

Department of Environmental Quality

Department Description

The mission of the Department of Environmental Quality is to provide service to the people of Louisiana through comprehensive environmental protection in order to promote and protect health, safety and welfare while considering sound policies that are consistent with statutory mandates.

The Department has set six goals to accomplish its mission:

- I. Protect public health, safety, and welfare by protecting and improving the environment (land, water, air)
- II. Increase compliance with environmental laws (both voluntary and mandatory compliance) that meet state and federal mandates
- III. Operate in an efficient and effective manner
- IV. Conduct programs that are consistent with sound policy for employment and economic development
- V. Work to enhance customer service
- VI. Work to provide regulatory flexibility

13-856 — Office of Environmental Quality

Agency Description

The mission of the Office of Environmental Quality (OEQ) is to provide strategic administrative oversight necessary to advance and fulfill the role, scope, and function of DEQ. As the managerial and overall policy coordinating agency for the Department, the Office of Environmental Quality will facilitate achievement of environmental improvements by promoting initiatives that serve a broad environmental mandate, and by representing the Department when dealing with external agencies. OEQ fosters improved relationships with DEQ’s customers, including community relationships and relations with other governmental agencies. OEQ reviews program objectives and budget priorities to assure they are in accordance with DEQ mandates. The Office of Environmental Quality provides executive oversight and leadership to the five program functions of the Department of Environmental Quality. They are: Office of the Secretary, Office of Environmental Compliance, Office of Environmental Services, and Office of Management and Finance, and Office of Environmental Assessment.

The goal of the Office of Environmental Quality is to improve Louisiana’s environment by serving as the policy arm of the Department and coordinating agency wide efforts to advance the department's mission, whose central focus is to provide the people of Louisiana with comprehensive environmental protection while considering sound economic development and employment policies.

The Department is fully committed to ensuring full compliance with all human resources policies that provide assistance and support to females and families. All policies are monitored for compliance with state and federal rules and regulations. Initiatives that are presently utilized are: flexible work schedules, telecommuting, educational leave, availability of training courses, such as Diversity in the Workplace, Harassment/Discrimination/Workplace Violence, Ethics, etc. The Department also has policies and procedures for Family and Medical Leave and accommodations under the Americans with Disabilities Act.

856_1000 — Office of the Secretary

Program Authorization: La R.S. 30:2011.C(1)(a)(i)(ii)

Program Description

The mission of the Office of the Secretary is to provide strategic administrative oversight necessary to advance and fulfill the role, scope and function of DEQ. As the managerial and overall policy coordinating agency for the Department, the Office of the Secretary will facilitate achievement of environmental improvements by promoting initiatives that serve a broad environmental mandate, and by representing the Department when dealing with external agencies. The Administrative Program will ensure the Department meets its performance and policy objectives by working and coordinating with all program offices.

The goal of the Office of the Secretary is to improve Louisiana's environment by serving as the policy arm of the Department and coordinating agency wide efforts to advance the department's mission, whose central focus is to provide the people of Louisiana with comprehensive environmental protection while considering sound economic development and employment policies.

Executive Administration provides executive oversight and leadership of the five agency functions of the Department of Environmental Quality. They are: Office of the Secretary, Office of Environmental Compliance, Office of Environmental Services, Office of Management and Finance and Office of Environmental Assessment.

The Business and Community activity provides both regulatory and non-regulatory approaches to ensure protection and improvement of the environment through technical assistance, outreach and partnership building. The activity serves as the outreach arm for the Louisiana Department of Environmental Quality (DEQ) by providing educational outreach and technical compliance assistance to businesses, municipalities/communities, non-governmental organizations, schools and the public at large. The activity provides outlets for organizations to go above and beyond regulatory requirements by implementing voluntary waste reduction programs and building partnerships with neighboring communities.

The Legal Affairs and Criminal Investigations Division provides advice, consultation, and representation to all offices of the Department and is organized to provide attorneys with expertise and experience for every major type of environmental (and internal) action. Attorneys litigate corrective and compensatory actions to repair environmental damage, pursue environmental violators, collect penalties and fees owed to the department, and defend permit and other agency actions in administrative hearings and in both state and federal courts. The Division also routinely draft, review, and negotiate contracts, agreements, and settlements, and research and prepare legal opinions, reports, and other documentation to support agency decisions and actions. In compliance with La. R.S. 30:2025.F (4), once a determination has been made that a criminal violation of the Louisiana Environmental Quality Act may have occurred, the Department is required to notify the

district attorney in whose jurisdiction such possible violation has occurred. The Department is required to provide the district attorney with any and all information necessary to evaluate the alleged violation for criminal prosecution. In doing so, the criminal investigation section supports the overall mission of the Department and acts as the ultimate deterrent to would-be criminal violators of environmental laws. Deterrence is accomplished through arrests, serving search warrants, and developing and investigating environmental criminal cases for prosecution. The criminal investigations section compliments the Department's civil enforcement efforts by focusing on the most egregious, habitual violators and escalating leads to criminal referrals to the district attorney when civil enforcement remedies fail or fall short. The criminal investigations section partners with various state and federal law enforcement agencies on criminal cases with an environmental nexus.

