7.1 Terminology

7.1.1 Policy Terminology

The following terms are used throughout the policies and outlined in sections 7.2 through 7.7 of this manual.

Automated Disbursement (AD) - The AFS paper check that is printed and issued for a valid obligation of the state to a vendor.

Backup Withholding - Thirty and one half percent withheld from a vendor’s payment because they failed to render a valid Taxpayer Identification Number (TIN), did not provide a (TIN) at all, or payments were under-stated. This withholding ensures that certain taxpayers report all taxable receipts on their tax returns.

Check Cancellation (CX) - This document cancels payments written in ISIS. This document is used by the State Treasurer’s Office to reschedule or cancel PV documents.

Cleared (C) - This alpha character is used on the WREC table to inform the user that the check has been cleared through the bank.

Credit Memo - A payment voucher that is used to record overpayments to vendors or credits for goods that were returned to vendors.

Discount Type - A code used on payment voucher transactions to indicate that a discount may be taken against the line amount of the transaction if a corresponding cash disbursement is made within a specified number of days. Discount parameters, including number of days are defined by discount type on Discount Type Table (DISC).

Electronic Funds Transfer (EFT) - This payment process will electronically transfer monies from the state’s bank account to the vendor’s bank account.

Imprest Fund - A fund which is drawn upon working capital appropriations issued to the State Treasurer for the purpose of making disbursements requiring prompt cash outlay.
**Internal Vouchers** - This voucher ensures that both revenue and expenditure entries from an intra-governmental purchase and sale are recorded simultaneously by generating both the invoice and voucher transactions.

**Lien/Levy** - An amount withheld from a vendor’s payment due to a delinquent debt owed to the Internal Revenue Service, the Department of Revenue and Taxation or a financial institution.

**Manual Warrant (MW)** - A document used to record checks in ISIS that have been written manually and generate manual checks and wire transfers.

**Outstanding (O)** - This alpha character is used on the WREC table to inform the user that the check has not cleared the bank.

**Payment** - The liquidation of a liability and the final event in the purchasing process.

**Payment Voucher** - Authorizes the spending of money and initiates automated check writing or electronic funds transfer procedures.

**Petty Cash** - This fund is used for the purpose of making change, purchasing items of small cost, payment of postage due, and for other nominal expenditures of a nonrecurring nature which cannot be administered economically and efficiently through customary purchasing practices.

**Recurring Payment Voucher** - This payment allows the user to enter information for a payment once, along with starting and ending dates and an indicator controlling how often the transaction should be generated.

**Remittance** - Additional information, such as invoice and account numbers, that is printed on the stub for AD’s or transmitted to the vendor’s financial institution for EFT’s.

**Stale Dated** - An AFS check that has not been redeemed within 180 days of the check date.

**Void (V)** - This alpha character is used on the WREC table to inform the user that the check has been voided by the State Treasurer’s Office.
7.1.2 Procedure Terminology

The following are the field definitions for each payment related document in the 700-705 procedures in this chapter:

