Please check for the PCF website when using a PCF application as many have been revised.

I. PCF PAYMENT SCHEDULE

New Enrollees:

*Providers with Primary Insurance*: Payment must be made on or before the effective date of coverage. If payment is made after the effective date of the primary policy, the PCF effective *date* will be the date the insurance company/agent *received* the payment on behalf of the PCF. Proof of provider’s payment may be requested.

*Self Insured’s*: The effective date of coverage is the *date of receipt* by the PCF of the completed application, the appropriate surcharge payment and the security in the amount of $125,000.00.

Renewals:

*Providers with Primary Insurance*: Payment must be made to the insurance company or agent NO LATER than 30 days after the expiration of the policy.

**Self Insured’s**: Payment must be made to the PCF NO LATER than 30 days after the expiration of the self insured/PCF coverage. However, the completed application, and renewal information for the security must be furnished before a COE will be issued.

Tail Coverage: Must be purchased from primary within 45 days of termination of policy.

*****LATE PAYMENT BY THE HEALTHCARE PROVIDER WILL RESULT IN A GAP IN COVERAGE and COULD RESULT IN DENIAL OF COVERAGE ON A CLAIM BY THE PCF.*****

RESPONSIBILITY OF THE INSURANCE COMPANY/AGENT

Once payment is received by the insurance company/agent, the following is remitted to the PCF:

1. A certificate of insurance that includes the complete name and address of the HCP, specialty, license number, date of birth, dates of coverage, policy type, retro date (if applicable) and primary premium.
2. ** The insurer must provide the PCF with documentation of any exclusions or exceptions and additional insureds.
3. Appropriate surcharge payment. If other than what is found on the PCF rate sheet, an explanation is needed as to how it was calculated, such as part-time.
4. ** If using the ER per visit rate, you must include a list of locations served and
the providers at each location.

5. ** If using the FTE (full time equivalency or slot) method of calculating the PCF
surcharge, you must attach a list of employees included in the count.

6. ** If using the PCF application as the COI, also provide a copy of the Declaration
Page of the Policy. The Declaration Page alone does not contain all necessary
information and cannot substitute for a COI unless the additional information is
provided to include the provider’s date of birth if an individual, the license
number, the premium amount and the specialty code.

The insurance company/agent has 45 days from the date they receive the payment from a
HCP to remit it to the PCF. If remitted past the 45 day period, an insurance company
/agent will be charged a 5% penalty + accrued legal interest from the 46th day
until paid. Proof of the primary payment will be requested if a payment is remitted beyond
time allowed.

**CANCELLATIONS**

Notices of cancellations must be received within 30 days of effective date for full refund
back to date of cancellation. PCF will determine amount of refund if notice is received more
than the 30 days from the effective date. Written justification may be required for full
refunds if notice of cancellation is received over 60 days from effective date.
PCF does not accept cancellations directly from finance companies – notice must be from
the insurance agent or company. Refunds will be made for the current policy only.
Refunds will be made where cancellation is for non-renewed policy which terminated within
60 days of request for refund. Refunds are paid to the person or entity that paid the
surcharge to the PCF. ** The PCF reserves the right to request a copy of the Cancellation
notice to the provider to ensure compliance with La. R.S. 40:1299.45 D(2) which requires a
30 day written notice to the insured.

**II. CLASSIFICATION PROCEDURE:**

A. For classification assignment purposes, the following phraseology is defined:

1. The term "no surgery" applies to general practitioners and specialists who do
not perform obstetrical procedures or surgery (other than incision of boils and
superficial abscesses or suturing of skin and superficial fascia) and who do not
ordinarily assist in surgical procedures.

2. The term "minor surgery" applies to general practitioners and specialists who
perform minor surgery generally use local anesthesia, but not general
anesthesia.

3. The term "major surgery" applies to general practitioners and specialists who
perform major surgery or who assist in major surgery on their own or on other
than their own patients in which local or general anesthesia is used.
Tonsillectomies, adenoidectomies, abortions, dilation and curetttement,
laparoscopic procedures, normal obstetrical procedures and cesarean sections
shall be considered major surgery.
B. When two or more classes are applicable to a general practitioner or specialist, the rate for the highest paid class shall apply.