Audit Services conducts performance, operational, investigative, and financial audits of the operations of the Department. Also, Audit Services audits those private entities that do not appear to be paying fees to the Department on a self-reporting basis. These include new and used tire dealers and motor fuel distributors. Audit Services assesses fees and interest on delinquent accounts. These audits provide the Department with assurances that fees are remitted promptly and accurately.

The Communications section handles all media functions including media inquiries, press releases, the LDEQ web site, Facebook, Twitter and YouTube. These activities provide valuable information to the public on LDEQ environmental activities that are of interest to or that impact them. The section has video capabilities and produces educational and informational videos for public outreach and provides support for public hearings, workshops, environmental projects and outreach activities. These include a monthly e-newsletter Discover DEQ, the LDEQ Annual report and informational and education material and brochures.

Source of Funding

This program is funded with Statutory Dedications and Federal Funds. Statutory Dedications are derived from the Environmental Trust Fund (ETF), Waste Tire Management Fund, Oil Spill Contingency Fund, and the Hazardous Waste Site Cleanup Fund (HWSCF). (Per R.S. 39:36B.(8), see table below for listing of expenditures out of each Statutory Dedicated Fund). The ETF consists of all fees pursuant to the authority granted in R.S. 30:2015, and any other provisions of law authorizing the department to assess fees. Such fees are used only for the purpose for which they are assessed. The Waste Tire Management Fund consists of fees assessed pursuant to the authority granted in R.S. 30:2418, and any other provisions of the law authorizing the department to assess fees. These fees are utilized only for the purposes for which they are assessed. The HWSCF revenues are derived from the proceeds of the Hazardous Waste Tax and fines and penalties collected from the environmental offenders in accordance with R.S. 30:2205. The Oil Spill Contingency Fund (RS 30:2459) consists of monies derived from fees, taxes, penalties, and grants which are paid to the office of the oil spill coordinator as cost recoveries from responsible parties. The Federal Funds are from the Environmental Protection Agency to receive funding for Performance Partnership Grants.

Number of newspaper mentions regarding DEQ's actions on environmental issues (LAPAS CODE - 23685)	5,489	7,684	6,359	6,049	4,322

Since changing to a new news collection service in FY 2012-2013, the number of collection activities has been highly variable each quarter making it extremely difficult to set and meet targets. This indicator will be best reported as a GPI and was changed from a Key indicator in FY 2014-2015.

856_2000 — Office of Environmental Compliance

Program Authorization: La R.S. 30:2011.C(1)(c)

Program Description

The mission of the Office of Environmental Compliance (OEC), consisting of the Surveillance, Emergency Response and Radiation, and Enforcement Divisions, is to protect the health, safety and welfare of the people and environmental resources of Louisiana. OEC protects the citizens of the state by conducting inspections of permitted and non-permitted facilities, assessing environmental conditions, responding to environmental incidents such as unauthorized releases, spills and citizen complaints, and by providing compliance assistance to the regulated community when appropriate.

The OEC establishes a multimedia compliance approach; creates a uniform approach for compliance activities; assigns accountability and responsibility to appropriate parties; and provides standardized response training for all potential responders. The OEC provides for vigorous and timely resolution of enforcement actions.

The goals of the OEC are to operate in an open, fair, and consistent manner; to strive for and assist in attaining environmental compliance in the regulated community; and to protect environmental resources and the health and safety of the citizens of the State of Louisiana.

The function of the Surveillance Division is to inspect facilities for compliance with their permits or other authorizations (regulations, or enforcement actions) by the department and to respond to complaints. The Surveillance activity includes mandated compliance inspections, incident and complaint investigations, and water sampling. The U.S. Environmental Protection Agency (EPA) authorized DEQ to administer, implement, and enforce federal statutes for air, water and hazardous waste. Surveillance, through effective planning, uses an inspection strategy that requires in-depth inspections that focus on achieving meaningful environmental results that promote compliance statewide while also meeting the requirements of state and federal statutory mandates and funding commitments. Planning flexibility allows opportunities to inspect and evaluate unpermitted facilities, and when needed, provide compliance assistance to small and medium facilities to ensure they understand the requirements of environmental regulations. Incident and complaint investigations/inspections are initiated based on information received from citizens, required upset/release notifications, and from other sources of information (such as sister agencies). Ambient water monitoring is conducted statewide under Clean Water Act requirements and policies to ensure there is adequate data to evaluate and set standards related to uses for specific water bodies (swimming, fishing, drinking water supplies). The data is provided to the Water Planning Division (who set standards), and also to the Department of Wildlife and Fisheries (for habitat and aquatic propagation), and Department of Health and Hospitals Drinking Water program, as needed.

The Emergency Response and Radiation Division function is to respond to chemical and environmental emergencies, provide a Single Point of Contact (SPOC) for reporting spills and

complaints to the Department, and provide administrative services for radiation sources. Emergency Response (ER) conducts monitoring at incidents where chemicals have been released or have the potential to be released into the environment or to affect public health. ER reviews and monitors cleanup activities at incidents to ensure the protection of the environment and the safety of Louisiana's citizens. Single Point of Contact (SPOC) receives and processes spill and complaint notifications from the general public and routes them to either ER responders or Surveillance inspectors. Chemical Accident Prevention (CAP) inspects specially designated facilities, which if involved in a catastrophic release, would affect a significant segment of a population with life-threatening chemical exposure. CAP inspections verify these facilities are conducting required maintenance, have sufficient response resources allocated, and have trained personnel and up-to-date plans in place to protect the public in the event of a catastrophic release. Radiological Emergency Planning & Response (REP&R) plans, coordinates and implements training to meet Nuclear Regulatory Commission (NRC) requirements for three nuclear power plants. REP&R provides training to first responders that would come in contact with low level radiation shipments that routinely travel Interstate-20. Radiation administers testing of radiographers that certify competency to safely and knowledgeably handle and utilize radioactive sources. In addition, Radiation registers licenses and inspects all radioactive sources in the state. These sources, found extensively in medical and industrial settings, are used for the treatment and identification of disease, to locate flaws in construction where conventional inspection means would be inadequate and in maintenance of the thousands of miles of pipelines throughout the state.

