

REISBU – RE Display – Information System: Buildings

This report provides information pertaining to a building including Site Code, Building Number, Legacy State ID, Building Name, address, Date ready for occupancy, Main Usage Type, Building Type, Building Condition, Number of floors, Building Values, Building measurements, Insurance Values, GIS coordinates, Flood Zone, Design Elements, Roof Elements, Occupancy Code, Roof Warranty, ADA and Form Q, etc.

When you open the REISBU report you will see the following screen and entry fields:

The “Company Code” will auto-fill with 0010 – this is the correct code, leave it for all searches.

The “Business Entity” is the Site Code with no dashes (Ex: 7-31-002 would be entered 731002).

The “Building” is the LaGov-assigned number associated with the building (this is NOT the State ID)

If you know the Site Code (Business Entity), then start at #1 below. If you don’t know the Site Code, start at #2

1. Enter the Site Code (with no dashes) in the Business Entity section and click execute . This will bring up a list of all the buildings for that entity. The State IDs are listed in the Legacy ID column. To view information on that building, click the Building Number in the “Building” column.

Bus.ent.	Building	Building Name	House No.	Street	City	Postl Code	Obj. Valid From	Object To	Legacy ID	State	Non State	Insured*	Uninsured	Floor	ETF	Mech Ele	Bldg.	Obj.

There are lots of tabs that contain information on the building you are viewing. There are screenshots and descriptions of these tabs starting in #3 below.

- If you do not know the Site Code (Business Entity), then there are several other ways to search for a building including the Building Name, Building Number, Site Code, Legacy Building ID (which is the State ID), etc. To search using any of these, click in the Building field and click the double-box search icon.

Company Code: 0010

Business Entity:

Building:

Legacy Building ID:

Building Name: *VEHICLE*

Postal Code:

City:

Street:

House Number:

Object Description:

Maximum No. of Hits: 500

The “Legacy Building ID” is the State ID with the “S” in front (Ex: S00301)

The “Building Name” is the name of the building that was in FM. Use all caps and asterisks to expand your search (Ex: If you are searching for a Vehicle Storage Shed but don’t know the exact name, you could search *VEHICLE* and all building names that have the word vehicle in it will be displayed.)

Enter the data you know into a search field, and click .

A list of all the buildings with the criteria you searched will open. (Ex: all buildings with the word *vehicle* in the name is listed in the image below) If there are a lot of results, you can sort by any of the columns to help you find the one you are searching for. When you find it, make a note of the BE (Site Code), then double click the line of the building you need.

Layout: /LP Building with Elevator and Mech Elements

Use Grid Control

NOTE:

If you want to include Inactive Buildings, remove the date in the “Period/key date” section

To view information on that building, click the Building Number in the “Building” column.

NOTE: You can also double click the Business Entity number in the “Bus.ent.” column to pull up information on that business entity.

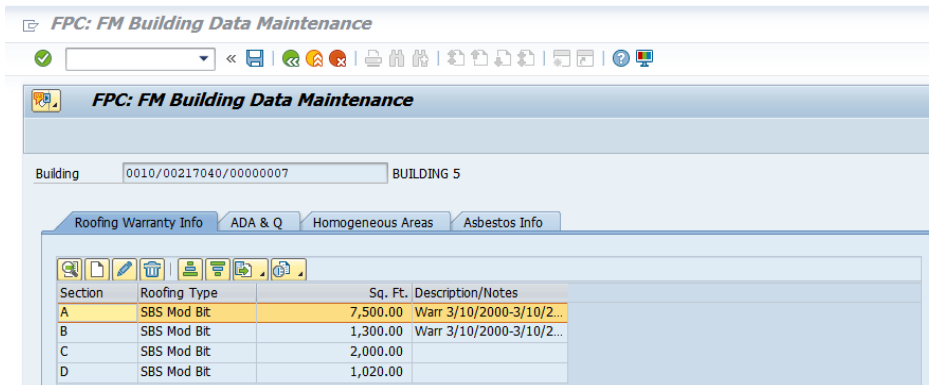

3. There are many tabs will that contain information about the building.

Roof Warranty Tab

To view Roof Warranty Information, click on the  tab. The Roofing Warranty Information will be displayed. Roof Warranty Tab Includes:

- Roof Warranty Info
- ADA Info
- Asbestos Info
- Attachments from FM and new attachments

Attachments in this section can be found the same way we open attachments in CJ20N. Click the dropdown arrow in the “Services for Object” button and choose “Attachment List”. The “FM Data Dump” is what the FM website hosts gave us. Any new documents will be uploaded individually with the proper document type.

ADA & Q Form:

- This page lists information about the forms that have been submitted
- If it is an older form (around 2022 and older) it will likely be found in the “FM Data Dump” attachment
- If it is newer, it will likely be it’s own individual attachment labeled properly
- It is in neither place then it likely got lost in the conversion and will need to be found in the project folder