7.1.2.1 Quick Payment Voucher (PVQ) 700

<table>
<thead>
<tr>
<th>Field</th>
<th>Size</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>DATE</td>
<td>6</td>
<td>Numeric – inferred. The date of record for the PVQ being entered.</td>
</tr>
<tr>
<td>ACCT PRD</td>
<td>4</td>
<td>Numeric – optional. The fiscal month and accounting year that the PVQ is being processed. If left blank, AFS will default to the current accounting period.</td>
</tr>
<tr>
<td>BFY</td>
<td>2</td>
<td>Numeric – optional. The last two digits of the applicable fiscal year to which the transaction will be recorded in AFS. If left blank, AFS will default to the current budget fiscal year.</td>
</tr>
<tr>
<td>ACT</td>
<td>1</td>
<td>Alpha – optional. If left blank, defaults to “E”. Valid entries are:</td>
</tr>
<tr>
<td></td>
<td></td>
<td>“E” (Original Entry) if this document is new.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>“M” (Modification) if this document is modifying a previously accepted document. This allows you to add lines to a previous document, change the amounts on existing lines, or cancel a line.</td>
</tr>
<tr>
<td>VENDOR CODE</td>
<td>11</td>
<td>Numeric – required. Enter the code for the vendor to be paid as a result of this document. The code used must be active on the VEN2 table.</td>
</tr>
<tr>
<td>ACT DEL DT</td>
<td>6</td>
<td>Numeric – required. Enter the date that the goods or services were received, or “PREPAY” for those items allowed to be paid in advance.</td>
</tr>
<tr>
<td>Field</td>
<td>Size</td>
<td>Description</td>
</tr>
<tr>
<td>--------------------</td>
<td>------</td>
<td>-----------------------------------------------------------------------------</td>
</tr>
<tr>
<td>SCH PAY DATE</td>
<td>6</td>
<td>Numeric – optional. The date on which you would like this payment to be issued. If left blank, the system will default this date to 30 days from the document date.</td>
</tr>
<tr>
<td>NAME</td>
<td>30</td>
<td>Alpha – inferred. This field will be entered based on the vendor code.</td>
</tr>
<tr>
<td>OFF LIAB ACCT</td>
<td></td>
<td>Leave blank. This field is not used by the State of Louisiana.</td>
</tr>
<tr>
<td>ADDRESS</td>
<td></td>
<td>Alphanumeric – inferred. This field will be entered based on the vendor code.</td>
</tr>
<tr>
<td>DOCUMENT TOTAL</td>
<td>14</td>
<td>Numeric – required. Enter the net amount of all lines on the document.</td>
</tr>
<tr>
<td>CALC DOC TOTAL</td>
<td>14</td>
<td>Numeric – inferred. The system will compute the total of all lines.</td>
</tr>
<tr>
<td>FA IND</td>
<td></td>
<td>Leave blank. This field is not used by the State of Louisiana.</td>
</tr>
<tr>
<td>EFT IND</td>
<td>1</td>
<td>Alpha – inferred. This field indicates whether or not the payment will be made using EFT. Valid entries are: Yes “Y” or No “N”.</td>
</tr>
<tr>
<td>APPLICATION TYPE</td>
<td>2</td>
<td>Alphanumeric – inferred. This field indicates whether or not the check will be single “AA” or consolidated “99”.</td>
</tr>
<tr>
<td>SINGLE CHECK FLAG</td>
<td>1</td>
<td>Alpha – optional. This field indicates whether or not a single check or EFT will be produced. If a “Y” for yes is not entered, the system will default to “N” for no.</td>
</tr>
<tr>
<td>CHECK CATEGORY</td>
<td>2</td>
<td>Alphanumeric – inferred. This field indicates whether or not a single “AA” or a consolidated “99” check or EFT will be produced.</td>
</tr>
<tr>
<td>Field</td>
<td>Size</td>
<td>Description</td>
</tr>
<tr>
<td>--------------------</td>
<td>-------</td>
<td>-----------------------------------------------------------------------------</td>
</tr>
<tr>
<td>LN NO</td>
<td>2</td>
<td>Numeric – required. Enter a different number for each line on the document. Numbers from 01 to 99 are valid.</td>
</tr>
<tr>
<td>REF CD/NUMBER/LN</td>
<td>2 + 3 +</td>
<td>Numeric – optional. This line is only used to reference lines previously recorded on a purchase order (PO). Enter the document code, number and line number of the PO being referenced.</td>
</tr>
<tr>
<td>COM LN</td>
<td></td>
<td>Leave blank. This field is not used by the State of Louisiana.</td>
</tr>
<tr>
<td>VI NUMBER/LN</td>
<td>12</td>
<td>Alphanumeric – optional. Enter the vendor invoice number associated with this payment voucher line.</td>
</tr>
<tr>
<td>DESCRIPTION</td>
<td>17</td>
<td>Alphanumeric – optional. This field is used to enter any comments or an account number because it will appear on the check stub. This information will assist the vendor in correctly applying the payment.</td>
</tr>
<tr>
<td>FUND</td>
<td>3</td>
<td>Numeric. This field is required for lines without an expenditure or revenue organization. This field is not required for lines with an expenditure or revenue organization. This field will be inferred if a PO is referenced in the REFERENCE NUMBER field.</td>
</tr>
<tr>
<td>AGCY</td>
<td>3</td>
<td>Numeric. This field is required for lines that do not reference a PO. Enter the applicable agency code for this line. This field will be inferred if a PO is referenced in the REFERENCE NUMBER field.</td>
</tr>
<tr>
<td>ORG</td>
<td>4</td>
<td>Numeric. This field is required for lines associated with regular appropriations and permanent appropriations that require organizations. Leave this field blank for lines associated with all capital outlay appropriations. This field will be inferred if a PO is referenced in the REFERENCE NUMBER field.</td>
</tr>
</tbody>
</table>
### Field Specifications

<table>
<thead>
<tr>
<th>Field</th>
<th>Size</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SUB</td>
<td></td>
<td>Leave blank. This field is not used in the State of Louisiana.</td>
</tr>
<tr>
<td>APPR UNIT</td>
<td>3</td>
<td>Numeric – This field is required for lines without a revenue or expenditure organization. Enter the applicable appropriation unit code for this line. This field is inferred for lines with an expenditure or revenue organization. It is also inferred if a PO is referenced in the REFERENCE NUMBER field.</td>
</tr>
<tr>
<td>ACTV</td>
<td></td>
<td>Leave blank. This field is not used in the State of Louisiana.</td>
</tr>
<tr>
<td>FUNC</td>
<td></td>
<td>Leave blank. This field is not used in the State of Louisiana.</td>
</tr>
<tr>
<td>OBJ/SUB</td>
<td>4 + 2</td>
<td>Numeric – required (OBJ). Enter the applicable object code. This field is inferred if a PO is referenced in the REFERENCE NUMBER field. Enter the sub-object if applicable, otherwise, leave blank.</td>
</tr>
<tr>
<td>REV/SUB</td>
<td>4 + 2</td>
<td>Numeric – required for revenue transactions only. Enter the sub-rev if applicable, otherwise, leave blank.</td>
</tr>
<tr>
<td>JOB NO</td>
<td>8</td>
<td>Numeric – required only for capital outlay appropriations. The project number is entered on this line. This field is inferred if a PO is referenced in the REFERENCE NUMBER field.</td>
</tr>
<tr>
<td>RCAT</td>
<td>4</td>
<td>Alpha/numeric – optional. Enter the reporting category code applicable to this line, if it is not inferred by the organization code or PO that has been entered.</td>
</tr>
<tr>
<td>BS ACCT</td>
<td>4</td>
<td>Numeric – required only for balance sheet account transactions. Otherwise, leave blank.</td>
</tr>
</tbody>
</table>
## Field AGENCIES POLICIES AND PROCEDURES MANUAL PAYMENTS
### CHAPTER 7

