Disaster Damage:

Hurricane Katrina and Rita legacy to coastal Louisiana was an unprecedented wake of death, destruction and devastation. Taken together, 1,464 people lost their lives, more than 200,000 homes and 18,000 businesses were destroyed and billions of dollars in property was impacted. Hurricane Katrina approached New Orleans and the Louisiana-Mississippi state border on August 29, 2005 at a Category 5 level, and the fifth-strongest ever recorded hurricane. Before reaching land it was downgraded to a Category 3, but caused massive destruction and severe damage up to 76 miles east of the storm's center. Orleans, Plaquemines, and St. Bernard Parishes suffered widespread flooding as a result of storm surge overtopping or breaching area levees. Along the north shore of Lake Pontchartrain, up to six feet of water inundated the cities of Mandeville and Slidell. The City of New Orleans was under a mandatory evacuation for more than a month. Less than a month later on September 24, Hurricane Rita, the second strongest ever to enter the Gulf of Mexico came ashore, also as a Category 3, and flooded the coastal areas of southwestern Louisiana in the area around Lake Charles, impacting nearly a half million households. Hurricane Katrina will most likely be categorized as the third deadliest and the costliest storm in U. S. history. While hurricane Rita exacted a lower death toll, taken together, these storms wrought catastrophic destruction on the Louisiana coastal areas, exacting an enormous toll on the material, financial and emotional resources of hundreds of thousands of Louisianans. While the impact was wide-spread and indiscriminate of income and social status, the impact of the hurricanes on the poor was particularly devastating, especially in Orleans Parish where the U.S. Census in 2000 reports only a 46.5% homeownership rate (compared to 67.9% in the State), a median household income of \$27,133 (compared to \$32,566 in the State), and a poverty rate of 27.9% (compared to a state rate of 19.6%). In contrast, while Calcasieu, Cameron, Plaquemines and St. Bernard Parishes sustained major damage, they had higher homeownership rates (ranging between 71% and 85%), higher median incomes (ranging between \$34,000 and \$38,000) and lower poverty rates (12% to 18%). The concentration and number of persons in extreme poverty neighborhoods exacerbated the negative impact on the poor principally in New Orleans. According to the Brookings Institution (October 2005), one out of every four neighborhoods in the city of New Orleans was classified as an "extreme-poverty" neighborhood, with at least 40% of its residents living below the federal poverty threshold. These 47 neighborhoods were home to nearly 100,000 residents and had an average household income which lagged the City's by over \$17,000. The Congressional Research Service (CRS) calculates that the poverty rate in the flooded and damaged areas in the State of Louisiana was 21.4%, confirming the widespread sentiment that high poverty neighborhoods were disproportionately flooded (CRS, November 4, 2005). The social impacts were also greater for those most vulnerable before the storms. These individuals were less connected to the workforce, had educational disadvantages, were elderly or disabled, or were children. Nearly 90,000 persons aged 65 and older were likely displaced by the storms, many of whom lived alone and had at least one disability. Displaced aged persons al

Disaster Damage:

so were poor (an estimated 15%) and one quarter lacked vehicles. The child poverty rate in the areas affected by the hurricanes was over 30% (CRS, November 4, 2005). The fragility of the most affected populations places a greater burden on the federal, state and local resources available for recovery efforts. The poor standing of the impacted population before the hurricanes severely stretches Louisiana's state and local resources, making the need for federal assistance even more critical.

Recovery Needs:

The current and projected financial impact on Louisiana from Hurricanes Katrina and Rita has reached into the tens of billions of dollars, according to estimates from a number of groups, think tanks and government agencies. Given the extensiveness of the damage, there is a great deal of uncertainty regarding estimates of the impact on property, on governments and on the economy. The variation in the estimates of different organizations creates a greater challenge for the State in assessing its needs and the resources necessary to address those needs. For example, according to preliminary estimates from the Louisiana Recovery Authority (LRA), the Governor's State-wide coordinating

body for all recovery efforts, the 2005 hurricanes had an impact of \$75 - \$100 billion on property and infrastructure and \$15 - \$20 billion in temporary relief services. However, the Federal Emergency Management Agency (FEMA) projects an \$18 - \$25 billion impact on property and infrastructure. For the State's economy, the LRA states that the storms are expected to inflict from \$50 - \$70 billion in losses to Louisiana's economy (defined as nominal Gross State Product) and cause \$8 - \$10 billion in lost state and local revenue over the next five years. On the other hand, the Louisiana Legislative Fiscal Office projects a \$40 - \$60 billion impact on the economy and a \$4 - \$8 billion in lost revenues. Even before the hurricanes, the State was in a precarious situation, with many unmet needs in the areas of infrastructure, education, economic investment, health care and social services. The impact of the storms on the executive budget and on state revenues makes it even more difficult to deal with the critical needs caused by the hurricanes without substantial assistance from the federal government. According to FEMA, the total number of applicants for FEMA assistance related to hurricanes Katrina and Rita was 1.89 million as of January 10, 2006. These applicants have received individual level assistance such as clothing, food, and temporary housing as described below. Additional resources are needed for the estimated 900 families or 2,700 people that have exhausted the subsidized hotel room assistance as of February 7, 2006.

Overall Progress Narrative:

The Disaster Recovery Unit of Louisiana's Office of Community Development (OCD) continues to develop and implement recovery programs approved by HUD and supported via federal and state funding. Within the three major

areas of housing, infrastructure, and economic development, the OCD has continued working this quarter on the original 10 programs and 12 new ones to address myriad dimensions of our nation's costliest disasters. OCD's plans and program designs continue to respond to HUD directives, citizen input, and local officials' concerns. Even as policies and procedures adjust to a dynamic administrative environment, solid progress is evident on several fronts. Particularly noteworthy are the milestones achieved in the Homeowner's Assistance program. As of March 31, 2007, 120,789 applications have been received and recorded; 93,037 appointments have been held; and 5,708 homeowners have closed on their homes thereby receiving awards to help rebuild their lives. This program, also known as the Road Home program, is the OCD's most complex activity and the single largest housing program ever undertaken in US history. An additional advancement in this program is seen in the increase in the pace with which awards are distributed. The OCD has taken strides forward in infrastructure and economic development as well. The structures for several programs now are established. For numerous programs, requests for proposals (RFPs) have been issued, proposals have been reviewed, and contract negotiations are well underway. The State of Louisiana has built upon the progress from the previous quarter, achieved notable success in this quarter, and is poised for even more demonstrable results in the next quarter.

