having characteristics as similar to their original site as possible. The sites are also being evaluated for the amount of reduced risk they provide compared to current conditions. As a site with reduced risk is being sought, the location should not be extremely far from the original site in order to retain traditional livelihood and cultural practices of the community. All factors of the design and process will help to support and enhance community identity, culture, and safety.

Location Description:

Terrebonne, LA

Activity Progress Narrative:

On March 6, OCD-DRU executed an Option Agreement with the owners of the 515-acre "Evergreen" property for a purchase price of \$11.7M. The land for the new settlement has not yet been acquired nor are there yet any actual beneficiaries.

Activity Description:

The Isle de Jean Charles Optional Relocation Assistance Program has been designed to provide a bridge for Island residents to move to safe, upland housing units for a duration of time while a new community is planned, designed and developed. Specifically, this program targets populations currently living in substandard units on the Island, but may also be utilized by residents seeking to leave the flood-vulnerable Island prior to the completion of new units within the new, resettled community, or in an emergency situation should the Island be impacted by a significant flooding or other disaster event prior to the completion of new, permanent housing units within the new settlement.

Activity Description:

The State of Louisiana is moving the primarily Native American community of Isle de Jean Charles away from their highly vulnerable location in coastal Terrebonne Parish. This activity will fund the planning services necessary to produce the resettlement of Isle de Jean Charles community.

The development of the best practices for resettlement to a safer location of a specific community – such as that of the tribe – will occur concurrently and interactively (including feedback loops) between the specific Isle de Jean Charles resettlement with the proposed building of general best practices for the resettlement of the class of at risk coastal Louisiana communities which desire to relocate. The intent is to hone many of these generic principles before the next community(ies) request/require resettlement. As resettlement of coastal communities at risk to sea level rise and storm inundation in the lower 48 states has never occurred, the guidance that will be developed will also be proposed to begin identifying the principles important for resettlement of coastal communities throughout the risk zones of all lower-48 coasts of the United States.

Location Description:

Terrebonne Parish

Activity Progress Narrative:

OCD-DRU organized two Steering Committee meetings and conducted fifteen household interviews with former IDJC residents who have entered into the Optional Relocation Assistance Program. Plans and planning products produced in Q1 are two reports from the Steering Committee meetings, three planning reports from OCD-DRU

contractor CPEX, a market analysis from OCD-DRU contractor, HR&A and design guidelines from OCD-DRU contractor, Waggoner & Ball.

Activity Description:

This activity will facilitate the planning services required for the LA SAFE program. During year one, the LA SAFE program will produce six separate adaptation plans for the qualifying parishes of St. Tammany, Jefferson, Plaquemines, St. John the Baptist, Terrebonne and Lafourche. The planning process will be based around a co-design goal that allows for constant community input and involvement from start to finish. Once the adaptation plans are created, a selection committee will select a handful of pilot projects.

Location Description:

St. Tammany, Jefferson, Plaquemines, St. John the Baptist, Terrebonne and Lafourche

Activity Progress Narrative:

During Q1 of 2018 the LA SAFE team has been working towards a final project portfolio and the finalization of the 7 adaptation strategies. Both the project portfolio and strategies will be released during Q2.