The Enforcement Division function is to ensure compliance with the environmental permitting laws and regulations and to deter future non-compliance by issuing the appropriate enforcement actions, thus encouraging a level playing field. Enforcement activity strives to ensure that the government, the private sector, and the public comply with federal and state laws designed to protect human health and the environment and sustain the environmental resources of the state. Enforcement works to achieve this goal by: 1) comprehensive review of inspection reports generated during inspections; 2) assign accountability to violators; 3) issue timely and appropriate enforcement actions designed to effectively obtain compliance; 4) assess and collect penalties issued to violators of state and federal environmental laws and regulations; 5) maintain environmental compliance databases; 6) provide regulatory expertise in the negotiation, litigation, and settlement of cases; and 7) provide awareness of environmental compliance. Priority is given to cases posing the greatest risk to human health or environmental resources in order to ensure prompt mitigation of any damages caused by the noncompliance.

Office of Environmental Compliance Budget Summary

Source of Funding

This program is funded with Statutory Dedications and Federal Funds. The Statutory Dedications are derived from the Environmental Trust Fund (ETF), Lead Hazard Reduction Fund, Oil Spill Contingency Fund, Waste Tire Management Fund, see table below for listing of expenditures out of each Statutory Dedicated Fund). The ETF consists of all fees assessed pursuant to the authority granted in R.S. 30:2015, and any other provisions of law authorizing the department to assess a fee. Such fees are used only for the purpose for which they were assessed. The Lead Hazard Reduction Fund consists of fees assessed pursuant to the authority granted in R.S. 30:2351, and any other provisions of the law authorizing the department to assess fees. The Waste Tire Management Fund consists of all fees assessed pursuant to the authority granted in R.S. 30:2418, and any other provisions of law authorizing the department to assess fees. These fees are utilized only for the purposes for which they are assessed. The Oil Spill Contingency Fund (RS 30:2459) consists of monies derived from fees, taxes,

penalties, and grants which are paid to the office of the oil spill coordinator as cost recoveries from responsible parties. (Per R.S. 39:36B.(8), see table below for listing of expenditures out of each Statutory Dedicated Fund.) Federal Funds consist of grants issued by the Environmental Protection Agency (EPA) for contractual and operational costs associated with: Performance Partnership Grants; Transuranic Waste Shipment; Air Quality Asbestos.

856_3000 — Office of Environmental Services

Program Authorization: La R.S. 30:2011.C (1)(d)

Program Description

The mission of the Office of Environmental Services (OES) is to ensure that the citizens of Louisiana have a clean and healthy environment to live and work in for present and future generations. This will be accomplished by establishing and assessing environmental standards, regulating pollution sources through permitting activities which are consistent with laws and regulations, by providing interface between the department and its customers, by providing improved public participation. The permitting activity will provide single entry/contact point for permitting, including a multimedia team approach; providing technical guidance for permit applications; improve permit tracking; and allow focus on applications with the highest potential for environmental impact.

The goal of OES is to maintain, protect and enhance the environment of Louisiana through establishing and assessing environmental standards, permitting and licensing, and by issuing multimedia accreditations, notifications and registrations.

The Air Permits Division's (APD's) function is to ensure the protection of air quality by issuing permits protective of human health and the environment. APD maintains and protects Louisiana's environment and natural resources by conducting comprehensive technical evaluations of incoming air permit applications. Permits must be compliant with the Clean Air Act (CAA) and the Louisiana Environmental Quality Act; accurately reflect all applicable laws and regulations; ensure compliance with federal and state air quality standards; and contain testing, monitoring, recordkeeping, and reporting requirements sufficient to assure compliance with the terms and conditions of the permit. Permit decisions are based on sound, comprehensive information that is scientifically and economically supported. Louisiana has been delegated by U.S. Environmental Protection Agency (EPA) to implement the air permitting program established by Title V of the CAA.

Other federal requirements implemented by the APD include the Prevention of Significant Deterioration program, the Non-attainment New Source Review program, and the permitting aspects of the Acid Rain Program. The APD also processes applications for other actions such as administrative amendments, authorizations to construct, changes of tank service, exemptions to test, variances, Emission Reduction Credits, and issues applicability determinations and other letters of response. While EPA retains oversight of the APD's Part 70 Operating Permits Program, no activities duplicate or overlap with those of federal government or another state agency. Nor are APD's services available elsewhere in the public sector or in the private sector. DEQ has been given jurisdiction over matters affecting the regulation of the environment within the state, including the regulation of air quality (R.S. 30:2011(A)(1)). APD also reviews and performs air quality modeling for air permits to ensure that emissions from permitted facilities will not cause a violation of air quality standards.

