Imposition of Quarantine—Hurricane Katrina

In accordance with the provisions of the Formosan Termite Initiative Act, (R.S. 3:3391.1 through 3391.13), the Commissioner of Agriculture and Forestry, (commissioner), by the authority granted to him by R.S. 3:3391.7, hereby issues the following quarantine:

I. Facts Supporting Declaration

On August 29, 2005 Hurricane Katrina devastated the parishes of Jefferson, Orleans, Plaquemines, St. Bernard, St. Charles, St. John the Baptist, St. Tammany, Tangipahoa, and Washington. The named parishes are known to be heavily infested with Formosan termites. The hurricane has left millions of tons of wood debris, including debris infested with Formosan termites, in the named parishes. Additionally, thousands of structurally unsound buildings and structures, many of which are infested with Formosan termites, are in the named parishes and will have to be destroyed and turned into wood debris. State and federal authorities have developed plans to turn this wood debris into compost and other items for use in these and other Louisiana parishes. Such use of this wood debris will facilitate the spread of Formosan termites into areas of the state that are either not currently infested or have a minor or moderate infestation, thereby causing destruction or substantial damage to houses and other structures.

Many of the houses and structures that will be destroyed contain architecturally significant components, such as beams and doors, which are both salvageable and economically valuable. These articles will be sold for installation in new and remodeled homes and structures in the named parishes and in other parishes. Many of these articles will be infested with Formosan termites. The use of these infested articles in new and remodeled homes and structures will cause the spread of Formosan termites and subsequent destruction or substantial damage to these and other homes and structures.

The devastation left by Hurricane Katrina also requires temporary and permanent housing to be moved into or built in the named parishes. Unless the movable temporary housing is inspected prior to leaving the named parishes, the use or passage of the temporary housing in or through other parishes of the state will cause the spread of Formosan termites and subsequent destruction or substantial damage to these and other homes and structures. All new construction and reconstruction of permanent housing in the named parishes must be treated for Formosan termites to reduce the extent of infestation and to minimize subsequent destruction and damage to these homes and structures and other homes and structures.

Imposition of this quarantine is required to prevent the spread of Formosan termites and infestation of areas, homes and structures that are not currently infested, or which are to be built or reconstructed. Failure to impose this quarantine will cause severe economic damage and property loss to the citizens of Louisiana.

II. Objectives of Quarantine

The objectives of this quarantine are to prevent the spread of Formosan termites into areas of the state that are not now currently infested with Formosan termites, to prevent Formosan termites from infesting existing homes and structures that are not currently infested, and to prevent Formosan termites from infesting new and reconstructed homes and structures.

III. Geographical Area of Quarantine

The geographical areas of this quarantine are the named parishes of Jefferson, Orleans, Plaquemines, St. Bernard, St. Charles, St. John the Baptist, St. Tammany, Tangipahoa, and Washington.

IV. Prohibitions and Requirements

1. All new construction and reconstruction of houses, buildings and other permanent structures in the named parishes must be treated for Formosan termites according to the Louisiana Structural Pest Control Commission's Rules and Regulations.

2. The movement of any wood or cellulose material from the named parishes is prohibited unless either (1) such wood or cellulose material has been fumigated or otherwise treated for Formosan termites and is approved for movement by the commissioner or his designee(s), or (2) the commissioner or his designee(s) gives written authorizations
areas of the state that are either not currently infested or have debris will facilitate the spread of Formosan termites into these and other Louisiana parishes. Such use of this wood will turn this wood debris into compost and other items for use in parishes and will have to be destroyed and turned into wood which are infested with Formosan termites, are in the named parishes or in any other parish prior to being fumigated or treated for Formosan termites.

V. Exemptions from Quarantine

The following activities shall be exempt from this quarantine:

1. Commercial logging and timber operations related to silviculture productions.
2. Commercial operations involving the sale or distribution of nursery stock. Nursery stock is defined in R.S. 3:1656(B) and means "all trees, shrubs, ornamental plants, grass sod, foliage plants, or marsh plants."

VI. Time Limit

This quarantine shall remain in effect until rescinded by my written order. A waiver of any requirement or authorization for anyone to do any of the prohibited acts, whether in whole or in part, by me or my designee(s) shall not be construed as rescinding or modifying this quarantine.

Signed October 25, 2005 at Baton Rouge, Louisiana.