C. Any general practitioner or specialist who would normally be assigned to a class having a code number followed by an asterisk (*) shall be classified and rated as "Physicians--no major surgery", code 80534, if any of the following medical techniques or procedures are performed:

a. Acupuncture--other than acupuncture anesthesia
b. Cryosurgery -- other than use on benign or pre-malignant dermatological lesions
c. Lasers -- used in therapy
d. Shock therapy
e. Liposuction
f. Skin flaps with arterial blood supply other than cancer therapy
g. Any dermatological procedure done under general anesthesia
h. Epidural injections – for pain management

D. Any general practitioner or specialist who would normally be assigned to a classification having a code number followed by a cross-hatch (#) shall be classified and rated as "Physicians –no major surgery", code 80533, if such general practitioner or specialist performs any of the following medical techniques or procedures:

a. Catheterization -- arterial, cardiac, central venous, or diagnostic, intraluminal angioplasty, occasional insertion of pulmonary wedge, recording catheters or temporary pace-makers, and umbilical cord catheterization for diagnostic purposes or for monitoring blood gases in newborns receiving oxygen.
b. Needle biopsy -- including lung, liver, kidney, and prostate.
c. Radiopaque Dye Injections into blood vessels, lymphatics, sinus tracts or fistulae (not applicable to Radiologist, Code 80280*)
d. Pneumatic and mechanical esophageal dilation (not with bougie or olive)

E. Locum Tenens Coverage: The PCF requires a surcharge for Locum Tenens. The surcharge is prorated based on the class and specialty of the physician who is utilizing the Locum Tenen and the number of days worked. The PCF provides for a minimum of $250.00 or whichever is higher. When a physician completes the indicated period of time listed on the certificate of insurance, and he elects to return at a later point, he will be required to pay an additional surcharge based on the number of days worked. However, an individual MD will not be required to pay more than the amount charged for the full-time annual PCF surcharge rate for the highest class used for locum tenens coverage for any 1 year period, commencing from the first date enrolled as a locum tenens

F. Orthopedic Minor Surgery includes outpatient procedures such as toe surgery, arthroscopic procedures, closed reductions, percutaneous pinning and other percutaneous procedures. However, if general anesthesia is used for any of these procedures, Major Surgery classification is necessary.
G. **Corporate Coverage:** The PCF provides coverage for legal corporations based on information obtained or the Secretary of State’s website. A trade name is not a corporation and will not be covered as such. The appropriate corporate designation is required – LLC, Inc, APMC, APDC, etc. For Corporate coverage, a certificate of insurance and PCF corporate application, which is on our website, is required. If self-insured, only the PCF corporate application is required. It must contain the names of the providers eligible for enrollment (HCP specialties listed in our rate manual for which a PCF surcharge is owed) that make up the Corporation or Partnership, or work for the corporation or partnership. Coverage of employees must be verified to determine if any additional surcharge is due. No certificate of enrollment will be issued if there is a failure to comply with this provision. Coverage will not be established within this office or for any claim filed against a corporation that has not complied with these provisions.

H. **Nursing Home** applies only to a licensed “home” as defined in R.S. 40:2009.2. A nursing home may include both skilled nursing beds as well as other beds, in which case the number of each type of bed must be included on the application and the appropriate surcharge remitted. **A Skilled nursing facility bed includes beds in which patients receive skilled level of care, where Medicare is the primary payer source, highly intensive levels of care such as ventilator dependency and/or NRTP (closed head brain injury) or the supervision of skilled nursing care on a continuous and extended basis. ** Intermediate would be all other nursing home beds where daily care requires lower degree of semi-skilled care/supervision due to less severe illnesses or conditions. ** The PCF Other class has now been changed to Assisted living only and cannot be used for nursing home beds.

I. **Oral Surgeons:** past calculations for maximum increases/decreases in rates for the years 2006 and 2007 no longer apply. This provision ended with 2008 enrollments and renewals and the rates as set forth on the rate pages apply.

J. **Other Class:** Those providers that are not specifically listed in the PCF rate manual should use the “other” classification. The PCF surcharge is 93% of the undiscounted underlying premium for $100,000/$300,000 coverage (although the provider may have higher limits). The amount of the underlying premium MUST be provided with the PCF surcharge and application or certificate of insurance. Failure to provide this information will delay issuance of a certificate of enrollment until the information is provided. Additional classifications and PCF specialty codes can be found on the website. First year discounts by primary insurers do not apply to the PCF rate calculations.
K. There is a **$250 minimum** charge that is a POLICY-WRITING MINIMUM for the PCF, and may not be pro-rated. Refunds will not be issued that do not allow for the minimum amount to be retained by the PCF.