Activity Description:

Supports the administrative work conducted to implement disaster recovery projects funded with these resources. This includes technical assistance as well as general administrative costs.

Location Description:

Office of Community Development (OCD)

Activity Progress Narrative:

The Disaster Recovery Unit (DRU) of the Office of Community Development (OCD), Division of Administration (DOA), was created in the aftermath of the 2005 Hurricanes Katrina and Rita. The DRU administers the CDBG Disaster Recovery funds approved by Congress on December 23, 2005. Personnel were hired from within Louisiana and around the United States with experience in all aspects of CDBG programs. Managers and staff were retained in the areas of homeownership housing, multifamily/rental/supportive housing, infrastructure, economic development, policy and reporting, legal, and financial and auditing. Experienced employees of the Office of Community Development, CDBG Program, provide training as needed to new hires. In addition, the OCD supplied CDBG “boot camp” training in partnership with the Council of State Community Development Agencies. The DOA’s resources are available to augment the DRU with expertise in budgeting, accounting, reporting, contract review and legal matters. The DRU is in close contact with the Louisiana Legislative Auditors. Currently, 8 auditors are assigned to the DRU. We are planning on adding 4 more auditors in the near future.

At present, there are 49 people working in the DRU. The DRU received approval in September 2006 to raise our total number of staff to 86. This does not include the 30 approved LRA positions. Currently, there 37 vacant positions. The administrative budget is used to fund salaries and related benefits, travel expenses, operating supplies and services, professional services, and inter-agency transfers. Community meetings have been held throughout the impacted parishes and in cities with large numbers of evacuees. These meetings have raised citizen awareness of the recovery programs. Importantly, the meetings also have served as forums for citizens to discuss their needs and priorities for disaster recovery needs and priorities that our office will take into account in our programs. The state follows the State Procurement Code. All sub-recipients are required to follow Title 24 Part 84 and Part 85. Monitoring plans are being developed for the new disaster recovery activities funded under this program. The obligated and expended amounts for this quarter reflect the summation of the total administrative and technical assistance costs. The total expended and obligated technical assistance costs are \$1,397.16 and \$7,293.82, respectively. These are added into the total Admin expended and obligated above.

Match Contributed	\$0.00	\$0.00

Activity Description:

Without special assistance being provided to local governments, it is expected that a major impediment to housing development will be the lack of building, electrical and plumbing inspectors and permit processing staff. In addition, architects and builders will need inspectors and plan reviewers to help communities adapt to the new State Uniform Construction Code and to interpret the latest available advisory base flood elevations. Therefore, the State has budgeted \$13,090,000 for the hiring and training of such staff for local government over a number of years, based on the numbers of damaged/destroyed units in each parish. It is expected that this amount will fund at least 70 field inspectors and plan reviewers, as well as a limited number of support staff. The State will also support the expansion of code enforcement capacity by sponsoring additional training opportunities for inspectors, engineers and architects. While building code enforcement by local authorities will be supported by permitting and inspection fees in the long run, this initial CDBG funding is necessary to immediately expand enforcement capacity to expedite the construction of safer and stronger homes where the storm impact was most concentrated. Until the activity is started, the exact number of buildings and housing units that are brought up to code is unknown.

Location Description:

Orleans Parish.

Activity Progress Narrative:

As of March 2007, the Louisiana Institute for Building Technology and Safety (LA IBTS) had deployed 78 personnel to assist with code inspections, plan evaluations, code permitting, and training in the 11 parishes most impacted by Hurricanes Katrina and Rita: Orleans; Jefferson; St. Bernard; St. Tammany; Calcasieu; Plaquemines; Vermillion; Terrebonne; Cameron; Washington; and Iberia. Based on Memorandums of Understanding entered into by the Department of Public Safety (DPS), these personnel are currently deployed in ten of the eleven parishes and in 12 separate cities. Although Iberia Parish has yet to request assistance, one of its municipalities has. Quarterly Slum & Blight and Urgent Need activities include, respectively: Plan Reviews - 179, 968; Building Inspections - 3319, 5395; Electrical Inspections - 4630, 6022; Mechanical Inspections - 0, 1188;

and Plumbing Inspections - 0, 2412. Number of individuals trained in the Slum and Blight area (Orleans Parish) this quarter is 0, while the total number trained is 54. This is only a six month contract, but already the parishes and cities are requesting assistance for at least another year.

Match Contributed	\$0.00	\$0.00

Activity Description:

This program provided temporary six-month working capital loan guarantees to owners of small businesses with less than 100 employees. There were three different releases of bridge loan funds. Each release varied slightly in how it was administered. The first bridge loan program was for \$10 million, the second totaled \$30 million and the last installment totaled \$55 million. The Bridge Loan program had no leverage requirement; therefore, information on the amount of private funds generated by the businesses is unavailable. The number of businesses reported could include businesses that have more than one bridge loan.

Location Description:

In Hurricanes Katrina and Rita affected parishes.

Activity Progress Narrative:

HUD approved the Bridge Loan Program May 9, 2006, as a part of the State's Initial Action Plan. On February 10, 2006, a Cooperative Endeavor was entered into between the Louisiana Public Facilities Authority (LPFA), Louisiana Economic Development (LED), and the Division of Administration (DOA), which obligated \$30,000,000 in State CDBG funds to be utilized in the Extended Bridge Loan program. That agreement was amended, on June 20, 2006, to include \$10,000,000 to cover the cost of the Emergency Bridge Loan program that was originally funded by LED, as well as \$55,000,000 to be utilized in the Enhanced Bridge Loan Program. Prior to the Enhanced Loan program being implemented, a change in geographical location of beneficiaries was requested through the submittal of a substantial amendment that was approved by HUD on September 15, 2006. This amendment revised the allocation language from a 50% allocation to the thirteen most impacted parishes, to a minimum of 50% will be allocated to the thirteen most impacted parishes, and up to 50% allocated to the other twenty-four impacted parishes. This change transpired due to the demand for loan guarantees amounting to \$8,820,765 in the most impacted areas. Also, during the previous quarter, the Extended BL made a total of 325 loan guarantees totaling \$28,696,080

in a 37 parish area. An estimated 3,872 jobs were reported as being created or retained as a result of the first two Bridge Loan Programs. The Enhanced BL program deadline was December 29, 2006. There were a total of 57 loans guaranteed, for a principal sum of \$ 5,409,427 for this BL program. The estimated number of jobs created and retained will be 304. The total amount paid this quarter for Bridge Loan principal is \$1,985,300.