<table>
<thead>
<tr>
<th>Field</th>
<th>Size</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>DISC TYPE</td>
<td>1</td>
<td>Alphanumeric – optional. Enter the appropriate discount policy type from the Discount Type (DISC) table, if a discount applies to this line. This field does not apply to balance sheet transactions and governmental refunds.</td>
</tr>
<tr>
<td>LINE AMOUNT</td>
<td>14</td>
<td>Numeric – required. Enter the dollar amount of this line. If this is a modification for a previous document, enter the amount of change over or under the previous amount.</td>
</tr>
<tr>
<td>I/D</td>
<td>1</td>
<td>Alpha – required only if this is a modification (Action field is “M”). Valid entries are “D” – Decrease and “I” - Increase. Leaving this field blank, will default to “I” if the Action field is “E”. To record credit memos, “D” is a valid original entry, as long as the discount type is blank.</td>
</tr>
<tr>
<td>P/F</td>
<td>1</td>
<td>Alpha – optional. This field indicates whether the line is closing out a PO or authorizing a partial payment. A partial payment is a “P” and a final payment is an “F”. Leave blank when no PO is referenced in the field for REFERENCE NUMBER.</td>
</tr>
<tr>
<td>QUANTITY</td>
<td></td>
<td>Leave blank. This field is not used by the State of Louisiana.</td>
</tr>
<tr>
<td>I/D</td>
<td></td>
<td>Leave blank. This field is not used by the State of Louisiana.</td>

### 7.1.2.2 Vendor Payment Voucher (P1) 701

<table>
<thead>
<tr>
<th>Field</th>
<th>Size</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>PV DATE</td>
<td>6</td>
<td>Numeric – inferred. The date of record for the P1 being entered.</td>
</tr>
<tr>
<td>ACCT PD</td>
<td>4</td>
<td>Numeric – optional. The fiscal month and accounting year that the P1 is being processed. If left blank, AFS will default to the current accounting period.</td>
</tr>
</tbody>
</table>
## Field Names and Descriptions

<table>
<thead>
<tr>
<th>Field</th>
<th>Size</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>BFY</td>
<td>2</td>
<td>Numeric – optional. The last two digits of the applicable fiscal year to which the transaction will be recorded in AFS. If left blank, AFS will default to the current budget fiscal year.</td>
</tr>
</tbody>
</table>
| ACT           | 1    | Alpha – optional. If left blank, defaults to “E”. Valid entries are:  

“E” (Original Entry) if this document is new.  

“M” (Modification) if this document is modifying a previously accepted document. This allows you to add lines to a previous document, change the amounts on existing lines, or cancel a line. |
<p>| SINGLE CHECK  | 1    | Alpha – optional. This field indicates whether or not a single check or EFT will be produced. If a “Y” for yes is not entered, the system will default to “N” for no. |
| TC            |      | Leave blank. This field is not used by the State of Louisiana. |
| FA            |      | Leave blank. This field is not used by the State of Louisiana. |
| EFT IND/TYPYE | 1/2  | Alphanumeric – inferred. This field indicates whether or not the payment will be made using EFT (Yes “Y” or No “N”) and whether or not the check will be single “AA” or consolidated “99”. |
| CHECK CAT     | 2    | Alphanumeric – inferred. This field indicates whether or not a single “AA” or a consolidated “99” check or EFT will be produced. |
| OFF LIAB ACCT |      | Leave blank. This field is not used by the State of Louisiana. |</p>
<table>

<td>Leave blank. This field is not used by the State of Louisiana.</td>
</tr>
</tbody>
</table>
### Field | Size | Description
--- | --- | ---
I/D | | Leave blank. This field is not used by the State of Louisiana.

CAL AMT | | This field is the system computed total of all lines. Do not code this field.

TOT QTY | | Leave blank. This field is not used by the State of Louisiana.

I/D | | Leave blank. This field is not used by the State of Louisiana.

CAL QTY | | Leave blank. This field is not used by the State of Louisiana.

LN NO | 2 | Numeric – required. Enter a different number for each line on the document. Numbers from 01 to 99 are valid.

REFERENCE CD | 2 | Alpha – optional. This line is only used to reference lines previously recorded on a PO. Enter the applicable document code of PO.

REFERENCE NUMBER | 3 + 11 | Alphanumeric – optional. This line is required only to reference lines previously recorded on a PO. Enter the document number of the Document ID being referenced.

REFERENCE LN | 2 | Numeric – optional. This line is required only to reference lines previously recorded on a PO. Enter the line number of the Document ID being referenced.

COM LN | | Leave blank. This field is not used by the State of Louisiana.

VENDOR INVOICE | 12 | Alphanumeric – optional. Enter the vendor invoice number associated with this payment voucher line.