The Waste Permits Division (WSTPD) function is to ensure protection of the soil and groundwater resources by issuing permits and standards that are protective of human health and the environment. WSTPD performs comprehensive technical reviews of permit requests and regulatory determinations for generators, processors, and disposers of solid and hazardous waste. WSTPD issues operating and post-closure permits for hazardous waste treatment, storage, and/or disposal facilities. For solid waste, the WSTPD issues operating permits to municipal landfills, industrial landfills, construction and demolition debris landfills, surface impoundments, processors, processing transfer stations, composting facilities, and separation, woodwaste processing facilities, and waste tire processors. The WSTPD also supervises the proper closure of solid and hazardous waste management facilities. The WSTPD reviews, comments on, and approves closure plans requiring monitoring of groundwater in the vicinity of closed landfills and surface impoundments. Additionally, the WSTPD provides technical expertise and reviews groundwater monitoring reports, monitoring well installation and construction plans, assessment and corrective action monitoring reports and work plans, groundwater statistical evaluations, and plugging and abandonment of groundwater monitoring wells via the geology section. All permit applications and submittals are reviewed to ensure compliance with the Louisiana Environmental Quality Act and applicable local, state, and federal regulations. Permit decisions are based on sound scientific and economic principles, and are balanced to protect the natural resources of the state while providing an important benefit to the general public, municipalities, and industry for allowing waste to be handled in a manner that is protective of human health and the environment.

The WSTPD also reviews, processes, and responds to other requests such as solid waste beneficial reuse, one-time soil reuse, waste tire beneficial reuse, household hazardous waste collection events and facilities, local recycling collections, waste minimization plans, technical inquiries from the public, elected officials, and the regulated community. The engineering section in WSTPD is responsible for reviewing engineering specifications for components of the hazardous and solid waste proposed and active landfills, surface impoundments, and other regulated units. This section also reviews trial burns, risk burns and liner sufficiency demonstrations. The WSTPD reviews and approves hazardous waste transfer stations and regulated used oil processors. Act 662 of the 2006 Regular Session of the Legislature enacted as LA R.S. 30:2413.1 and directed the DEQ to develop and implement a comprehensive debris management plan for certain debris generated by natural disasters. The WSTPD issues pre-approvals to emergency debris sites that aid in a more efficient and effective response to natural disasters.

The Water Permits Division (WPD) function is to ensure protection of water quality by issuing permits protective of human health and the environment. WPD is delegated by the Environmental Protection Agency (EPA) to implement the Louisiana Pollutant Discharge Elimination (LPDES) program. WPD is responsible for the issuance of LPDES water permits. Other responsibilities, not related to the LPDES program, include biosolids/sewage sludge permits and registrations, and Clean Water Act water quality certifications. WPD is responsible for coordinating all water permitting and other related activities of the State's LPDES Program for approximately 12,000 permits. Water permits incorporate monitoring, record-keeping, and reporting requirements, to ensure that waters of

the state meet all water quality standards, thus protecting human health and the environment. Point source entities which discharge pollutants into surface waters of the state must apply for and obtain a water discharge permit prior to any actual discharge. WPD manages water quality certification activities; these certifications are required for all federal permits and licenses which includes every United States Army Corps of Engineers permit which involves “discharge of fill material into the waters of the United States”. The DEQ 401 Water Quality Certification assures that all dredge and fill activity permitted under a 404 permit will be protective of site specific water quality standards. WPD oversees the regulation and permitting of all generators of sewage sludge and biosolids for use or disposal. This affects all domestic wastewater treatment facilities; and selected industrial facilities. Additionally, WPD manages the registration of sewage sludge haulers. DEQ has been given jurisdiction over matters affecting the regulation of the environment within the state, including the regulation of water quality (La. R.S. 30:2001, et seq.).

The Public Participation and Permit Support Division (PPPSD) function is to facilitate public participation and provide administrative, database and certification notifications support to the media-based permit divisions. PPPSD consists of 2 Sections: Permit Support Section (PSS) and Notifications and Accreditations Section (NAS). PSS provides administrative services to the media permit divisions in processing applications and issuing permits within statutory and regulatory timelines. PSS also processes notifications for Name and Ownership changes. Permits Application Administrative Review (PAAR) Group receives and analyzes all incoming documents for OES to ensure proper placement into the DEQ’s Electronic Document Management System (EDMS). PAAR conducts all initial administrative reviews, creates permitting records in TEMPO (Tools for Environmental Management Protection Organizations), and ensures that all permit fees received are properly handled.

Public Participation Group (PPG) ensures that permits generated by OES are properly public noticed as required by state/federal regulation. The group also organizes and conducts all public hearings and/or public meetings for OES. TEMPO Support Group (TSG) manages DEQ’s database, TEMPO, used by permits, inspections, enforcement divisions, and fiscal staff to perform many of their duties. TSG converts federal and state regulations into standard database language for use in permits, inspection checklists, and enforcement documents. NAS issues multi media accreditations, notifications, and registrations. Waste, Accreditations, and Reporting (WAR) registers Solid Waste (SW) Generators and Transporters, Sewage Sludge Haulers, conducts certification testing for SW Operators; and maintains information on Annual Hazardous Waste (HW) Reports submitted by Large Quantity Generators and Treatment, Storage, and Disposal facilities (TSDs), in the Resource Conservation and Recovery Act Information database. WAR oversees asbestos and lead training of providers to ensure citizens working to remove asbestos and lead are properly trained, and verifies training and qualifications ensuring proper work practice controls to protect the public from exposure. WAR also reviews Asbestos Management Plans for schools and State buildings to ensure safety of children and adults learning and working in these buildings, and reviews project notifications to ensure contractors are licensed; approved transporters, landfills and manifests are used to track waste. Louisiana Environmental Laboratory Accreditation Program (LELAP) accredits and audits commercial

laboratories to confirm approved methods and quality to ensure accuracy, precision, and reliability of data provided to DEQ.