Activity Description:

The State developed a program to strengthen community-based nonprofits and/or faith-based institutions already providing housing recovery services through the investment of \$2,070,000 of CDBG funds in their activities. The funds will be used to provide housing counseling and outreach to homeowners accessing assistance under the Road Home homeowner assistance program, as well as those homeowners who have not yet completed a Road Home application. This CDBG funded activity will also be utilized for limited legal services to assist mostly low-income clients seeking assistance from the Road Home homeowner assistance program. Services to be provided shall be on a state-wide as-needed basis. Outreach and Housing Counseling assistance may be provided on a limited basis to displaced homeowners living out of state. A single non-profit organization will be selected through an RFP process to provide coordination and administrative oversight in the delivery of the legal services through that organization as well as through other qualified non-profit organizations. The successful proposer may either subcontract services through other non-profit organizations to be approved by the State or the proposer may be a consortium of non-profits with a single designated principal organization for contracting and management purposes. For the housing counseling services, the mechanism for making these services available will be through the use of a prime contractor that would be responsible for identifying and assembling a geographically diverse group of nonprofit partners who collectively could provide these services. The selected contractor would be required to provide the variety of assistance that is needed for the preparation of a Road Home application. This includes transportation needs for displaced homeowners in the rural area parishes of the state so that homeowners with transportation challenges can attend required entrance and closing interviews at the Homeowner Assistance Center. In addition, support and application assistance to individuals in the form of language translation for individuals that have language barriers as is many times the case with applicants who are native Spanish, Vietnamese and French language users. Literacy support for individuals with low literacy levels that will experience challenges in understanding program requirements and associated paperwork is necessary. Support for persons with physical disabilities that may hinder them from completing the application process must be provided. Lastly, general support and guidance to the elderly in completing their application is essential for them to achieve maximum benefit under the program. The assistance provided under this section may also include helping clients gather all supporting documents required to complete an application from any relevant source agencies. Provision of document fee support is an allowable expense up to a certain limit. Activity Description:

The Housing Development Loan Fund would provide seed funding for a contractor or state agency to establish one or more loan funds that offer acquisition and predevelopment financing on flexible terms to developers of the most critically needed housing. Providing early, high-risk capital will be a powerful incentive for developers to build mixed-income housing in the communities that lost the most housing. Loans would be made to nonprofit and for-profit developers of new rental and single-family housing that is affordable to families with incomes that are below the area median, with a strong preference for well-designed residential communities and infill housing developments that also include families with incomes higher than the area median. The Housing Development Loan Fund would be operated by a state agency or an experienced community development loan fund manager. A total of \$16,570,000 in CDBG funds, including fund management costs, will be invested as "top loss" capital in order to leverage an estimated \$30 million in additional lending capital. As two priorities, the loan fund would target developers participating in the rental assistance programs described in the previous section, as well as developers of mixed-income for-sale housing. As projects close their construction financing, the acquisition/predevelopment loans would be repaid and the lending capital would become available for additional investments. In a three-year period, it is expected that the funds will recycle two to three times. This program is scheduled to close 40 loans. During this quarter 1 loan was received, reviewed and completed. As currently planned, the Housing Development Loan Fund would be operated on a contractual basis by one or more qualified financial institutions that are experienced in providing early-stage, high-risk property acquisition and predevelopment loans, as an incentive for developers to rebuild existing housing or build new housing at different price points, including affordable homes and rental units. These types of loans are typically not offered by conventional lenders, but instead by the numerous so-called "community development loan funds" across the country. These loan funds are able to take higher risks in lending by attracting risk-tolerant capital and guarantees from foundations and socially motivated investors. The goal should be to lend the funds at 0% and to subordinate these loans to the private capital in order to provide a strong incentive for developers and to leverage private capital. Many such funds receive some of their capital as grants from the Community Development Financial Institutions (CDFI) Fund of the Department of Treasury. Congress specifically directed the states receiving supplemental CDBG funding should consider the use of up to \$20 million to fund recovery activities of two organizations that are experienced in operating such loan funds: Enterprise Community Partners, Inc., and Local Initiatives Support Corporation.

Location Description:

Disaster affected parishes

Activity Progress Narrative:

The Housing Development Loan Fund program is combined contractually with the Land Assembly Operations program. A meeting is scheduled with Local Initiatives Support Corporation (LISC) and Enterprise Community Partners Inc. for April 13 to finalize programmatic details and DRU requirements. Launch of this program is planned for late April.

Activity Description:

HUD approved the release of funds for the Research Commercialization and Educational Enhancement Program; outlined in OCD's Action Plan One, Amendment 5; on January 3, 2007, to provide funding to retain and rebuild the research and educational capacity of the affected areas by developing a strategic plan and a pilot program based on the strategic plan. Eligible applicants would be limited to institutions of higher education in southeastern Louisiana. Action Plan One Amendment 5 declares eligible applicants are limited to institutions of higher education in the southeastern Louisiana: Baptist Theological Seminary, Delgado Community College, Dillard University, LSU Agricultural Center (hurricane-impacted facilities), LSU Health Sciences Center-New Orleans, Louisiana Universities Marine Consortium, Loyola University New Orleans, McNeese State University, Nunez Community College, Our Lady of Holy Cross College, Southern University-New Orleans, SOWELA Technical Community College, Tulane Health Sciences Center, Tulane University, University of New Orleans, and Xavier University of Louisiana.