L. The use of “split maturity” or “blended rates” for calculating the PCF surcharge will **not** be allowed. When an insured joins a policy mid-term, at the time of the annual PCF renewal, that insured’s PCF surcharge cannot be calculated using two maturity levels. However, the PCF will allow an insured that begins a policy mid-term to remain 1st year claims made for the PCF if the initial time period was **less than 8 months** at the time of renewal. If the enrollment period was **8 months or more**, the insured must use 2nd year claims made for the PCF renewals.

<td>80314</td>
<td>20% of each individual class rate (**)</td>
</tr>
</tbody>
</table>

** No surcharge will be owed to the PCF to cover such entity if all shareholders/partners and professional employees are enrolled and qualified with the PCF. Otherwise a charge of 20% of each class rate will be made for any eligible shareholders/partners and employee not enrolled in the PCF (this will only cover the corporation, not the non-enrolled individuals). A separate Certificate of Insurance showing the corporation as an insured and the
**PCF corporate application** that lists all employed health care providers *is required*. Regular nursing staff and other ancillary staff do not have to be listed if not listed in this rate manual. Any questions should be directed to the PCF surcharge department.

**B. DROP DOWN CHARGE:** A physician or surgeon reducing classification will pay a *one-time* additional surcharge equal to the difference between the "tail" (reporting endorsement) charge for the higher classification and the tail charge for the lower classification. It will be based on the provider's maturity year at the time of the change. This additional surcharge may be waived if the provider has 10 or more consecutive years with the PCF.

**C. PART-TIME DISCOUNTS:** A health care provider who is employed full-time by a hospital or clinic which has paid a full surcharge for his classification, and the health care provider is also in private practice OR a health care provider practicing on a part-time basis, may be eligible for a rate credit on the surcharge for his private practice, as follows:

- 35 hrs. practice/month or less 75% Credit
- 65 hrs. practice/month or less 50% Credit
- 85 hrs. practice/month or less 25% Credit
- More than 85 hrs./month No Credit

*Based on 40 Hr work week*

**Part Time reduction charge:**
There will be a *one-time* additional surcharge for a health care provider with Claims Made coverage that is going from full-time to part-time practice. The charge will be based on the PCF tail surcharge for the provider’s class less the full time renewal rate for that class. This amount will be added to the part-time renewal amount. This additional surcharge may be waived if the provider has 10 or more consecutive years with the PCF.

As an example, a provider going from full-time Class 1 to part-time with a 50% credit would pay the following:

- Class 1– tail $8,571
- Renewal - $7,769
- difference $2,495
- 50% discount $3,884
- Total PCF surcharge $6,379

**D.** A physician or surgeon with a rate class in their primary insurance company that is different from the rate class shown in these pages for the Patients' Compensation Fund will in all instances pay the surcharge based on the PCF rate classes.

**E. Intern and Resident Rating Procedures:**

General Medicine Rate Class 3

11
**General Surgery**  Rate Class 5  
**Transitional (Med/Surg)**  Rate Class 4  
**Pediatrics**  Rate Class 1  
**Psychiatry**  Rate Class 1  
**Other**  PCF Rate class applicable to specialty  

Interns:  33% of indicated surcharge for applicable class  
Residents:  66% of indicated surcharge for applicable class  

**F. Retiring, Deceased or Disabled Physicians:** "Tail" coverage (Extended Reporting Endorsement) surcharges for these classes shall be considered as “included” in their last surcharge payment, and no additional charge shall be required for this coverage if they have been in the PCF for 10 consecutive years. However, a disabled physician who subsequently returns to practice must pay all applicable surcharges, just as any other active physician. This waiver also applies to the “step down” charge used for physicians who reduce their PCF classification, if such reduction is the result of a permanent disability or illness which allows the provider to continue to practice medicine, but requires a reduction in the specialty class (for example, dropping to a “no surgery” classification after previously qualifying as a surgeon or surgical assistant), the “step down” charge shall be considered “included” in the last surcharge paid at the higher classification.  

**G. Non listed classes** – classes/specialties which do not fall within the range of providers listed on these pages or in the complete list on the PCF website shall be rated at the discretion of the Fund. In most cases, such rates will follow the Insurance Service Office procedures.  