Imposition of Quarantine—Hurricane Rita

In accordance with the provisions of the Formosan Termite Initiative Act, (R.S. 3:3391.1 through 3391.13), the Commissioner of Agriculture and Forestry, (commissioner), by the authority granted to him by R.S. 3:3391.7, hereby issues the following quarantine

1. Facts Supporting Declaration

On September 24, 2005 Hurricane Rita devastated the parishes of Calcasieu, Cameron and Jefferson Davis. The named parishes are known to be heavily infested with Formosan termites. The hurricane has left millions of tons of wood debris, including debris infested with Formosan termites, in the named parishes. Additionally, thousands of structurally unsound buildings and structures, many of which are infested with Formosan termites, are in the named parishes and will have to be destroyed and turned into wood debris. State and federal authorities have developed plans to turn this wood debris into compost and other items for use in these and other Louisiana parishes. Such use of this wood debris will facilitate the spread of Formosan termites into areas of the state that are either not currently infested or have a minor or moderate infestation, thereby causing destruction or substantial damage to houses and other structures.

Many of the houses and structures that will be destroyed contain architecturally significant components, such as beams and doors, which are both salvageable and economically valuable. These articles will be sold for installation in new and remodeled homes and structures in the named parishes and in other parishes. Many of these articles will be infested with Formosan termites. The use of these infested articles in new and remodeled homes and structures will cause the spread of Formosan termites and subsequent destruction or substantial damage to these and other homes and structures.

The devastation left by Hurricane Rita also requires temporary and permanent housing to be moved into or built in the named parishes. Unless the movable temporary housing is inspected prior to leaving the named parishes, the use or passage of the temporary housing in or through other parishes of the state will cause the spread of Formosan termites and subsequent destruction or substantial damage to these and other homes and structures. All new construction and reconstruction of permanent housing in the named parishes must be treated for Formosan termites to reduce the extent of infestation and to minimize subsequent destruction and damage to these homes and structures and other homes and structures.

Imposition of this quarantine is required to prevent the spread of Formosan termites and infestation of areas, homes and structures that are not currently infested, or which are to be built or reconstructed. Failure to impose this quarantine will cause severe economic damage and property loss to the citizens of Louisiana.

II. Objectives of Quarantine

The objectives of this quarantine are to prevent the spread of Formosan termites into areas of the state that are not now currently infested with Formosan termites, to prevent Formosan termites from infesting existing homes and structures that are not currently infested, and to prevent Formosan termites from infesting new and reconstructed homes and structures.

III. Geographical Area of Quarantine

The geographical areas of this quarantine are the named parishes of Calcasieu, Cameron and Jefferson Davis.

IV. Prohibitions and Requirements

1. All new construction and reconstruction of houses, buildings and other permanent structures in the named parishes must be treated for Formosan termites according to the Louisiana Structural Pest Control Commission’s Rules and Regulations.

2. The movement of any wood or cellulose material from the named parishes is prohibited unless either (1) such wood or cellulose material has been fumigated or otherwise treated for Formosan termites and is approved for movement by the commissioner or his designee(s), or (2) the commissioner or his designee(s) gives written authorizations for untreated wood or cellulose material to be moved from the named parishes.

3. All temporary housing to be moved out of the named parishes shall not be removed from the named parishes until
written authorization is given by the commissioner or his
designee(s).
4. All architectural components, such as beams, doors,
and other wood salvaged from a structure in the named
parishes shall not be sold or placed in a new, remodeled,
or reconstructed home, building, or permanent structure located
in the named parishes or in any other parish prior to being
fumigated or treated for Formosan termites.

V. Exemptions from Quarantine
The following activities shall be exempt from this
quarantine.
1. Commercial logging and timber operations related
to silviculture productions.
2. Commercial operations involving the sale or
distribution of nursery stock. Nursery stock is defined in
R.S. 3:1656(B) and means "all trees, shrubs, ornamental
plants, grass sod, foliage plants, or marsh plants."

VI. Time Limit
This quarantine shall remain in effect until rescinded by
my written order. A waiver of any requirement or
authorization for anyone to do any of the prohibited acts,
whether in whole or in part, by me or my designee(s) shall
not be construed as rescinding or modifying this quarantine.

Signed October 25, 2005 at Baton Rouge, Louisiana.

Timber Stumpage Values

The Louisiana Forestry Commission and the Louisiana
Tax Commission will meet and jointly adopt current average
timber market values for 2006 on December 12, 2005, which
is the second Monday in December as required by the
provisions of R.S. 47:633. The meeting will begin at 10 a.m.
and be held at the headquarters of the Louisiana Department
of Agriculture and Forestry, 5825 Florida Blvd., Baton
Rouge, LA.

The valuations adopted by these commissions shall take
effect on January 1, 2006 and continue through December
31, 2006.

The Louisiana Department of Agriculture and Forestry,
Office of Forestry has compiled the following data and
developed the following recommendations for the
determination of the current average stumpage market value
of trees and timber and of pulpwood for calendar year 2006.