Activity Description:

As prescribed by program rules, the State must adhere to HUD's regulations with respect to oversight of compliance with environmental statutes and authorities. The State has developed comprehensive procedures to ensure compliance with HUD's CDBG program regulations for each funded project. The State will verify that each project that requires it has been environmentally cleared prior to any construction activity. In order to ensure that this responsibility is fulfilled, the services of an environmental consulting firm, Environs, will be engaged to evaluate and provide written analysis for a broad range of environmental studies. These evaluations will follow applicable laws and regulations, which may include the National Environmental Protection Act (NEPA) environmental review procedures relating to HUD-CDBG activities, and/or other local, state or federal environmental laws. Once the contract is signed, Environs will be responsible for the environmental review for approximately 2000 state buildings, as well as site-specific review of approximately 2,950 small rental units (from 1-4 units) to determine if historic preservation issues, such as historic structures and archaeological artifacts, are cleared before any new construction or reconstruction begins. These will be handled through the Environmental Section of OCD-DRU through the use of work orders and regular updates that are sent by Environs.

Location Description:

Activity Description:

In hurricane-impacted areas, many organizations serving the homeless lost facilities, housing capacity, shelter beds, and staff. Thirty-six shelters sustained considerable damage, and capacity to house up to 1,759 homeless individuals (i.e., 1,759 residential "beds" operated by "Continuum of Care" organizations serving the homeless) was lost. After the hurricane there were reports that an increased number of persons were living on the streets or in parks, cars, and abandoned or uninhabitable buildings in the impacted areas. Many of these persons were not homeless prior to the storms. The proposed \$25.9 million will support the State’s goal to immediately restore and expand capacity in hurricane impacted areas and provide permanent supportive housing and assistance for persons and families who are homeless and persons at-risk of becoming homeless who are low wage workers, unemployed, victims of domestic violence, low-income seniors, and/or low-income persons with any type of substantial disability (including physical or sensory disability, cognitive disability, chronic health problems, mental illness, or addictive disorders). The proposal allows for funding to be prioritized as follows: The highest priority for the use of these funds will be to repair and restore shelter capacity, transitional housing and permanent supportive housing that existed prior to Hurricanes Katrina and Rita. The cost of restoring this capacity is estimated to be \$3 to \$5 million. Priority for these funds will be given to members of the Continuums of Care. Non-member organizations may apply for funding but should document pre-storm homeless efforts in the community and indicate a commitment to coordinating with the local Continuums of Care upon receipt of these funds. A second priority will be the acquisition and rehabilitation of new permanent supportive housing and services by non-profits in the hurricane-affected areas. This priority also includes the option of funding rental assistance (i.e., "bridge funding") linked to permanent supportive housing. The prioritization of non-profits is based on the understanding that some non-profit groups working with homeless and at-risk populations will not have the capacity to apply for tax credits and supportive services funds through the "piggyback" program. This program plans to create 550 beds for the low income individuals needing temporary shelter, provide assistance to 2,400 low income households, and assist 2,400 homeless.

Location Description:

Disaster affected parishes.

Activity Progress Narrative:

The state entered into an interagency agreement with the Department of Social Services (DSS) effective March 27, 2007. The first priority for use of the \$25.9 million in CDBG funds is to restore storm-damaged homeless shelters in the most heavily impacted parishes. A Request for Proposals was advertised in January, 2007. Proposals submitted by March 2, 2007 were evaluated for awards. DSS announced that \$2.1 million would be awarded to three local entities for repairs at 25 homeless facilities in the parishes of Orleans, St. Tammany, and Calcasieu. The repairs will restore 547, or approximately 32%, of an estimated 1,700 beds lost during the storms. The awards are to Unity of Greater New Orleans (\$1,400,490 for 433 beds at 11 facilities), South West Louisiana Homeless Coalition (\$399,966 for 60 beds at 13 facilities) and St. Tammany Parish (\$254,818 for 54 beds at one facility). The second priority is to initiate the Homeless Prevention and Rapid Rehousing portion of the program. Total funding for this program is \$6.2 million. Of that, \$4 million is being allocated to impacted parishes and the balance to the remainder of the state. Additionally, \$2.5 million is being made available in PSH Interim Rental Assistance for the most vulnerable population including the homeless, disabled homeless, children aging out of Foster Care and other groups targeted by DSS. These funds are being allocated to Local Continuums of Care organizations or local governments to address homeless prevention and move-in expenses, Housing First supportive services and Housing First rental assistance. The RFP for the Homeless Prevention and Rapid Rehousing program is scheduled to be released March 30, 2007.

Total Funds Expended	\$0.00	\$0.00
Louisiana Department of Education	\$0.00	\$0.00
Match Contributed	\$0.00	\$0.00

Activity Description:

Of the \$595 million now allocated to local emergency government infrastructure, \$200 million is allocated for Primary and Secondary Education Infrastructure. Working with the LRA, the Department of Education will develop needs-based criteria to prioritize the allocation of the funds to the school districts. These funds will flow to the affected school districts through the Office of Community Development. Schools that are repaired or rebuilt shall demonstrate they have taken into account specific educational and repair goals to build back better facilities. In addition, rebuilding plans will address local community planning priorities, including opportunities for shared use of school facilities with other public agencies, such as libraries. The performance measures the State of Louisiana would like to report are as follows: Expected Low Mod Total # of School Districts Benefiting 0/3 0/16 # of Facilities Rehabilitated/Built 0/60 0/100

Location Description:

Disaster affected parishes

Activity Progress Narrative:

The purpose of the Primary and Secondary Education program is to provide funding for non-FEMA eligible schools that were damaged by the storms. Working with the LRA, the Department of Education (DOE) has developed needs-based criteria to prioritize the allocation of the funds to the school districts. Schools that are repaired and/or rebuilt shall demonstrate they have taken into account specific educational and repair goals to surpass the quality of the original facilities. In addition, rebuilding plans will address local community planning priorities, including opportunities for shared use of school facilities with other public agencies such as libraries. The DOE Recovery School District in New Orleans currently has over \$35 million in contracts for the repair of 17 schools. The application form and process have been tested and will be available to all potential applicants in April,

2007.