Office of Environmental Services Budget Summary

Source of Funding

This program is funded with Statutory Dedications, Fees and Self-generated, and Federal Funds. The Fees and Self-generated Revenues are derived from registration fees paid by participants in seminars conducted by the department. Statutory Dedications are from the Environmental Trust Fund (ETF), Clean Water State Revolving Fund (CWSRF), and Lead Hazard Reduction Fund. (Per R.S. 39:36B.(8), see table below for listing of expenditures out of each Statutory Dedicated Fund). The revenue from the ETF is derived from all fees pursuant to the authority granted in R.S. 30:2015, and any other provisions of law authorizing the department to assess fees. Such fees are used only for the purpose for which they are assessed. The CWSRF consists of Fed-

eral Funds and state match, which will be used to administer the Clean Water Grant Program. The Oil Spill Contingency Fund (RS 30:2459) consists of monies derived from fees, taxes, penalties, and grants which are paid to the office of the oil spill coordinator as cost recoveries from responsible parties. The Lead Hazard Reduction Fund consists of fees assessed pursuant to the authority granted in R.S. 30:2351, and any other provisions of the law authorizing the department to assess fees. These fees are utilized only for the purposes for which they are assessed, see table below for listing of expenditures out of each Statutory Dedicated Fund). The Waste Tire Management Fund consists of fees assessed pursuant to the authority granted in R.S. 30:2418, and any other provisions of the law authorizing the department to assess fees. These fees are utilized only for the purposes for which they are assessed. Federal funding consists of grants issued by the Environmental Protection Agency (EPA) for Performance Partnership Grant, Water Quality Management and the Louisiana Clean Diesel Grant Program, and Air Quality Asbestos Program.

856_4000 — Office of Management and Finance

Program Authorization: La. R.S. 36:8; R.S. 36:231-239; R.S. 39:1543-1544; R.S. 39:1472; R.S. 30:1-51 et. Seq

Program Description

The mission of the Office of Management & Finance is to provide effective and efficient support and resources to all of the Louisiana Department of Environmental Quality (DEQ) Offices and external customers necessary to carry out the mission of the department. The specific role of the Support Services activity is to provide financial and administrative services (property control, safety, and other general services) to the department and its employees.

The goal of the Office of Management & Finance is to administer and provide effective and efficient support and resources to all DEQ offices and external customers.

The Financial and Administrative Services activity includes Budget & Expenditure Reporting, Accounts Payable, Employee Travel Reimbursements, Billing & Data Management, Accounts Receivable, Funds Management, Grant Processing and Expenditure Reporting, Revolving Loan Financial Processing and Reporting, Contract Processing and Management, Property Control, Fleet Maintenance & Reporting, General Services Support, Motor Fuel Trust Fund Reimbursement Processing, and the Customer Service Center (call center, email services, equipment reservation services, conference line services).

The OMF Support activities include Aircraft Services, Safety & Training, Human Resources, Procurement, Information Technology, and Records Management (active and inactive records, imaging, records management policy and procedures, records management training, EDMS support). This section includes the appropriation to pay for services directly provided by the Division of Administration for: Human Resources (HR) from the Office of Human Capital Management, Procurement from the Office of State Procurement, and Information Technology (IT) from the Office of Technology Services.

Source of Funding

This program is funded with Fees and Self-Generated Revenues, Statutory Dedications and Federal Funds. Fees and Self-generated Revenues are derived from the sale of regulations, manifest forms, photocopies, etc. Statutory Dedications are derived from the Environmental Trust Fund (ETF), Hazardous Waste Site Cleanup Fund (HWSCF), Motor Fuels Underground Tank (MFUT), Waste Tire Management Fund (WTMF), and Clean Water State Revolving Fund (CWSRF). (Per R.S. 39:36B.(8), see table below for listing of expenditures out of each Statutory Dedicated fund). The ETF consists of all fees pursuant to the authority granted in R.S. 30:2015, and any other provisions of the law authorizing the department to assess fees. Such fees are only used for the purpose for which they are assessed. The HWSCF revenues are derived from the proceeds of the Hazardous Waste Tax and fines and penalties collected from the environmental offenders in accordance with R.S. 30:2205. The WTMF consists of fees pursuant to the authority of the department to assess fees. The MFUT consists of payments of fees by owners of underground motor fuels storage tanks in accordance with R.S. 30:2194 and 30:2195. The CWSRF consists of Federal Funds and state match, which will be used to administer the Clean Water State Revolving Program. Federal Funds consist of grants issued by the U.S. Environmental Protection Agency (EPA) for the general operational cost.