Extension of Comment Period for Grant Parish  
Ozone Maintenance Plan

Under the authority of the Louisiana Environmental Quality Act, R.S. 30:2001 et seq., the secretary gives notice that the Office of Environmental Assessment, Plan Development Section, will submit a proposed revision to the ozone maintenance plan for Grant Parish. This revision to the State Implementation Plan (SIP) is mandated under Section 110(a)(1) requirements of the 1990 Clean Air Act Amendments (CAAA).

According to the Phase 1 Implementation Rule published April 30, 2004 (69 FR 23951), areas that are designated attainment for the 8-hour ozone National Ambient Air Quality Standards (NAAQS) and are designated attainment for the 1-hour ozone NAAQS with an approved maintenance plan must submit a revision.

The Potpourri notice for the Grant Parish Ozone Maintenance Plan revision was published on page 2655 of the October 20, 2005, issue of the Louisiana Register. The public hearing will still be held at 1:30 p.m. on November 29, 2005, in the Galvez Building, Oliver Pollock Conference Room, 602 N. Fifth Street, Baton Rouge, LA. The comment period has been extended until 4:30 p.m., December 19, 2005. Written comments should be submitted to Vivian H. Aucoin, Office of Environmental Assessment, Box 4314, Baton Rouge, LA 70821-4314 or to fax (225) 219-3582 or by e-mail to vivian.aucoin@la.gov.

A copy of the SIP revision for Grant Parish may be viewed from 8 a.m. to 4:30 p.m. in the DEQ Public Records Center, Room 127, 602 N. Fifth Street, Baton Rouge, LA, or at the Northeast Regional Office located at 1823 Hwy. 546, West Monroe, LA.

Extension of Comment Period for HW084  
Remediation of Sites with Contaminated Media  
(LAC 33:V.109.Hazardous Waste Definition)

The Louisiana Department of Environmental Quality is granting the request for an extension of the comment period for proposed Rule HW084. The Notice of Intent for this Rule was published on pages 2272-2273 of the September 20, 2005, issue of the Louisiana Register. All interested persons are invited to continue to submit written comments on the proposed regulation. Persons commenting should reference this proposed regulation by HW084. Such comments must be received no later than December 23, 2005, at 4:30 p.m., and should be sent to Judith A.
The dislocation of residents and the damage to infrastructure in the Emergency Areas has affected the ability of the Department of Environmental Quality to solicit and receive comments on proposed permit actions. The following procedures are intended to address these issues in a manner that offers the opportunity for meaningful public participation and that meets the requirements and intent of the state and federal permitting statutes and regulations. Copies of this proposed regulation can be purchased by contacting the DEQ Public Records Center at (225) 219-3168. Check or money order is required in advance for each copy of HW084. This regulation is available on the internet at www.deq.louisiana.gov under Rules and Regulations. This proposed regulation is available for inspection at the following DEQ office locations from 8 a.m. until 4:30 p.m.: 602 N. Fifth Street, Baton Rouge, LA 70802; 1823 Highway 546, West Monroe, LA 71292; State Office Building, 1525 Fairfield Avenue, Shreveport, LA 71101; 1301 Gadwall Street, Lake Charles, LA 70615; 111 New Center Drive, Lafayette, LA 70508; 110 Barataria Street, Lockport, LA 70374.

Legal Affairs Division

Public Notice and Public Participation Procedures
Regarding Proposed Permit Actions in Hurricane Impacted Areas

The dislocation of residents and the damage to infrastructure in the Emergency Areas has affected the ability of the Department of Environmental Quality to solicit and receive comments on proposed permit actions. The following procedures are intended to address these issues in a manner that offers the opportunity for meaningful public participation and that meets the requirements and intent of the state and federal permitting statutes and regulations. Public notice and comment procedures will vary according to the categorization of the parish in which the facility at issue is located. The department will categorize parishes after evaluating all relevant factors, including but not limited to:

- newspaper circulation rates (both paid subscriptions and free distribution), comparing pre-hurricane with current rates
- basic services—power, potable water, and sewage treatment
- local government approval for residents to return for long-term habitation
- number of schools that are open
- availability of locations to serve as document repositories and in which to conduct public hearings should they be requested
- condition of roads

Category 1 parishes are those with newspaper circulation rates of at least 90 percent pre-hurricane levels. Basic services are restored to at least 90 percent pre-hurricane levels. The parish is open for long-term habitation and public schools have resumed operation. As of this date, the parishes in this category are Acadia, Allen, Ascension, Assumption, Beauregard, East Baton Rouge, East Feliciana, Evangeline, Iberia, Iberville, Jefferson Davis, Lafayette, Lafourche, Livingston, Pointe Coupee, St. Charles, St. Helena, St. James, St. John, St. Landry, St. Martin, St. Mary, Tangipahoa, Vermilion, Washington, West Baton Rouge and West Feliciana.