**H. ALTERNATE EMERGENCY PHYSICIAN RATING BASIS:**

This rating basis is an option available to any group or individual Emergency Medicine practice whose underlying coverage is rated on a "per patient visit" basis (or, for self-insureds, those whose hospital contracts are maintained on a "per patient visit" basis). To qualify for this basis, providers must be able to supply the Fund with the means of verifying the number of patient visits recorded at year end. Such verification can take the form of premium audits from underlying policies, copies of verifications for hospital contracts, or any other form of verification acceptable to the Fund. Surcharges paid to the Fund will be adjusted at the end of each policy year based on verified numbers submitted. (PLEASE NOTE: This rating basis is the only alternative available to rating Emergency Medicine on a per-physician basis. Under no circumstances will any ER group or practice be rated as per the "All Other" rating procedures.)  

Rates per patient visit are as follows:

<table>
<thead>
<tr>
<th>CLASS</th>
<th>CLAIMS MADE MATURITY YEAR</th>
<th>OCC</th>
</tr>
</thead>
<tbody>

### IV. SUPPLEMENTAL NOTES AND CHARGES

**LA PATIENT’S COMPENSATION FUND RATE PAGES**

**SUPPLEMENT: EXPERIENCE RATING**
1. General:

Effective 7-1-93, the LA PCF initiated an experience-rating program. The intent of the plan is to apportion a greater percentage of needed premium increases to those providers who are generated a greater-than-expected number of losses. This provision applies to all providers. The maximum increase for any provider is 50% of the annual surcharge.

While the provisions for application to the physician and hospital classes are slightly different, both operate under the following general parameters:

A. Only those providers with two or more eligible losses in the five-year rating period, either paid or reserved, will be affected. Not every provider meeting the criteria for rating shall earn a debit: a number of providers whose total losses fall below the indicated thresholds will simply pay manual premiums, like any other provider.

B. Loses subject to inclusion are as follows:

1. Any closed, paid loss with a report date of 5 years prior to the renewal date; AND
2. Any open, reserved loss, regardless of original report date
3. The “All Other” class will be experience rated under PH1 unless the providers included are classified at a higher level.

C. Losses used in the rating plan will be valued as of 90 days prior to the expiration of the provider’s coverage. Any changes in loss value after that date will be included in the next year's evaluation.

D. The Fund (rather than the providers and primary carriers), will calculate all modifiers and send appropriate notice to the providers and carriers prior to renewal. Each affected provider will be given a copy of the worksheet used in the calculation, so that they may review the loss data for accuracy.

E. Penalties are required in addition to the indicated surcharge increase shown in the attached rating pages.
2. Physician Class Program Specifics:

A. The physician-class modifiers rely on specific ranges of losses. These vary by PH-class. Those eligible providers with total limited losses in the five-year period which fall within the stated ranges shown below will earn the indicated debit modifier.

B. Modifiers are to be applied to the indicated renewal surcharge. (For example, a provider paying $10,000 in normal surcharges who earns a 20% penalty will pay a total of $12,000—i.e., $10,000 x 1.20.)

C. The indicated modifier shall be re-evaluated at each subsequent renewal. It is anticipated that providers will come in and out of the program as loss results change.

D. The maximum penalty to any provider is 50%.

E. Indicated modifiers and loss limitations by class:

3. Hospital Program Specifics

A. Hospital modifiers are individually calculated based upon the provider’s 5-year loss ratio with the Fund: that is, the relationship of surcharges paid in to losses paid out and reserved within the same five-year period. The losses shall be subject to the limitations shown below. The indicated modifier shall be the debit (if any) indicated by the loss ratio (i.e., any portion over 100%), subject to the maximum penalty of 50%.

B. MAXIMUM SINGLE LOSS PROVISIONS: Those hospitals who have paid a cumulative total of less than $300,000 into the Fund in the past five policy years shall have each individual loss limited to $300,000 for experience rating. Those hospitals which have paid in a cumulative total of $300,000 or more over the past five policy years shall have each individual loss limited to $500,000 for experience rating.

C. No provider shall pay more than 50% in penalty.

D. As in the physician classes, losses shall be valued as of 90 days prior to renewal of coverage. Any changes in value after that date shall be considered in the following years' rating.

E. Each provider shall be supplied with a copy of their worksheet, so that they may review losses and surcharge records for accuracy.

F. In the event of a complete change of corporate ownership, the Fund may, at its discretion, amend the experience rating basis of the new entity to identify pending development of data by the new entity. Each such entity desiring such a change must make individual submission to the Fund. The new entities shall begin new experience ratings after completing one policy year under the new ownership.
