ISIS Memorandum 09-017

To: Business Objects
ISIS Agency Liaisons
Fiscal Officers

Subject: Changes to CUBT and CLBT in the AFS Universe

This is to advise that the sort sequence and indexes for the **CUBT** and **CLBT** tables in the AFS Universe have been changed to improve response time when creating Business Objects reports. The primary sort key and primary index for both tables now consist of **budget fiscal year YY, accounting period YY Q MM, and fund.**

To accommodate a technical change, a new field, **AFS_Unid**, has been added to each record. It is necessary to always select the new field when building a report. Once the report has run, the AFS_Unid column may be removed from the page.

The CUBT table holds detail budget transactions (AP, RB, EB) for all open accounting periods. The CLBT table holds detail budget transactions (AP, RB, EB) from the 13th period 1998 through the most recently closed month.

Additional indexes for these two tables have been created for agency, appropriation unit, account type, organization, object, revenue source, balance sheet account, and trans code/trans agency/trans number number. It is best to use as many of these fields as possible when creating Business Objects reports using the CUBT and CLBT tables.

Questions may be directed to the ISIS AFS Help Desk at (225) 342-2677.