INV LN | | Leave blank. This field is not used by the State of Louisiana.
### Field Descriptions

</table>
## 7.1.2.4 Recurring Payment Voucher (REPV) 703

<table>
<thead>
<tr>
<th>Field</th>
<th>Size</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>VOUCHER NUMBER</td>
<td>9</td>
<td>Alphanumeric – required. Enter an alphanumeric identifier for this PV document. It will become the first nine digits of the document number. The last two digits will be added when the PV is generated.</td>
</tr>
<tr>
<td>VENDOR</td>
<td>11</td>
<td>Numeric – required. Enter a valid vendor code for the payment voucher.</td>
</tr>
</tbody>
</table>
| TYPE           | 1    | Numeric – required. Enter the type of PV. The valid entry is:  

“1” Indicates that this payment is for an outside vendor. If left blank, the system will infer a “1”. |
| SUBMITTING AGCY| 4    | Numeric – required. Enter the code that you want to have as the agency in the document ID of the generated document. This agency must be valid for the entry start date’s year. |
| START DATE     | 6    | Numeric – required. Enter in MMDDYY format the calendar date on which documents should start being generated.                               |
| EXPR DATE      | 6    | Numeric – Required when frequency type is M, B, E, or Q. Must be blank when frequency type is F. Enter, in MMDDYY format the calendar date on which documents should cease being generated. |
| LAST DATE      | 6    | Numeric – inferred. The system updates this field with the date the most current payment voucher was generated.                           |
| FREQUENCY      | 1    | Alpha – required. This field describes how often the document should be generated and added to SUSF. Valid codes are:  

F – One – time future document
### Field Descriptions

<table>

### 7.2 Payments Overview

This section details the payment policies and definitions related to the payment process in ISIS. All agencies must comply with these policies. Any departure from these policies must be approved, in writing, by the Director of OSRAP.

#### 7.2.1 Payment Policies

A payment, the liquidation of a liability and the final event in the purchasing process, can be entered through ISIS purchasing (AGPS) or AFS using a payment voucher. A payment voucher authorizes the spending of money and initiates automated disbursement (AD) or electronic funds transfer (EFT) procedures. Regardless of which system the payment is initiated in, it will be paid through AFS.

The following are examples of direct payments to vendors that could be made through AFS:

- Reimbursement of imprest account and Non-Zero Balance (ZBA) bank accounts
Utilities
Postage
Interagency payments
Payments under $500 not involving a purchase order and not commodity related
Payments against a budget reservation (encumbering) AGPS purchase order which is not commodity-related (i.e., utilities)
Payments for personal professional consulting and social service contract, if not using the Contract Financial Management System (CFMS)

Payments for credit card purchases.

There are three ways a payment can be liquidated: a manual check, an AD, or an EFT.

A manual check is produced by the State Treasurer’s Office (STO) as a result of an agency preparing a Manual Check Request form (MW). The MW must be approved by an authorized agency approver, and OSRAP (Transaction Processing Section) before the STO approves it and creates a check. If after a payment voucher is submitted, the items on it become urgent and a check must be generated immediately, the check can be produced manually and recorded on a manual warrant referencing the payment voucher. This will stop the automated disbursement process for that payment voucher.
An AD is a system generated check that is printed at the Office of Computing Services (OCS) Data Center on Tuesdays and Fridays, unless one of these days falls on a State holiday. OSRAP employees are responsible for monitoring all AFS check printing to verify that the checks are being printed in the proper format to be honored by the bank. The AD transaction code in ISIS is “AD” and the bank account code is “RJ”.

An EFT is a system generated payment that transfers funds from the state’s bank account to the vendor’s bank account. The EFT disbursement process runs each weeknight and selects the payment vouchers that are to be issued through EFT. EFT’s should arrive in the vendor’s bank account no later than two working days from the check/warrant date. The only time there should be a delay in transmission is if a scheduled payment date falls on a Federal Reserve Bank Holiday or a State Holiday. The EFT transaction code in ISIS is “EF” and the bank account code is “FT”. OSRAP employees are responsible for maintaining the EFT vendor records and monitoring the EFT transactions daily.

### 7.2.1.1 Single and Consolidated payments

AD’s and EFT’s can be produced as single or consolidated payments in AFS.

Single payments are produced so that a vendor will receive one check or EFT for a specific payment from one agency. The check category for single payments is “AA”. The single AD’s are delivered to the STO after they have been printed to be distributed to each agency. The agency is responsible for distributing single checks to the vendor. The single EFT’s are transferred directly to the vendor’s bank account as one payment.

Consolidated payments are produced so that a vendor will receive one check or EFT from multiple state agencies on the same date. The consolidated AD’s are mailed directly to the vendor after they are printed at the OCS Data Center, by the Office of State Mail. The check category for consolidated payments is “99”.

The following policy will apply for the use of single and consolidated payments in AFS:

1. The consolidated check will be used unless a special circumstance exists.

2. The single check option will only be used for special circumstances such as: a vendor requests a copy of the invoice with the payment, an imprest fund or travel account needs to be replenished immediately, or one agency’s portion of a consolidated check that is being reissued needs to be voided.
7.2.1.2 Sales Tax Exemption

State agencies are exempt from State sales and use taxes in accordance with Act 1029 of the 1991 Regular Session. This exemption only applies to purchases of items for official State use. In all cases where sales are paid for by a check drawn upon the State Treasurer, or the official disbursing agent of any political subdivision, the sale will be considered as being made to the State of Louisiana or its political subdivision and will be exempt from tax.

7.2.1.3 Travel Reimbursements

Travel reimbursements will be made in accordance with the policies in PPM49 (as amended). Payments to state employees for travel reimbursement are made from imprest accounts which are subsequently reimbursed through ISIS. State employees should not be established as vendors in ISIS.