Total Funds Expended	\$0.00	\$0.00
Match Contributed	\$0.00	\$0.00

Activity Description:

The Land Assembly component of the housing program will serve as an additional way to jump-start development in the communities that lost the most housing as a result of hurricanes Katrina and Rita. This will be done by providing seed money to acquire multiple properties in good locations for replacement housing and package them for sale or grant to maximize further affordable housing development for example, to developers using CDBG-supported LIHTC tax incentives to develop rental housing, to supportive housing developers, to self-help ownership housing developers, etc. This program component will operate only in those jurisdictions where: 1. These activities are requested or supported by local governments; and 2. Local governments have substantially engaged in the planning work required to target areas that are suitable for the development of replacement housing. A total of \$2,070,000 of CDBG funds are budgeted for capital to purchase residential properties as well as operating costs. The capital used to purchase properties will be recycled through sales of properties to developers. As a related activity, properties assembled through buy-out programs, funded through the State's homeowner assistance program, might be offered at below-market costs to developers of affordable or special needs housing. One of the targets of these sales of State-purchased properties would be to encourage the development of mixed income developments that include renters with incomes below 40% of area median income. If such assembled properties were not purchased and developed by affordable developers in accordance with strict income requirements, they still might carry a requirement that a certain percentage of the units developed on CDBG assembled land would be affordable with less stringent income and pricing requirements, but still ensuring that mixed-income developments occur in redevelopment areas. However, the \$2 million Land Assembly fund is fundamentally different from and should not be confused with the buyout provisions of the Homeowner Assistance Program. This budget line item is not intended for purchases of single-family homes. Instead, the intention is to contract out to one or more qualified organizations that can identify suitable sites for housing development in the most distressed parishes and obtain options on them. The State intends, through contractual arrangements, to fund a small team of property acquisition experts who will scout out, analyze and obtain options on suitable sites that are not currently on the open market. These could include surplus properties held by government agencies, nonprofits, churches and businesses. Some might be Brownfield sites that could be cleaned up quickly and at feasible costs. This Land Assembly operation would result in assignable options in the name of the State of Louisiana or some designated quasi-public entity. These options, in turn, would be offered to developers on an open, competitive basis.

Location Description:

Disaster affected parishes

Activity Progress Narrative:

The Land Assembly Operations program is combined contractually with the Housing Development Loan Fund program. A meeting is scheduled with Local Initiatives Support Corporation (LISC) and Enterprise Community Partners Inc. for April 13 to finalize programmatic details and DRU requirements. Launch of this program is planned for late April.

Activity Description:

The Long Term Recovery Loan Guarantee Program would be targeted to small firms that meet any of the following criteria: ¿ Were rejected or deemed ineligible for SBA loans; ¿ Did not apply for an SBA loan for good cause; or ¿ Are in need of long-term loans for permanent repair or replacement of buildings, repair or purchase of replacement equipment and inventory. Louisiana will seek to use the infrastructure already in place through the Bridge Loan Program, a cooperative agreement with quasi-public organizations and local banks in the affected parishes to deliver the loans that will be guaranteed through this program. Under the Bridge Loan Program, there have been 22 participating banks throughout the affected parishes.

Activity Description:

For this program, please see Activity Description in Louisiana Katrina/Rita Disaster Grant 2.

Location Description:

Disaster affected parishes.

Activity Progress Narrative:

The State's CDBG funds will provide about \$440M in gap financing and Project Based Rental Assistance in order to assist 33 projects that will create more than 5,700 new or restored rental units in storm damaged areas. The LIHTC-CDBG Piggyback Program will combine the resources of Gulf Opportunity Zone Tax Credits, CDBG funding, Section 8 project based housing vouchers, and leveraged private investments to generate the rental units. The program will support the development of mixed-income communities and ensure the restoration of rental housing in the most heavily impacted parishes. Eligible applicants were developers who applied for Low Income Housing Tax Credits. The primary method of award was to sponsors who applied for the received GO Zone credits under the 2007/2008 LIHTC allocation rounds administered by the Louisiana Housing Finance Agency. The CDBG funds were allocated among three pools identified as Mixed-Income, Additional Affordability, and Public Housing Authority Redevelopments. In most cases, these mixed income developments contained at least 60% market rate units and at least 20% deeply targeted units - affordable to households earning less than 40% of the Area Median Income. Funding was available in the form of either project based rental assistance, gap financing, or a combination thereof. All 33 developments assisted with Tax Credits and CDBG will provide at least 5 percent of their units for Permanent Supportive Housing (PSH). Many will provide more PSH units than the required set aside. This effort represents the first major development of PSH in the State of Louisiana and the very first PSH units to be provided in mixed income settings. The program was available with the rollout of the 2007/2008 GO Zone LIHTC Qualified Allocation Plan. The Program Description was approved by OCD and the LRA. The plan was presented to developers at a series of LHFA Developers Meetings in August

and September of 2006. The application deadline for the 2007 Tax Credit Applications was October 20, 2006 with reservation of credits made on December 13, 2006. Award Acceptance Agreements were mailed to the 33 projects receiving the Piggyback awards on December 21, 2006 and all were returned to OCD by the January 5, 2007 deadline. OCD is in the process of conducting environmental reviews on all projects and initial loan closings are expected to begin in early May. All expenditures to date are for consulting fees paid to ICF International.

Activity Description:

In the wake of the devastation wrought by Hurricanes Katrina and Rita, Governor Blanco established the Louisiana Recovery Authority (LRA) to plan the recovery and rebuilding of Louisiana. The LRA was established by Executive Order KBB 2005-63 on October 17, 2005. Due to the unprecedented scale of destruction to southern Louisiana, the Governor determined that a single state agency should coordinate the resources committed by various state, federal, and private entities toward disaster recovery. The LRA coordinates, leverages, and targets these newly committed resources with existing state and federal resources to improve their efficiency and effectiveness and to avoid duplication of efforts. In accord with the scale of the disaster, LRA's planning responsibilities are broad in scope. The LRA is charged with securing funding and other resources for recovery efforts. The LRA has established priorities and continues to develop strategies for disaster recovery. The LRA leads long-term community and regional planning efforts and works to ensure transparency and accountability. It also assists coordination of resource allocations as it pertains to issues that may include, but are not limited to the following: 1) economic and workforce development; 2) environmental quality and review; 3) temporary and permanent housing; 4) healthcare; 5) infrastructure and transportation; 6) education; 7) fiscal stability; 8) family services; and 9) law and order.

Location Description:

Disaster affected parishes.