In Category 1 parishes, the department will continue to implement the public notice procedures in place before the hurricanes. This includes publication in the required newspapers, sending notice to individuals on the department’s permits mailing list, placing notice on the department's web page, and sending electronic notice to individuals who have registered with the department to receive notices in this manner. The DEQ Public Participation Group (PPG) will use its knowledge of newspaper distribution rates and patterns to determine if the notice should be placed in more than one local newspaper. Some permit procedures require notice to also be placed in the official state journal, The Advocate.

Category 2 parishes are those with newspaper circulation rates of at least 50 percent pre-hurricane levels, and basic services restored to at least 50 percent of the parish. The parish is open for long-term habitation and public schools have resumed operation. As of this date, the parishes in this category are St. Tammany, Jefferson, Terrebonne, Calcasieu, and Plaquemines.

In Category 2 parishes, the department will follow the same procedures provided herein for Category 1, with the addition of the following: Notices will be placed in The Advocate to identify the permits placed on public notice for the previous week, sorted by parish. These notices will clearly identify the electronic web link to view the public notices and will give the phone number to call to request additional information or to find out where documents may be reviewed locally.

Category 3 parishes are the most severely affected parishes. Any parish not meeting all of the criteria for Category 2 are considered Category 3. As of this date, the parishes in this category are Cameron, Orleans, and St. Bernard.

In Category 3 parishes, the department will follow the same procedures provided herein for Category 2, with the addition of the following:

1. Comment periods will be extended a total of 15 extra days.
2. Notices will be published twice in the selected newspaper(s).
3. An additional newspaper will be selected in which to publish the notices. This will be the newspaper with the largest circulation in a parish that physically adjoins the parish in which the facility is located.
4. If not already required to do so, the department will publish notices in The Advocate, the official state journal.

When arranging public hearings to solicit comments regarding permitting activities, the department will work with stakeholders to find suitable hearing site locations.

Herman Robinson, CPM
Executive Counsel

0511#081
Final Damage Assessment and Restoration Plan/Environmental Assessment for Equinox Oil Company Crude Oil Discharge

Agencies: Louisiana Oil Spill Coordinator’s Office, Office of the Governor (LOSCO); Louisiana Department of Environmental Quality (LDEQ); Louisiana Department of Natural Resources (LDNR); Louisiana Department of Wildlife and Fisheries (LDWF); National Oceanic and Atmospheric Administration (NOAA); and United States Department of the Interior (USDOI) which is represented by the U.S. Fish and Wildlife Service (USFWS).

Action: Notice of availability of a Final Damage Assessment and Restoration Plan/Environmental Assessment.

Summary: Notice is hereby given that a document entitled, "Final Damage Assessment and Restoration Plan and Environmental Assessment for Equinox Oil Company Crude Oil Discharge, Lake Grande Eacaille, Louisiana, September 22, 1998" (Final DARP/EA) is final and available to the public as of November 20 2005. This document has been prepared by the agencies listed above (Trustees) to address injuries to natural resources and services following the September 22, 1998 discharge of crude oil into Lake Grande Eacaille, Louisiana (the incident). This document presents the Trustees’ assessment of injuries to natural resources and services attributable to this incident, and their plan to restore, replace, or acquire resources or services equivalent to those lost as a basis for compensating for the injuries to natural resources and services that occurred.

For Further Information: Contact Gina Muhs Saizan at 225-219-5800 or by email gina.saizan@la.gov (to view the Final DARP/EA via the internet: www.losco.state.la.us and look under the News Flash for Equinox Oil Spill Final DARP/EA).

Address: Interested members of the public are invited to request a copy of the Final DARP/EA from Gina Muhs Saizan at the address given below.

Gina Muhs Saizan
Louisiana Oil Spill Coordinator’s Office
150 Third Street, Suite 405
Baton Rouge, LA 70801
gina.saizan@la.gov

Supplementary Information: The public was given an opportunity to review and comment on the Draft DARP/EA during the public comment period, which extended from July 20, 2005 through August 22, 2005. Public review of the Draft DARP/EA is consistent with all state and federal laws and regulations that apply to the Natural Resource Damage Assessment (NRDA) process, including Section 1006 of the Oil Pollution Act (OPA), 33 U.S.C. §2706; the regulations for NRDA under OPA, 15 C.F.R. Part 990; Section 2480 of the Louisiana Oil Spill Prevention and Response Act (OSPRA), R.S. 30:2480 et seq.; and the regulations for NRDA under OSPRA, LAC 43:XXIX.Chapter 1. The Trustees did not receive comments during the public comment period and have finalized the DARP/EA for the September 22, 1998 Equinox Oil Company Crude Oil Discharge, Lake Grande Eacaille, Louisiana.

Roland Guidry
Oil Spill Coordinator