7.2.1.4 Imprest Fund

The purpose of the imprest fund is to facilitate employee travel reimbursements and travel advances. Section 39:242 of the Louisiana Revised Statutes provides authority to the Commissioner of Administration to grant authority to budget units to establish an imprest fund drawn upon working capital appropriations issued to the State Treasurer for the purpose of making disbursements requiring prompt cash outlay.

The imprest fund account should be administered by one person who will act as the custodian. The custodian must be a bonded employee and will be responsible for the balance of the account. The fund will consist of cash in the bank account and/or approved vouchers for disbursement made and pending reimbursements from the appropriated accounts. The reimbursement of the imprest fund account shall be made to the custodian of the imprest fund.

A monthly reconciliation of the imprest fund account shall be prepared by the agency within 15 days following receipt of the bank statement. Imprest funds advanced from any fund shall be carried in the books of the State as an asset of the fund. Upon determination that the need for the imprest fund no longer exists, such funds shall be remitted back to the STO in the full amount advanced within thirty days.
7.2.1.5 Petty Cash Fund

Any state agency may establish and maintain petty cash funds for the purpose of making changes, purchasing items of small cost, payment of postage due, and for other nominal expenditures of a non-recurring nature which cannot be administered economically and efficiently through customary purchasing practices. Petty cash funds may be established and maintained from monies which are appropriated to the agency for imprest funds. Before the establishment of the fund, the agency shall seek approval from the Commissioner of Administration.

A petty cash custodian should be established and must be a bonded employee separate from the custodian of the imprest fund. This custodian is held responsible for safeguarding the petty cash fund unless the funds are stolen due to criminal action or lost as the result of any other natural disaster (e.g., fire, etc.).

The petty cash fund must be kept intact and not commingled with any other funds (e.g., the agency's cash receipts for the day). The cash on hand plus vendor's invoices and/or petty cash vouchers plus reimbursements in transit must equal the amount of the established fund at all times. The agency's internal audit group will audit the petty cash fund on a regular basis. The fund is subject to audit at any time by the State's Legislative Auditor. Personal checks/employee advances (or any checks) are not to be cashed from the petty cash fund.

7.2.1.6 Interagency Transfers and Payments in AGPS/CFMS

It is the policy of the Division of Administration that agencies will use interagency transfers instead of issuing checks when paying another state agency. In order for all agencies to be in compliance with this policy, seller agencies should follow these instructions:

1. Each agency that has sold goods or services to other state agencies and received an AGPS Purchase Order or a CFMS contract number must establish a vendor code that has a location code of SA under their master FEIN on the VENC screen of AGPS. If a seller agency has more than one selling unit within their agency with different revenue accounting distribution information, they may set up additional vendor codes beginning with location code SB and continuing through SZ and additional AACG records.

2. A default accounting distribution must be added by the seller agency to the AACG screen of AGPS for the revenue classification. Only one AACG record can be established for each three or six digit AGPS AGCY record.
3. Seller agencies must provide OSRAP with a screen print of both the VENC and AACG screens.

It is the policy of the Division of Administration that if a payment originated in AGPS: an order must exist, an invoice and receiving action must have been entered, and the payment amount must be within the total order amount plus any allowable variance.

7.2.1.7 Returned Checks

A Return Service Request is printed on the AD’s and some are returned to OSRAP for various reasons. If it is a single check, OSRAP sends the checks to the responsible agency to handle. If it is a consolidated check, OSRAP will obtain the necessary information from the agency to make corrections and return the payment to the vendor.

7.2.1.8 Aged Outstanding Checks

Aged Outstanding checks are defined as checks that have been outstanding from 30 to 180 days. An Aged Outstanding Check Report is available through the OSRAP web page at http://www.state.la.us/OSRAP/INDEX.HTM and is updated biweekly. It is the agency’s responsibility to monitor this report and notify the vendors to see why checks were not cashed in a timely manner. Properly monitoring the outstanding checks will reduce the number of voids during the annual close as well as the number of checks going to Unclaimed Property.

7.2.1.9 Voiding Stale Dated Checks

Stale dated checks are defined as those checks that remain outstanding 181 days after the date on which the check was issued. OSRAP personnel will void stale dated checks within 5 days of the checks becoming stale dated. OSRAP will process a Check Cancellation Type 3 that voids the checks without reissuing as well as the J1 document(s). After the checks have been voided, it will be the decision and responsibility of the agency to issue a replacement check to the vendor, if needed. This process will also minimize the number of voids during the annual close process as well as decrease the number of checks going to Unclaimed Property.
7.2.1.10 Payment Maintenance

There are several BUNDL reports that agencies should review to verify that vendor payments processed with no problems. These reports are listed in Section 7.8. The J6 is used to correct errors made in recording the expenditure information on a payment. See Chapter 8 of the OSRAP Policies and Procedures Manual for more details.

7.2.2 Payment Voucher Policies (P1, PV, PVQ)

There are four different payment vouchers that can be used in AFS, the Payment Voucher (PV), the Vendor Payment Voucher (P1), the Quick Payment Voucher (PVQ) and the Internal Voucher (II). The P1, PV, and PVQ are used for purchases or credits from outside vendors. The agency decides which of these three payment vouchers to use based on preference.

The following policies will apply to payment vouchers in AFS:

1. The vendor code must be active, and
2. The invoice number and/or account number must be included to avoid a delay in processing by the vendor.