856_5000 — Office of Environmental Assessment

Program Authorization: La R.S. 30:2011.C(1)(b)

Program Description

The mission of the Office of Environmental Assessment is to maintain and enhance the environment of the state in order to promote and protect the health, safety and welfare of the people of Louisiana. This program provides an efficient means to develop, implement and enforce regulations, assess, inventory, monitor and analyze releases, and pursue efforts to prevent and to remediate contamination of the environment. The OEA also strives to develop plans and projects to assist stakeholders via financial assistance in environmental restoration and protection actions.

The goal of the Office of Environmental Assessment is to improve the state of environmental protection through effective planning, evaluation and monitoring of the environment.

The Air Planning Division and Assessment Division function is to evaluate the overall quality of the air resources of the state. APAD is responsible for developing and maintaining Louisiana's State Implementation Plan (SIP), which describes control strategies to address all areas within the state with regard to all federally mandated ambient air quality standards. The APAD is responsible for developing comprehensive criteria and toxic pollutant emissions inventories for Louisiana and reports these to EPA. The staff works closely with the regulated community, trade groups, and other state and federal agencies to develop and maintain high quality and current emissions data. The data is used in air modeling demonstrations, developing effective rules and regulations, "reasonable further progress" submittals (demonstrating emission reductions necessary to attain national standards) to EPA, and modeling demonstrations for air permit applications. The Air Planning and Assessment activity also operates and maintains a statewide ambient air monitoring network and provides quality assurance checks on the data produced to determine compliance with requirements of the National Ambient Air Quality Standards (NAAQS). Staff evaluates trend changes in air quality throughout the state. The division maintains the Mobile Air Monitoring Lab - a self-contained mobile laboratory capable of real-time sampling and analysis; and, develops and oversees the federally mandated vehicle Inspection and Maintenance program for areas that are not attaining the federal ozone standard. The APAD represents the department and participates directly in the development of federally required transportation conformity analyses for the state's air quality non-attainment and maintenance areas where applicable. APAD coordinates the development of required motor vehicle emissions budgets and reviews federal aid projects proposed in the state to advise project sponsors of specific general conformity requirements. The staff also performs Stage II Vapor Recovery and Stage I Comprehensive Evaluation Inspections at gasoline fueling stations to ensure compliance of air quality regulations.

The Water Planning and Assessment Division function is to evaluate the overall quality of the water resources of the state, establish and assess water quality standards, and assist with environmental restoration and protection actions. Water quality standards are established to protect the uses of the

state waters while not requiring unnecessary treatment costs for business, industries and municipalities. Water quality standards are the basis for water quality assessments, pollution allocations, and permit limits. Water quality assessments are conducted based on ambient data to determine if water bodies are impaired and are reported biennially in the integrated report. Protection plans, programs and projects are developed to assist stakeholders, local communities, organizations and citizens to plan environmental restoration and protection actions that are eligible for federal funding.

The Remediation Division (RD) functions to protect the soil, groundwater, and surface water resources of the state from unauthorized future and historical releases to the environment. The RD activity investigates, evaluates, monitors and cleans up contamination at both active facilities and abandoned sites. The RD activity universe includes hazardous waste, solid waste, groundwater, Superfund, and Brownfields sites, as well as large chemical plants and refineries. All site clean-ups, and any contaminants that may be allowed to remain at these sites, must meet the human health risk-based clean-up standards established by state regulation so that human health and the environment are protected and the properties can be safely used. The environmental evaluation and/or remediation of these properties allows contaminated properties to be returned to active commerce while achieving the goal of natural resource preservation. For example, Brownfields are underutilized sites that are either contaminated or perceived to be contaminated. These sites are evaluated and/or cleaned up so that already developed properties can be safely reused, conserving undeveloped areas for other uses. Other sites are discovered during due diligence investigations prior to commercial sales transactions where money is being loaned by banks which require property assessments and some form of environmental “clearance” from the DEQ. The assessments completed under this activity often facilitate these commercial transactions and provide for the appropriate reuse of the property in question. By cleaning up past contamination and preventing future releases, the RD promotes the restoration and preservation of three of Louisiana’s most important natural resources – land, groundwater and surface water, for the continued benefit of Louisiana’s economy and the use of future generations.

The Underground Storage Tank Division (USTD) functions to protect the soil, groundwater, and surface water resources of the state from unauthorized future and historical releases to the environment from underground storage tank (UST) sites. The USTD activity investigates, evaluates, monitors and cleans up contamination at both active and closed UST sites. All site clean-ups, and any contaminants that may be allowed to remain at these sites, must meet the human health risk-based clean-up standards established by state regulation so that human health and the environment are protected and the properties can be safely used. The environmental evaluation and/or remediation of these properties allows contaminated properties to be returned to active commerce while achieving the goal of natural resource preservation. There are approximately 10,807 USTs at 4,056 UST facilities in Louisiana. As required by the Federal Energy Act of 2005, all tanks must be inspected at least once every three years. Regulations require that these facilities must be constructed, operated, and monitored to minimize leaks, as well as to minimize leak discovery time in the event that leaks occur. USTD conducts inspections to ensure that these facilities are in compliance with regulations,

and, if a release does occur, ensures that contamination is detected quickly and cleaned up to levels protective of human health and the environment. By cleaning up past contamination and preventing future releases, the USTD promotes the restoration and preservation of three of Louisiana's most important natural resources – land, groundwater and surface water, for the continued benefit of Louisiana's economy and the use of future generations.