Activity Progress Narrative:

Through the work of its various committees and task forces, the Louisiana Recovery Authority (LRA) has developed a series of strategic priorities and recovery plans in the areas of housing, infrastructure and economic development. The LRA has led the development of recovery policy and initiatives in the areas of housing, infrastructure, and economic development. These initiatives overlap with policy and planning in areas of health care, social services, education, and other subjects. The majority of LRA's work on the development, passage, submission and implementation of CDBG action plans has been tied to policies on housing, infrastructure and economic development -- the bedrocks of recovery. During this most recent quarter, the

LRA has focused heavily on economic and workforce development program development and implementation; infrastructure recovery programs and implementation issues, including education infrastructure design considerations; homeowner and rental housing program policy and implementation oversight issues; and community and regional planning efforts related to recovery priorities. Regarding the long-term planning process, the LRA collaborated with the AIA and APA to develop rebuilding principles, upon which the LRA initiated a planning effort called Louisiana Speaks. This is a multifaceted planning initiative designed to address planning at every level. This extends from community planning such as the Unified New Orleans Plan (the LRA has supported UNOP through the recruitment of \$3 million in private funding from the Rockefeller Foundation and the commitment of \$2 million in CDBG funds for outreach, including communications and input with the New Orleans diaspora) to other parish-wide comprehensive, long-term recovery strategies in collaboration with FEMA in the most severely impacted parishes. Lastly, Louisiana Speaks has engaged a team of top local and national planning experts to gather public input and support the development of a regional vision for South Louisiana that will guide recovery and long-term growth. Over the last year, Louisiana Speaks has surveyed more than 2,500 Louisiana citizens, including residents who are back home and those who are displaced, and brought together nearly 1,000 stakeholders for a series of hands-on workshops. During day-long sessions, participants provided critical and creative input for shaping policy on coastal restoration and storm protection; community growth and transportation infrastructure; and economic development and equity. During the most recent quarter, Louisiana Speaks has launched for the public at large to weigh in on recovery priorities resulting from the year-long input process that has occurred throughout the affected areas. The resulting long term recovery strategic plan will be published at the conclusion of this process. Funds from the planning allocation are also being used to support recovery planning capacity at the parish level, to assist in the implementation of recovery plans, development of production and printed materials related to Louisiana Speaks public input and final products, and funding for parish planner to be trained on implementation of the Smart Code. Because the availability and affordability of insurance in coastal Louisiana has been an impediment to recovery, the LRA also continues to explore strategies for reducing the burden of insurance on all those affected by the storms. Oversight, accountability, and fraud prevention are a primary concern for the LRA Board. The LRA Audit Committee meets monthly to monitor recovery funds through reports from the Legislative Auditor, the State Inspector General, federal inspectors general staff, and other independent accounting firms engaged by various entities of the state.

Activity Description:

The Road Home Homeowner Assistance program provides financial compensation and advisory services will be available for homeowners who wish to select from one of the three following options: 1. Repair/Rebuild & financial incentives to repair or reconstruct on the same site; 2. Sell and Relocate within the state & purchase of the home by the program in exchange for an agreement to resettle in Louisiana; or 3. Sell and Relocate out of the state & voluntary sale of the home with no expectation of resettlement in the state. The allocation for this program represents uses an estimated 55% benefit to low and moderate income citizens. This estimate is based on first and second quarter data which differs from the Road Home registry data. The registry data showed 76.2% of the 107,713 registrants earned at or below \$50,000. Since the registry did not collect data on household size, it is impossible to estimate the number of low income households. This allocation amount and estimated performance will be continually modified as data on the actual applicants is collected. The amount allocated to LMI includes \$8,229,915 of Road Home start up costs that funded program design, the Road Home Registry call center and other start up costs.

Location Description:

The program will serve homeowners in at least 17 permanent and mobile homeowner assistance centers in disaster affected parishes and other areas in and out of state where concentrations of displaced citizens are located.

Activity Progress Narrative:

By the end of the second quarter, the Road Home Homeowner Assistance program had received and recorded 120,789 applications (68,900 online; 46,234 hardcopy; 5,655 phone in system) from Louisiana homeowners whose homes had been adversely affected by hurricanes Katrina and Rita. Out of this number, a total of 93,037 appointments were held by ICF International with these Louisianans for the purpose of discussing and deciding upon the homeowner's best option with the program. As of March 31, 5,708 closing were held, resulting in the release of \$428,401,080.36 to Louisiana homeowners.

Activity Progress Narrative:

The Small Firm Recovery Loan and Grant (SFLG) program was approved in Action Plan One, Amendment 2 on September 15, 2006. The Solicitation for Grant Application process was initiated in October 2006 and due December 1. Just prior to the SGA due date, the State decided to change the parameters of the program and augment it with additional funds beyond \$38 million allocated in Amendment 2. An additional \$105 million was transferred to the program in Amendment 8, approved on February

9, 2007. In the first round of grant reviews, 5,553 applications for this funding were received and 3,469 (62%) grants were awarded to small firms. The total amount of funding was \$62.7 million with the average amount being \$18,100. The funds were distributed across the state as follows: 8% - Central LA, 12% - Southwest LA, and 80% Southeast LA. Minority and/or woman owned businesses accounted for 53% of the funds. Approximately one third of the businesses assisted were single person firms which explains why 88% of the firms assisted created less than 10 jobs each; leaving 9% creating 11-25 and 3% creating 26-50. A second round for this program will be undertaken later in the year, with the potential for additional funding of \$38 million in grants and loans.