7.2.3 Recurring Payment Voucher Policies (REPV and RPV2)

The recurring payment transaction is useful for accounting events where the agency wants to eliminate the need to enter the payment vouchers each time a payment is scheduled. This facility is useful for accounting events such as rent payments, utility payments, revenue sharing distributions, leases, etc. The following policies will apply to recurring payment vouchers in AFS:

1. REPV is used for purchases to non-state vendors;
2. RPV2 is used for purchases between state agencies;
3. The vendor must receive payments on a scheduled basis;
4. The frequency type must be entered as monthly, bi-monthly, quarterly or end of the quarter, and
5. The information for each vendor must be entered with the start and end dates.

### 7.2.4 Internal Voucher Policies (II and J4)

The II transaction is used for internal purchases and sales between state agencies. The following policies will apply to interagency payment vouchers in AFS:

1. An II Type 2 must be used when a pre-approval agreement exists between both the buyer agency and the seller agency;

2. An II Type 3 must be used when a purchase or sale between both the buyer and seller agencies involves the same fund, and

3. The seller agency is responsible for processing the accounting information for the II Type 2 and the II Type 3 and verifying that the document is successful.

The following policies will apply to interagency journal vouchers in AFS:

1. The J4 will be used by agencies to process payments between agencies when the buyer and seller agencies do not have a prior approved contract or agreement. The seller agency will initiate the J4 and approve the transaction lines that it has security access to. The buyer agency must approve its coding lines before the J4 can be processed.

2. The seller agency will initiate the J4 for later approval and processing by the buyer agency. The transaction number for the J4 must begin with the buyer agency’s three-character agency code. The seller agency is responsible for assigning the correct document number at the time the J4 is created.

### 7.2.5 Manual Warrant Policies (MW)

The following policies will apply to manual warrants in AFS:

1. The agency completes an MW form and obtains agency, OSRAP and STO approval.
2. STO processes the form by coding the expenditure into ISIS and creates a paper check for the agency to send to the vendor.

7.3 Payment Cancellation Overview

Check cancellation is performed on an AD when a check is damaged in the mail, lost, stolen, stale dated, a duplicate payment or when an incorrect vendor is paid. There are two types of cancellations that can be used on a Check Cancellation Input Form (CX) – See Exhibit 7-20 and 7-22. A type 1 is a void and reissue and a type 3 is a void and do not reissue. A type 1 is typically used for replacement checks and a type 3 is used to void checks received in error, incorrect names, incorrect amounts or duplicate payments. A type 3 requires the preparation of a J1 to reverse the expenditure when the check was issued from an operating appropriation or a MW when the check was issued from a MOF appropriation. (See Chapter 8 of the OSRAP Policies and Procedures Manual for details on the preparation of a J1 and this type of MW).

The following policies will apply to check cancellations:

1. For single checks, the agency will prepare a Check Cancellation Input Form and send it to the STO;

2. For consolidated checks that have been lost, damaged, stolen, or stale dated, the agency will notify OSRAP. OSRAP will prepare the CX form and J1 if applicable, send it to the STO and notify all agencies involved;

3. For consolidated checks that have been received by the vendor and one agency has paid the wrong vendor or the wrong amount, it is that agency’s responsibility to request a refund from the vendor for their portion of the check, and

4. For checks that were lost due to an incorrect address, please contact the OSRAP Vendor Section at (225) 342-6356 to have the vendor’s address corrected before requesting that the check be reissued.

An EFT cancellation is performed when a vendor will not accept a payment from their financial institution and it is returned to the state’s bank account. OSRAP receives notification that an EFT has been returned and notifies the vendor for an explanation. Since the funds were returned to the state’s bank account the EFT has to be voided, whether it is reissued or not. OSRAP prepares the CX form and sends it to STO.
Agencies should monitor the WREC table for the status of payments. The status codes are: “O” – outstanding, “C” – cleared, “V” – voided and “X” – turned over to The Department of Revenue, Unclaimed Property Section. Annually, OSRAP sends out a Memorandum listing the checks issued through ISIS which have been outstanding for more than 180 days for each agency. After receiving this memorandum, each agency should make every effort to resolve each check listed whether through a void and reissue or a void. If the obligation for which the check was issued is still open and the agency can reissue the check to the vendor, do so at once. If the obligation is still outstanding and the vendor cannot be located, notify the STO so that the funds may be turned over to The Department of Revenue, Unclaimed Property Section.

7.4 Payment Components Overview

Before payments are generated, AFS considers discounts, credit memos, liens/levies and backup withholding. For cash disbursements, these components are shown on the check stub or EFT remittance.

7.4.1 Discounts

The following policies will apply to discounts in AFS:

1. The number of days is the time between the payment voucher’s transaction date and the date the check or EFT is scheduled to be processed.

2. The discount will be taken, if the number of days between the voucher date and the scheduled payment date is not greater than the number of days on the Discount table in AFS (DISC). The discount is not taken, if the scheduled payment date does not occur before the last possible payment date on the Discount table.

7.4.2 Credit Memos

The following policies will apply to credit memos in AFS:

1. Credit memos will be applied against a vendor on an agency specific basis.
2. Credit memos will only reduce payments from the same agency that entered the credit, if the credit is recorded using the same check type and vendor code as the original payment.

3. Credit memos are recorded with a decrease line amount on an original entry payment voucher.

7.4.3 Liens/Levies

The following policies will apply to liens and levies in AFS:

1. Agencies that receive notification that a lien or levy has been issued against a vendor should enter a record on the VLLT screen and

2. Agencies should never change the remittance address of the vendor to reflect the address of the lien holder. AFS will withhold the amount specified on the VLLT screen from payments issued to the vendor until the entire amount of the lien or levy has been remitted to the lien holder.