Office of Environmental Assessment Budget Summary

Source of Funding

This program is funded with Interagency Transfers, Statutory Dedications and Federal Funds. The Interagency Transfers are from the Coastal Protection and Restoration Authority (CPRA) for the Natural Resource Damage Assessment (NRDA) works of the Oil Spill Program. The Statutory Dedications are derived from the Environmental Trust Fund (ETF), Clean Water State Revolving Fund (CWSRF), Oil Spill Contingency Fund, and the Hazardous Waste Site Cleanup Fund. (Per R.S. 39:36B.(8), see table below for listing of expenditures out of each Statutory Dedicated Fund). The ETF consists of all fees assessed pursuant to the authority granted in R.S. 30:2015, and any other provisions of law authorizing the department to assess a fee. Such fees are used only for the purpose for which they were assessed. The CWSRF consists of Federal Funds and state match, which will be used to administer the Clean Water Grants Program and to administer the Clean Water State Revolving Loan Program. Hazardous Waste Site Cleanup Fund (R.S. 30:2205) consists of revenues which are provided from judgments, settlements, civil or criminal penalty assessments, recoveries by suit or settlement and related situations and from the tax generated by the Hazardous Waste Tax. Other funding is provided by donations, grants, gifts and legislative appropriation. The balance in the fund cannot exceed \$6 million. Excess monies are to be paid into the Environmental Trust Fund. Interest earnings are credited to the fund. The Oil Spill Contingency Fund (RS 30:2459) consists of monies derived from fees, taxes, penalties, and grants which are paid to the office of the oil spill coordinator as cost recoveries from responsible parties. (Per R.S. 39:36B.(8), see table below for listing of expenditures out of each Statutory Dedicated Fund.) Federal Funds consist of grants issued by the Environmental Protection Agency (EPA) for contractual and operational costs associated with: Air Pollution Grant; Performance Partnership Grants; Leaking Underground Storage Tank Grant; Superfund and Brownfields Grants; Water Quality Management Grant; and Ambient Air Monitoring Grant.

Professional Services

Amount	Description
\$64,910	Site Audits - To conduct performance audits of ambient air monitoring sites.
\$60,000	Risk Assessment - To evaluate conditions and threats to determine their risk to human health and the environment.
\$76,500	Ozone Episode Index Forecast - To forecast the possibility of ozone excursion episodes based on meteorological parameters and to enhance the report using the new Air Quality Index (AQI). System must be adapted for 8-hour standard and to expand the program into New Orleans, Shreveport, Lake Charles and Lafayette.

Professional Services (Continued)

Amount	Description
\$15,000	Environmental Consulting/Certification of OBD Software Updates - To provide ongoing testing and certification of On-Board Diagnostics (OBD) software updates in the vehicle inspection and maintenance program.
\$40,000	EPA Grant - To provide data to the department on particulate matter (PM) statewide to be used to determine compliance with Clean Air Act requirements regarding the health effects of the PM 2.5 standard.
\$68,590	To provide modeling support for NAAQS attainment demonstration in state implementation plans required by EPA.
\$75,000	To provide risk assessment and sampling for Colfax/Clean Harbors site.
\$400,000	TOTAL PROFESSIONAL SERVICES

Other Charges

Amount	Description
	Other Charges:
\$1,855,000	EPA Grants Nonpoint Source - The nonpoint program is implemented to control particularly difficult or serious nonpoint source pollution problems and to carry out groundwater quality protection as part of a comprehensive nonpoint source pollution control program. This includes planning, assessing, demonstration projects, technical assistance, education, training, and technology transfer for the purpose of protecting groundwater from contamination, reducing nonpoint source pollutant loading, and improving Louisiana's surface water quality.
\$2,552,882	Hazardous Waste Site Cleanup - To provide services for investigation, testing, containment, control, and cleanup for hazardous waste sites; to provide money or services for the state share of matching funds for Environmental Protection Agency (EPA) lead sites.
\$713,500	Brownfields State Response Program - To provide for outreach projects, site assessments, and site cleanup projects at Brownfields sites.
\$600,561	Gulf of Mexico Hurricanes Supplemental Funding for the Leaking Underground Storage Tank Program - To provide for site assessments and site cleanup projects at underground storage tank sites in areas affected by Hurricane Harvey.
\$472,118	Compliance Evaluation Inspections - To perform Underground Storage Tank Compliance evaluation inspections. This funding is provided by EPA to meet the recurring inspection requirements of the Energy Act.
\$772,459	LUST Trust Fund - These funds will allow DEQ to increase the pace of cleaning up UST releases into the environment that have already occurred, but have not yet been cleaned up. The current program has limited funding and the funds provided for in the ARRA will allow DEQ to respond to petroleum releases from UST's where owners and operators are unknown, unwilling, or unable to take corrective actions themselves, and in emergency situations.
\$12,000	Risk Assessment Superfund - To evaluate conditions and threats to determine their risk to human health and the environment.
\$125,000	EPA Grants 106 Monitoring Initiatives - The objective of the project is for the recipient to conduct ambient water quality monitoring. The objectives include expanding data collections and analysis as well as developing a dissolved oxygen/slope relationship in Louisiana streams. The Clean Water Act Sect. 106 authorizes funds to assist states in establishing and maintaining their overall water pollution control program.
\$4,210,845	DEQ is the designated beneficiary of the funds for Louisiana for the Volkswagen Settlement. The money will be deposited in DEQ's primary escrow account. DEQ and DNR will provide match to various school boards in the state for the purchase of buses. The total allocation to the state is \$19,948,805.30 but the money is disbursed based on projects not to exceed 1/3 in any year beginning October 2, 2017.
\$86,171	Funds will be used to enhance state permit and enforcement programs. Planned use of funds includes expanding on-line permitting capabilities, providing information technology support and services (including purchase of equipment).
\$278,829	Federal funding that will allow DEQ to provide funds for Louisiana Clean Diesel Grant Program for projects that maximize the benefits of diesel emissions reductions by retrofitting, upgrading, replacement, or reduced idling from on-road and off-road diesel engines and equipment. All projects shall use EPA or California Air Resource Board (CARB) Verified Technologies.
\$11,679,365	SUB-TOTAL OTHER CHARGES
	Interagency Transfers:

Other Charges (Continued)

Amount	Description
\$250,000	Department of Public Safety - Vehicle inspection and maintenance program for emissions controls
\$110,000	Louisiana Technical College Baton Rouge Campus - Louisiana Technical College to serve as a challenge station for the public when they have concerns about On-Board Diagnostic test results as required by 40 CFR 51.368(b).
\$2,105,422	Department of Transportation and Development - Volkswagen Contract
\$5,800	Division of Administration - State Printing Fees
\$82,330	Building Rent for Air Field Services
\$77,775	Office of Telecommunications Management - Telephone Costs
\$5,000	Utilities for Air Field Services
\$2,636,327	SUB-TOTAL INTERAGENCY TRANSFERS
\$14,315,692	TOTAL OTHER CHARGES

Acquisitions and Major Repairs

Amount	Description
\$500,000	Various replacement equipment for air assessment/monitoring program - Thermo 55i Methane/Non-Methane Analyzer, Xonteck Model 911 Canister Sampler, Xonteck 912 Multicanister Sampler, Zero Air Generator, Mesa Lab Defender 530+ Low Flow, Mesa Lab Defender 530+ High Flow, H2S Analyzer, SO2 (API Model #T100), Ozone Analyzer, Calibrator (API Model #T700), Ozone Primary Source Calibrator, PM Mass Analyzer, Auxiliary Flow System, TRS Analyzer - American ECOTECH Serinus 57, and Tisch Environmental TE-1000 PUF+BL w/ calibration kit TE-5040-PP.
\$270,000	Replacement vehicles.
\$770,000	TOTAL ACQUISITIONS

Performance Information

1. (KEY) Through the Air Planning and Assessment Activity, to assess and protect the general public's safety regarding ambient air quality analysis statewide in FY 2019-2020.

K	Percent of official fish consumption advisories posted within 30 days on DEQ website (LAPAS CODE - 26016)	95%	100%	95%	95%	95%	95%

Office of Environmental Assessment General Performance Information

Performance Indicator Name	Performance Indicator Values				
	Prior Year Actual FY 2013-2014	Prior Year Actual FY 2014-2015	Prior Year Actual FY 2015-2016	Prior Year Actual FY 2016-2017	Prior Year Actual FY 2017-2018
Number of data packages evaluated for technical acceptability (LAPAS CODE - 25085)	825	884	995	827	1,007

In FY 2017-2018, Performance Indicator 25085 was moved from the Office of Environmental Services Water Permitting Activity.

3. (KEY) Through the Remediation Activity, to investigate and clean up uncontrolled contamination and/or monitor on-going remediation at abandoned properties and active or closed facilities. During FY 2019-2020, this Activity will restore 120 sites by making them safe for reuse and available for redevelopment.

	Prior Year Actual FY 2013-2014	Prior Year Actual FY 2014-2015	Prior Year Actual FY 2015-2016	Prior Year Actual FY 2016-2017	Prior Year Actual FY 2017-2018
Cumulative number of sites returned to active commerce through DEQ's Voluntary Remediation Program (VRP) (LAPAS CODE - 15783)	78	81	86	90	95
Cumulative number of Government Performance Result Act (GPRA) facilities with remedies selected for the entire facility (LAPAS CODE - 22206)	41	42	43	45	47
<p>There are 64 hazardous waste Resource Conservation and Recovery Act facilities in Louisiana ranked and classified by U.S. Environmental Agency as GPRA facilities. In FY 2017-2018 this indicator is converted to a General Performance Information indicator because it no longer accurately and reliably reflects the activities and level of effort put forth by this Division. This indicator is now best reported as a GPI.</p>					
Cumulative number of GPRA facilities with remedy completed or remedy construction completed for the entire facility (LAPAS CODE - 22208)	33	35	38	39	40
<p>There are 64 hazardous waste Resource Conservation and Recovery Act facilities in Louisiana ranked and classified by U.S. Environmental Agency as GPRA facilities. In FY 2017-2018 this indicator is converted to a General Performance Information indicator because it no longer accurately and reliably reflects the activities and level of effort put forth by this Division. This indicator is now best reported as a GPI.</p>					

4. (KEY) Through the Remediation Activity, to direct the determination of the extent of contamination both laterally and vertically at sites with pollution and to protect the soil and groundwater resources of the state. During FY 2019-2020, this Activity will review 95% of the soil and groundwater investigation work plans and corrective action work plans received in FY 2019-2020.