Activity Description:

The Small Firm Recovery Loan and Grant Program is proposed as a program to target assistance to small firms that are deemed to have a chance to survive, contribute to the economy, and maintain and create jobs. Funds would support low-cost loans on flexible terms, small grants to reimburse for tangible losses, and technical assistance to support the firms receiving the financial support, some of which may not qualify for or have received bank and/or Small Business Administration (SBA) loans. Firms assisted would be those expected to survive and pay back the funds if given an opportunity for a loan. Firms will be asked to provide a plan showing how they would use the loans, grants, and technical assistance to survive and move ahead. Louisiana plans to implement a program that is similar to that developed and used in New York after the terrorist attacks on 9/11/2001. Through a Request for Proposals (RFP), Louisiana will seek proposals from nonprofits and community development financial institutions that would be used as intermediaries to provide working capital loans on flexible terms and small grants to reimburse for tangible losses to small firms, including nonprofits, and technical assistance services to companies receiving loans and grants. Results after 9/11 showed that technical assistance linked to the loans and grants was found to be important for the success of the small firms and subsequent repayment of the loans. Among other things, potential contractors seeking to offer assistance to small firms through this program will define in their RFP response information about the amount of funding to be dedicated to the loan category, grant category, or for technical assistance. Firms to be assisted would be those located in the parishes in southeast and southwest Louisiana most affected by hurricanes Katrina and Rita, including but not limited to those with substantial infrastructure damage. This program is planned to close 140 loans, award 2,400 grants, and create or retain 2,400 jobs.

Location Description:

Disaster affected parishes.

Activity Description:

Before the disaster, a large portion of very low income working families resided in single-family homes, and small, multi-family buildings that were owned and operated by small-scale landlords. Many of these properties were underinsured or uninsured, and no longer available for occupancy. The state proposes to provide up to \$869,000,000 in financial assistance to small rental property owners so that they effectively might return an estimated 18,000 affordable and ready-to-be-occupied units to the rental housing market.

A portion of the funds (\$40 million) is set aside as a pilot program to assist in the creation of homeownership opportunities for renters and will be administered by the Louisiana Housing Finance Agency. The primary purposes of this incentive program is to enable small-scale rental properties to return to the market while limiting the amount of debt (and therefore debt service) required for the properties, so that the owners will be able to charge affordable rents. The program will, on a competitive basis, offer incentives in the form of forgivable loans to qualified owners who agree to offer apartments to be occupied by lower income households at affordable rents.. Subsidies will be provided on a sliding scale, and the minimum subsidy will be provided for units made available at affordable market rents to households with incomes at or below 80% of median. The maximum amount of subsidy will go to units affordable to families with incomes at or below 50% of AMI. In addition to funding incentives for providing affordable units in small rental properties, the program will, where practical, make funds available to improve building design and make properties less susceptible to damage from natural events. In general, higher per unit amounts will be available to property owners who agree to offer lower rents to reflect the lower amount of rental income the properties will receive. The assistance will be offered as deferred payment loans at zero percent interest, due only upon resale of the property or failure to comply with the agreed-upon restrictions on rents and household incomes. The program will, on a competitive basis, provide zero interest gap financing to restore units that are rented at affordable rates.

Higher funding amounts, up to \$100,000 per unit are available to qualified landlords who agree to offer lower rents, with the maximum amount of subsidy going for larger rental units where rents are for families with incomes at or below 50% area median income. This program is planned to create 18,000 units - 8,100 Low and 5,400 Moderate income; 13,500 affordable units - 8,100 Low and 5,400 Moderate income; 1,500 assisted units occupied by the low income elderly; 600 units subsidized with project based rental assistance; 4,500 lead safe units; and 1,500 units which meet Sec. 504 accessibility standards.

Location Description:

Disaster affected parishes.

Activity Progress Narrative:

Prior to the disastrous 2005 hurricane season, a large segment of low-income working families resided in one- to four-unit rental buildings, including single-family homes, duplexes, three- and four-unit dwellings that were owned and operated by small-scale landlords. In the wake of the storms, it became clear that an unprecedented number (approximately 82,000) of multi-family rental properties had been destroyed or severely damaged.

Replacement of the damaged or destroyed rental housing in the most heavily damaged hurricane areas is vital to the return of a strong workforce and is a keystone of Louisiana's economic recovery. Small Rental Property Program eligibility will be limited to the 13 most affected parishes: Acadia, Calcasieu, Cameron, Iberia, Jefferson, Orleans, Plaquemines, St. Bernard, St. Tammany, Tangipahoa, Terrebonne, Vermilion and Washington.

The Louisiana Recovery Authority (LRA) and the Office of Community Development (OCD) approved the program on December 28, 2006; the final scoring design was approved January 5, 2007. The small Rental application was approved by the LRA late in January 2007. ICF International began accepting applications for the first of multiple competitive rounds on January 29, 2007.

Round 1 closed on March 15th for the general pool and on March 22nd for the non-profit pool. Over 6500 applications were received. Of those, 2,693 small-scale rental property owners were awarded over \$202 million in federal funds. Through the funding provided in the first round, more than 4.276 affordable rental units will be restored and offered to low- to moderate-income level working families. The Small Rental Property Program expects Round 2 to begin accepting applications in May and remain open for 30 days.

Match Contributed	\$0.00	\$0.00

Activity Description:

Firms to be assisted would be those located in the parishes in southeast and southwest Louisiana most affected by Katrina and Rita, including but not limited to those with substantial infrastructure damage. Because of the impacts of the storms, many firms need assistance in dealing with changed circumstances. Small firms in niche sectors such as fisheries, tourism, or the cultural economy may require unique assistance that can be provided by nonprofits with a proven track record within that sector. Through this program, technical assistance will be provided in areas such as business management, strategic planning, accounting, insurance, marketing, and legal. Similar to a technical assistance program created in New York after 9/11/2001, Louisiana will seek proposals from intermediaries, which would provide some form of technical assistance. The technical assistance may be provided to existing small firms, to entrepreneurs/persons seeking to start a new business to locate within and take advantage of opportunities in the most affected parishes, and/or provided in other ways that help address the unique needs for local/regional business recovery. The contracting agency will retain the right to select all or some of the applicants, reject any or all proposals, select all or fewer than all responding to the RFP as part of a consortia or partnership, allocate funds in any amount depending on the number and quality of the proposals, and negotiate any part(s) of any proposal. Respondent organizations will be encouraged to develop partnerships with other groups to provide a team that might serve a specific geographic area or specific type of company or industry.

Activity Progress Narrative:

The Small Firm Technical Assistance Program as outlined in Action Plan One Amendment 2 was approved by HUD on September 15, 2006. The Solicitation for Grant Applications process commenced in October 2006. In January, a Review Board was initiated. In February, 19 sub-recipients were selected. The Louisiana Department of Economic Development met with the 19 in March to go over program content and process.