7.4.4 Backup Withholding

The following policies will apply to backup withholding in AFS:

1. State agencies will withhold 30.5% from all payments to vendors subject to backup withholding in accordance with the Internal Revenue Service (IRS) Code and Regulations;

2. Agencies that do not withhold when required, or fail to obtain payee Taxpayer Identification Numbers (TINs), may be subject to penalties. The penalties levied for failure to comply with

3. IRS regulations will be paid from that agency’s appropriation;

4. Agencies will be responsible for entering the Payment Voucher to generate a payment to reimburse the federal government for the backup withholding, and

5. In order to limit the need for backup withholding, it will be the Division of Administration policy that vendors will not be set up without a correct Taxpayer Identification Number (TIN). Agencies are subject to backup withholding requirements when:

A. payee's Taxpayer Identification Number (TIN) has not been furnished to
7.5 1099 Processing Overview

The 1099 process is based on the calendar year, January to December. This includes all transactions (payment vouchers, journal vouchers, manual warrants, check cancellations, cash receipts, etc.) in accounting periods 07 in one fiscal year through 06 of the following fiscal year. Each year, the IRS releases Instructions for Forms 1099, 1098, 5498 and W-2G that detail the reporting requirements for each calendar year. Agencies should obtain a copy of these instructions annually and comply.

The 1099 process is run during the December monthly close each year. This process creates the 1099 tables and BUNDL reports 4G01 and 4G02 (See Section 7.7). In January, 1099’s are issued for 1099 vendors paid at least $600, or any amount if the vendor is subject to backup withholding.

OSRAP will print all 1099-G and 1099-MISC forms and mail to agencies on a single sheet of paper using the Convey Compliance software. The 1099 information will be filed with the IRS electronically by OSRAP after all agency corrections have been made.

The following policies will apply to 1099’s:

1. Agencies should begin reviewing and processing manual additions, changes and deletions to their 1099 tables the day after the December monthly close through the close of business on the date assigned by OSRAP each year;

2. Agencies will copy and mail the 1099s to the vendors on or before January 31 each year, and

3. Agencies will send corrections to OSRAP to transmit to the IRS if they are not excessive (more than 20). Any excessive number of corrections will be done by the agency. The procedure for corrections is included in the Instructions for Forms 1099, 1098, 5498 and W-2G.

7.6 Year End Processing Overview

In addition to the 12 accounting periods that make up a fiscal year (July – June), a 45 day period between July 1 and August 14 exists. This period is known as the thirteenth accounting period. The 13th period gives agencies an opportunity to make adjustments to transactions that were processed incorrectly during the fiscal year. It is very important for agencies to input the accounting period in every document processed during this period. OSRAP prepares memorandums annually that provide agencies with a detailed list of deadlines for the June 30th and August 14th Close processes. (See Chapter 16 of the OSRAP Policies and Procedures Manual for details on Close Processes)

A fourteenth period is available for use by OSRAP and STO only. This period is used to make additional adjustments to transactions previously recorded in error. After the 14th period is closed, no corrections will be able to affect the closed fiscal year.

7.7 Reports

The ISIS payment process generates several reports. These reports should be reviewed weekly by all state agencies. The reports are as follows:

1. Scheduled Payment Turnaround Report (1G06);
2. Unscheduled Payment Turnaround Report (1G07);
3. AD Discounts Taken/Lost Report (1G24);
4. EFT Scheduled Payment Turnaround Report (1G25);
5. EFT Unscheduled Payment Turnaround Report (1G26), and
6. EFT Discounts Taken/Lost Report (1G28).

The ISIS 1099 process also generates several reports. The reports are as follows:

1. 1099 Turnaround Report (4G01)
2. 1099 Adjusting Transactions by Vendor Report (4G02)
Reports 1G06 and 1G25 list, by agency, all outstanding payment vouchers that are scheduled to be paid on or before the date that falls on or before the date specified for voucher selection.

Reports 1G07 and 1G26 list all outstanding vouchers that are on hold and whose scheduled payment date does not satisfy the date specified for voucher selection. It also lists the reasons the payments are have not been generated.

Reports 1G24 and 1G28 list the discounts being taken and lost. If discounts are being lost on a regular basis, payment policies or discount types may need to be adjusted.

Reports 4G01 and 4G02 list detailed 1099 information for the calendar year. These reports are generated in June, November and January.

See the *ISIS/AFS Reports Manuals* for more detailed descriptions, samples of these reports and additional BUNDL reports that are generated.
PURPOSE AND DESCRIPTION:

PROCEDURES

Before data is entered, you must first logon to AFS. This procedure is used to input a Quick Payment Voucher (PVQ). Field definitions for the PVQ can be found in section 7.1.2.1 of this chapter. Policies regarding PVQ’s can be found in section 7.2.1.1 of this chapter.

Responsibility | Action
---|---
Authorized Agency Personnel | 1. Accesses the VEN2 table in AFS to verify the vendor number is active.
 | A. Types “N” in the ACTION.
 | B. Types “VEN2” in the SCREEN.
 | C. Presses <ENTER>. You will be at the designated table.
 | D. Verifies that the status code is 1/ACTIVE
 | E. If the status code is 1, go to number 2. If the status code is not 1, see Chapter 18 of the OSRAP Policies and Procedures Manual for details on finding the correct vendor number to use.

