UNIFORM CHART OF ACCOUNTS

13.1 Overview

R.S. 39.78 states "The commissioner of administration shall, under authority of the governor and consistent with the provisions of this Chapter, prescribe and cause to be installed and maintain a uniform system of accounting in all state agencies." The Commissioner of the Division of Administration has delegated this function to the Office of Statewide Reporting and Accounting Policy.

This chapter provides state agencies with definitions of valid object, revenue source and balance sheet account codes in the State’s accounting system, ISIS. The codes are divided into sections based on the master table of AFS on which it is defined (i.e., OBJ2, RSR2, or BAC2) and are in numerical order. These definitions are provided to aid agencies in selecting the correct code for use on system documents. The definitions given are for the most common use of the account. Agencies should review all account definitions in each relevant section and category before making a selection.

As new chart of account data elements are required, the agencies may request that OSRAP add them; however, remember that agency specific elements are generally not established in the statewide chart of accounts. For such needs the agency should use sub-objects, sub-revenue sources and reporting categories.
13.2 Object Codes

The Object Table (OBJ2) defines all valid object codes for use on expenditure budget, spending and correction transactions in ISIS. This table establishes higher level classifications of the object codes. The object code is the starting point of a classification hierarchy that puts similar objects of expenditure together in progressively larger groups. The progression table is as follows: sub-object, object code, object class, object category, object type and object group. Agencies may define sub-objects on their documents. Your use of a sub-object is optional. The Object Index Table (OBJT) summarizes and condenses the information on the OBJ2 table and displays up to 14 object codes at a time whereas the OBJ2 table displays detailed information for a maximum of two object codes at a time.

The object code, in conjunction with the vendor code used on payment vouchers, determines if a payment is 1099 reportable. A 1099 reportable object will have an entry in the 1099 return and income type fields of the OBJ2 and OBJT Tables. Agencies should review the 1099 return and income type fields when selecting an object for use to ensure that payments which are 1099 reportable are coded to 1099 reportable objects.

13.2.1 Transfer Objects

All interfund transactions except loans, quasi-external transactions and reimbursements should be coded to transfer objects. Transfers are classified as belonging to one of two major categories: Residual Equity transfers or Operating transfers.

**T140 Automatic Transfer Out** - the restricted object of expenditure for the automatic transfer from an original fund to a final fund. This object code can only be coded on a J1 transaction and is automatically inferred on other AFS documents as applicable.

**T160 Residual Equity Transfers Out** - nonrecurring or non-routine transfers of equity between funds, e.g., transfers of residual balances of discontinued funds to the General Fund or a Debt Service Fund.

**T230 Mandatory Transfers-Principal and Interest** - transfers from current funds to other funds arising out of binding legal agreements related to debt retirement and interest not financed by other sources. Mandatory transfers may be required to be made from either unrestricted or restricted funds. **For use by State Colleges and Universities only.**
T240  **Mandatory Transfers-Renewals and Replacements**  - - transfers from current funds to other funds arising out of binding legal agreements related to provisions for renewals and replacement of plant not financed from other sources. Mandatory transfers may be required to be made from either unrestricted or restricted funds. *For use by State Colleges and Universities only.*

T250  **Mandatory Transfers-Loan Fund Matching**  - - transfers from current funds to other funds arising out of grant agreements with agencies of the federal government, donors, and other organizations to match gifts and grants to loan and other funds. Mandatory transfers may be required to be made from either unrestricted or restricted funds. *For use by State Colleges and Universities only.*

T260  **Mandatory Transfers-Other**  - - transfers from current funds to other funds arising out of binding legal agreements related to other concerns not defined in another object code. Mandatory transfers may be required to be made from either unrestricted or restricted funds. *For use by State Colleges and Universities only.*

T270  **Non Mandatory Transfers-Capital Improvements**  - - transfers from current funds to other funds made at the discretion of the governing board for capital improvements. It also may include the transfer of resources back to current funds.

T280  **Non Mandatory Transfers-Renewals and Replacements**  - - transfers from the current funds to other funds made at the discretion of the governing board for renewals and replacements. It also may include the transfer of resources back to current funds.

T290  **Non Mandatory Transfers-Other**  - - transfers from the current funds to other funds made at the discretion of the governing board for items other than the ones defined in another object.

T360  **Transfers-ISIS Warrants Drawn**  - - transfers from agency means of financing appropriations to the operating cash account. This object is automatically inferred when a WV document is processed for those agencies whose agency category on the AGC2 table is >ISIS=.

T370  **Transfer-Non-ISIS Warrants Drawn**  - - this account is used by "NON-ISIS" agencies only - those agencies for whom expenditures are not recorded in AFS. Account used to identify funds reduced from an agency’s means of financing appropriation. This account is coded on payment voucher documents (PV, P1, PVQ or MW).
13.2.2 Personal Services

Personal services are used for expenditures for salaries, wages, and related benefits provided for all persons (classified and unclassified) employed by the state governmental unit. In the LaGov Human Capital Management System (LAGOV HCM) the salary object is contained in the Personnel Subarea (PSA), and the benefits object is determined by the PSA and the retirement system. If the salary object is incorrect, and the agency changes the PSA, LAGOV HCM will send a JV to AFS correcting the salary and the benefits objects. Unless stated otherwise, the below objects can be coded in LAGOV HCM.

2100 **Salaries-Classified-Regular** - compensation paid to full-time or part-time classified employees hired on a continuing basis. Includes classified, academic employees, seasonal employees, employees paid biweekly, weekly, bimonthly, monthly, and faculty and staff of universities (excluding college and university instructors). 13.3 Revenue Sources

The Revenue Source (RSRC) Table defines types of revenue sources that appear in the revenue budget and on revenue transactions. This table also establishes higher level classifications of revenue source codes. The revenue source code is the starting point (lowest level) for a classification hierarchy that puts similar revenue sources together in progressively larger groups. The progression is as follows: sub-revenue source, revenue source, revenue class, revenue type, and revenue group. Similar revenue sources make a revenue class, and similar revenue classes make a revenue category. Use of a sub-revenue source code is optional and is defined at the agency level on their documents.

Agencies should consider the source of funding when selecting a revenue source for use. For example, your agency would not use 1015 Federal Receipts - Education to record receipts from the Louisiana Department of Education. Your agency should classify this money using an interagency transfer revenue source code.

13.3.1 Transfers

These transfers are legally authorized interfund transactions (from a fund receiving revenue to a fund that is to make the expenditures).

**T100 Inter Fund Prior Year Transfers In** - amounts transferred between cash accounts during the 13th accounting period only.