Activity Description:

State Building Infrastructure Program This program provides the 10% match required for the FEMA Public Assistance projects to restore critical state infrastructure damaged by the storms. Eligible applicants include all FEMA PA projects that require match. The State will provide this match via a "global match" procedure in which certain projects will be funded in their entirety with CDBG funds while the majority of the projects will be funded entirely with FEMA PA dollars. Since this project is in planning, the projected performance figures are not available at this time.

Location Description:

Projects are located throughout the Gulf Coast area in parishes that are classified as FEMA PA parishes.

Activity Progress Narrative:

The purpose of the State Building Infrastructure program is to provide the 10% match required for the FEMA Public Assistance projects to restore critical state infrastructure damaged by the storms. The state Office of Facility Planning & Control is now receiving funds through this program to cover the non-federal match for Public Assistance funds for work done on state buildings. Expenditures for this quarter were for the repair of the Louisiana Superdome, used to house Katrina and Rita victims after the storms.

Activity Description:

HUD approved the release of funds for the Supportive Housing Services program; outlined in Action Plan One, Amendment 1; on May 30, 2006, to offer grants for Permanent Supportive Housing (PSH) which are designed to provide flexible, community-based supportive services for special needs households linked to affordable rental housing units in community-integrated, non-institutional settings. The Louisiana Department of Health and Hospitals (DHH) will serve as the lead agency for funding, administration, and monitoring of CDBG funds for the Grants. Grants will also be made to sub-recipient Local Lead Agencies designated by DHH and by the Louisiana Department of Social Services (DSS). The Local Lead Agencies will conduct outreach to identify individuals eligible for PSH, develop and maintain waiting lists, enter into agreements with providers of PSH units, pre-screen, prioritize and refer eligible individuals for PSH, and provide the necessary services. This program is planned to assist 3,000 low income people by providing them with new access to a service.

Location Description:

Disaster Affected Parishes.

Activity Progress Narrative:

The State's CDBG funds totaling \$72,730,000 will be administered by the Department of Health and Hospitals (DHH) through an interagency agreement that is currently being finalized. DHH will, in turn, contract with designated Local Lead Agencies (LLA) who will directly administer the funds for supportive services in conjunction with the property providers. The majority of the PSH units will be provided by LIHTC developments that have committed to at least a 5% set aside of units for PSH. It is anticipated that the Department of Social Services, through a separate interagency agreement, will provide some additional PSH units that can be served through DHH. Additionally, in the Small Rental Property program, some non-profits receiving incentive awards will be providing PSH units that will be available for support through this grant. Awards are limited to \$25,000 per PSH unit and have a term of 10 years. As PSH units are built and available for occupancy, the LLAs will contract directly with the property providers to ensure compliance with the requirements of the funding and provide the PSH tenant to the owner

for occupancy. LIHTC units are not expected to be available until 2008 and 2009.

Activity Description:

In 2004, the State of Louisiana hosted 24.6 million visitors, of which 76 percent were from outside of the State. Those 24.6 million visitors spent \$9.9 billion in the State and contributed \$600 million in state and local tax revenues (Source: Travel Industry Association of America). Out-of-state tourists come to Louisiana as a result of marketing and promotion of Louisiana's many cultural and natural assets, family recreation destinations, and various special events Louisiana hosts each year. South Louisiana is the largest draw for the State's tourism and convention business. Prior to the storms, tourism was the second largest industry in the State in terms of employment (Louisiana Office of Tourism), and the cultural economy was the fastest growing industry in the State (Source: Louisiana: Where Culture Means Business, Mt. Auburn Associates, July 31, 2005). The tourism and cultural industries combined sustained 260,000 jobs for Louisiana residents. This funding will be allocated to local tourism agencies and bureaus to promote recovery tourism in their areas. Activities to be funded include advertising and event promotions.

Location Description:

Disaster affected parishes.

Activity Progress Narrative:

The Tourism Marketing Program was approved by HUD on September 15, 2006. The program has awarded \$28,500,000 to 17 tourism agencies throughout the area. The interagency agreement with the Office of Tourism is complete and all the sub-recipient agreements have been signed. A funds distribution process was established between the Department of Culture, Recreation and Tourism (DCR&T) and OCD-DRU by establishing internal controls to insure a reasonable turn around in DCR&T's request for payments. Tourism has spent funds totaling \$704,217 on Disaster Marketing and of the 17 sub-recipients' projects underway, only 10 have spent funds by the end of this quarter. Performance Measures for 2006 will be available summer 2007.

Activity Description:

Hurricanes Katrina and Rita dealt a devastating blow to the economic engine in South Louisiana. Approximately 360,000 Louisiana citizens are estimated to have been displaced outside of the State (LRA analysis of population estimates). Some 1.3 Million FEMA applicants were scattered across 50 states by Hurricane Katrina alone (FEMA). It is reported that approximately 18,000 businesses were severely damaged or destroyed, and 220,000 jobs are estimated to have been lost due to the hurricanes (BLS). The loss of jobs from the hurricanes impacted every sector from healthcare and construction to retail and tourism. The Recovery Workforce Training Program (RWTP) will address the loss of jobs and the re-employment of our workforce as a top priority in the recovery of the impacted areas and the long-term recovery of the State's overall economy. The program is centered on three inter-related factors critical to the recovery of Louisiana's economy: the return of the displaced workforce; the retention of the existing workforce; and a concerted effort to increase skills development for new jobs in sectors related to the immediate and long-term recovery and rebuilding efforts and the future of our economy. This program is planned to train 9,526 people total to be productive members of the workforce. 4,858 will be in the moderate income range.

Location Description:

Activity Progress Narrative:

HUD approved the Recovery Workforce Program on September 15, 2006. A Request for Proposals was issued on October 4, 2006; proposals were due to Workforce Commission (WC) on or before November 28, 2006. The WC created an evaluation team to review the proposals. There were 48 proposals submitted for review amounting to \$165 million. The final evaluation of the proposals was due to the WC by December 7th for final approval by December 14th. Of the 48 proposals submitted 19 were chosen to be funded. In March, agreement between WC and OCD-DRU was signed and submitted to OCR. Meeting between WC Acting Director and OCD-DRU staff resulted in the completion of template for sub-recipient agreements.
