OSRAP MEMORANDUM 11-33

TO: Fiscal Officers
All ISIS Agencies

FROM: Afranie Adomako, CPA
Director

SUBJECT: FY 11 Transactions Pending in AFS Suspense File (SUSF)

The Office of Statewide Reporting and Accounting Policy (OSRAP) monitors the ISIS 2G23 (Pending Transactions in Suspense File in Excess of 90 Days) report to ensure that agencies do not leave unnecessary transactions in the suspense file (SUSF) indefinitely. The 2G23 report for the period ending 5/31/11 is available in BUNDL. The transactions listed in this report have been in SUSF **for over 90 days without action**. Transactions related to an agency's FY 11 regular appropriation will not be automatically deleted from SUSF by AFS. These transactions must be manually deleted. Even if your agency does not have any transactions in SUSF outstanding in excess of 90 days as of 5/31/11, you should continue to review SUSF for transactions that become outstanding in excess of 90 days during the months of June and July.

Agencies cannot process FY11 regular appropriation transactions after August 12, 2011. Agencies should review all of their FY11 transactions in SUSF that are in a status of pending, rejected, held, or scheduled and determine if these transactions should be processed before year-end. If a transaction is no longer necessary, delete it. If the transaction was overlooked, take the necessary actions to process it. The size of SUSF affects all agencies in that it creates delays in the retrieval and creation of transactions. As SUSF grows larger, these delays will become more noticeable.

We ask that you put all master documents in a "HELD" status as a means of identification. Please use this feature only for those documents of a complex nature. Do not forget to change the budget fiscal year reference from '11' to '12' in regular appropriation documents that you want to retain in the new fiscal year. Also, ensure that the document has been modified for any changes to the agency's structure.