2. Accesses the Document Suspense

 | A. Types “N” in the ACTION.
 | B. Types “SUSF” in the SCREEN.
Responsibility Action

Authorized Agency Personnel

C. Presses <ENTER>. You will be at the designated table.

3. Creates a new PVQ

A. Types “NEW” in the FUNCTION.

B. Presses <TAB> to the DOCUMENT area.

C. Types the following information in the corresponding fields under DOCUMENT

1) Type “PVQ” in the TYPE field.
2) Type agency number in the AGCY field.
3) Type “PVQ#” in the NUMBER field. The number sign will automatically assign the next document number for your agency to this PVQ document. See Exhibit 7-1.

5. Enters values in the corresponding required fields of the document header:

A. ACCT PRD

Responsibility Action
Authorized Agency Personnel

B. BFY
C. VENDOR CODE
D. ACT DEL DATE
E. SCH PAY DATE
F. DOCUMENT TOTAL
G. SINGLE CHECK FLAG

6. Enters the required values in the corresponding fields of the document detail lines:

A. LN NO

B. REF CD/NUMBER/LN – If applicable.

C. VI NUMBER/LN – Enter the invoice number.

D. DESCRIPTION – Enter the account number or any additional comments.

E. FUND
F. AGCY
G. ORG

15. Types “END” in the FUNCTION and presses <ENTER> to exit and return to SUSF.
PURPOSE AND DESCRIPTION:

This procedure is used to prepare a CX Type 1 form. CX Type 1’s are typically used when a check has been lost, damaged, stolen, or stale dated and a replacement check needs to be issued to the vendor. These forms are located at http://www.state.la.us/OSRAP/INDEX.HTM in the Forms list. Policies regarding CX’s can be found in section 7.3 of this chapter.

Responsibility  Action

Agency Personnel

1. Receives notification from a vendor (via mail or a phone call) stating that a check has not been received, or is damaged, stolen or stale dated.

2. Reviews the WREC table to verify that the check is still “O” – outstanding. If the check is still outstanding and one agency paid the vendor on this check, go to number 3. If this is a multiple agency check, stop here and call the OSRAP Help Desk at (225) 342-1097. Give an OSRAP Employee the check number and the reason the check needs to be voided, they will handle the CX, mail it to the STO and notify all affected agencies.

3. Prepares the CX Type 1 Form (See Exhibit 7-19)

4. Enters the information in the required fields:

   A. AGENCY NAME

   B. AGENCY NUMBER

   C. ACCOUNTING PERIOD
### Procedure Name: Preparing a CX Type 1.

- **D.** BANK CODE
- **E.** VENDOR CODE
- **F.** CHECK NUMBER
- **G.** CASH ACCOUNT
- **H.** CHECK DATE
- **I.** CHECK AMOUNT
- **J.** REASON FOR CANCELLATION

5. Signs the form in the PREPARED BY field, include date and telephone number.

6. Reviews the form and signs in the APPROVED BY field, include date and telephone.

7. Mails the form, and the check (if it was returned) to Trudy Jackson at the STO. (Messenger Mail: State Capitol, 3rd Floor)

8. Receives CX form.

9. Verifies that check is still outstanding.

10. If outstanding and no check is available, issue a stop pay order at the bank.

11. If check is available or when stop pay is verified, enters and approves CX in AFS. In AFS, the check is voided and the system issues another check.
PURPOSE AND DESCRIPTION:

This procedure is used to prepare a CX Type 3 form. CX Type 3’s are typically used when a check has to be voided and the agency does not want the check to be reissued to the vendor. These forms are located at http://www.state.la.us/OSRAP/INDEX.HTM in the Forms list. See Chapter 8 of the OSRAP Policies and Procedures Manual for policies and procedures on preparing J1’s to void checks. Policies regarding CX’s can be found in section 7.3 of this chapter.

Responsibility                      Action

Agency Personnel 1. Receives notification from a vendor (via mail or a phone call) stating that a check needs to be voided.

2. Reviews the WREC table to verify that the check is still “O” – outstanding. If the check is still outstanding and one agency paid the vendor on this check, go to number 3. If this is a multiple agency check, stop here and call the OSRAP Help Desk at (225) 342-1097. Give an OSRAP Employee the check number and the reason the check needs to be voided, they will prepare the CX, mail it to the STO and notify all affected agencies.

3. Prepares the CX Type 3 Form (See Exhibit 7-21)

4. Enters the information in the required fields:

   A. AGENCY NAME
   B. AGENCY NUMBER
   C. ACCOUNTING PERIOD
   D. BANK CODE
   E. VENDOR CODE
### Procedure Name: Preparing a CX Type 3.

OSRAP Analyst
13. Receives CX forms from STO.
14. Retrieves J1 from SUSF.
15. Verifies coding of original PV.

STO
17. Approves and runs J1. At this point, the expenditures are returned and the result is that in ISIS it looks as if the check was never issued.
This is an example of the Document Suspense Screen. This is where a new PVQ document was created. A new document was created by typing PVQ in the TYPE field, typing the agency number in the AGCY field, and typing PVQ# in the NUMBER field.

NOTE: The number sign or pound sign automatically assigned the next available document number for your agency and transaction type to the AP document.
This is an example of a PVQ document. The PVQ document displayed is at a PEND1 status and is ready for agency approval.
